

VIVEKANANDHA

COLLEGE OF ARTS AND SCIENCES FOR WOMEN [AUTONOMOUS]

An ISO 9001:2008 Certified Institution, Affiliated to Periyar University, Salem,
(Approved by AICTE and Re-Accredited with 'A' Grade by NAAC,
Recognized Under 2(f) and 12(b) of UGC Act, 1956).
Elayampalayam, Tiruchengode - 637 205, Namakkal Dt., Tamilnadu, INDIA.

DEPARTMENT OF CHEMISTRY

MASTER OF SCIENCE (M.Sc.)

CHEMISTRY

About the College

Vivekanandha College of Arts and Sciences for Women (Autonomous) was established and hailed into Women's Educational Service in the Year 1995. Angammal Educational Trust Chaired by the great Educationalist 'Vidhya Rathna' Prof. Dr. M. KARUNANITHI, B.Pharm., M.S., Ph.D., D.Litt., sponsors this college and other institutions under the name of the great Saint Vivekanandha. Our institutions are situated on either side of Tiruchengode-Namakal Main Road at Elayampalayam, 6 kms away from Tiruchengode. This is biggest women's college in India with more than 7500 girl students and more than 18 departments. The strength of the college was just 65 at the time of its establishment. With the dedication, work, sacrifice and long vision of the chairman, this institution has grown into a Himalaya stage. As a result of which UGC, New Delhi, awarded 2f and 12b, extended Autonomous status for second cycle. The National Assessment and Accreditation Council reaccredited with grade 'A' for its successful performance.

As an Autonomous Institution, academic professionals of the college framed Curriculum and Syllabi in consultation with all its stakeholders to cater the needs of the young women to fulfill the women empowerment and present Industrial needs to the local benefits. The students are empowering with confidence and required skills to face the society.

Quality Policy

To provide professional training by establishing a high level center of learning that provides quality education at par with the international standards and Provide excellence education with well equipped infrastructure to all the rural women.

Our Vision

To be an academic institution exclusively for women, in dynamic equilibrium with the social and economic environment, strive continuously for excellence in education, research and technological service to the nation.

Our Mission

The mission of our institution is to discover, teach and apply knowledge for the intellectual, cultural, ethical, social and economic growth of women students.

REGULATIONS

I. SCOPE OF THE COURSE

The uniqueness of the M.Sc. (Chemistry) program is its content and topic coverage, the teaching methodology and the faculty. The program expects a serious commitment of the students to take up challenging study schedules and assignments. The course involves a blend of theoretical education and practical training which run concurrently for a period of three years and equips a student with knowledge, ability, skills and other qualities.

The teaching methodologies include classroom lectures, industrial visits, orientation and internship. The new syllabus may help the students to understand the newer aspects of chemistry and apply the same to the real life situations. Thus the students turn more relevant and resourceful to the society. It may enable the young minds think differently and forms a link between old ideas and new ideas in chemistry and gives comprehensive approaches to the very learning process and the learners. To have academic flexibility we have chosen and implemented Choice Based Credit System (CBCS) in our syllabus. To enhance the quality of students from 2018-2019, we have implemented Outcome Based Education (OBE) education system for I PG students. The OBE pattern will be extended for the II PG students in forth coming years.

II. SALIENT FEATURES

- Course is specially designed for a higher level career placement.
- Special guest lecturers from Industrialists will be arranged.
- Exclusively caters to students interested in pursuing higher studies.
- Special industry orientations and training are parts of the degree

course.

- Project work is included in the syllabus to enhance conceptual, analytical and deductive skills.

III. OBJECTIVES

The new syllabus throws light on the recent and emerging areas of chemistry.

- ✓ Enable the students to understand chemistry and make them more relevant to the society.
- ✓ Develop the analytical ability in students so that they prepared themselves in solving problems.
- ✓ Help the students to learn practical skills in a better way.
- ✓ Inculcate research aptitude in students.
- ✓ Enable the students to go to higher levels of learning chemistry.
- ✓ Improve the employability of the students.
- ✓ To inspire the students to apply their knowledge gained for the development of society in general.

IV. ELIGIBILITY FOR ADMISSION

Candidates seeking admission to the first year PG Degree course (M.Sc. chemistry) shall be required to have passed B.Sc., (Chemistry) B.Sc., (Applied chemistry) and B.Sc., (Industrial chemistry).

V. DURATION OF THE COURSE

- The course shall extend over a period of two academic years consisting of four semesters. Each academic year will be divided into two semesters. The first semester will consist of the period from

July to November and the second semester from December to April.

- The subjects of the study shall be in accordance with the syllabus prescribed from time to time by the Board of Studies of Vivekanandha College of Arts and Sciences for Women with the approval of Periyar University.
- Each subject will have 5 or 4 hours of lecture per week apart from practical training at the end of academic year.

VI. ASSESSMENT

Assessment of the students would be made through Continuous Internal Assessment (CIA) and External Assessment (EA) for passing each subject both theory and practical papers.

A candidate would be permitted to appear for the External Examination only on earning 75 % of attendance and only when her conduct has been satisfactory. It shall be open to grant exemption to a candidate for valid reasons subject to conditions prescribed.

A. CONTINUOUS INTERNAL ASSESSMENT (CIA)

The performance of the students will be assessed continuously and the Internal Assessment Marks will be as under:

| | |
|---|------------|
| 1. Average of two CIA test and Model exam - | 10 Marks |
| 2. Seminar | - 05 Marks |
| 3. Assignment | - 05 Marks |
| 3. Attendance | - 05 Marks |
| | |
| Total | =25 Marks |
| | |

Distribution of attendance mark

| S. No. | Percentage | Marks | |
|--------|------------|--------|-----------|
| | | Theory | Practical |
| 1 | 76-80 | 1 | 2 |
| 2 | 81-85 | 2 | 4 |
| 3 | 86-90 | 3 | 6 |
| 4 | 91-95 | 4 | 8 |
| 5 | 96-100 | 5 | 10 |

B. EXTERNAL ASSESSMENT (EA)

The performance of the students would be assessed by examination at the end of each semester with a written test for theory for three hours and practical examination at the end of even semesters for six hours. Question papers would be set by the selected external examiners in the prescribed format and valuated by the external examiners with the help of the teacher concern.

The pattern of assessment is as follows:

Distribution Of Final Assesment Marks (Theory-75, Practicals-60)

| Section | Activity | Marks (75) | Activity | Marks (60) |
|--------------|------------------------|------------|--------------------|------------|
| A | One mark (20) | 20 | Record work | 5 |
| B | Five marks (Either or) | 25 | Viva Voce | 5 |
| C | Ten marks (3/5) | 30 | Spotter | 20 |
| | | | Major(Performance) | 5 |
| | | | Major (Result) | 5 |
| | | | Major (Writeup) | 10 |
| | | | Minor(Performance) | 2 |
| | | | Minor (Result) | 3 |
| | | | Minor (Writeup) | 5 |
| Total | | 75 | Total | 60 |

VII. PASSING MINIMUM

INTERNAL

There is no passing minimum for CIA

EXTERNAL

In the University Examinations, the passing minimum shall be 50 % out of 75 Marks for theory (38 marks) and 50% out of 60 marks for practical (30 Marks).

VIII. CLASSIFICATION OF SUCCESSFUL CANDIDATES

Successful candidates passing the examination of Core Courses and elective courses, and securing marks

- a) 75 % and above shall be declared to have passed the examination in first class with Distinction provided they pass all the examinations prescribed for the programme at first appearance itself.
- b) 60% and above shall be declared to have passed the examinations in first class without Distinction.
- c) 50% and above but below 60% shall be declared to have passed the examinations in second class.
- d) Candidates who pass all the examinations prescribed for the programme at the first appearance itself and within a period of two consecutive academic years from the year of admission only will be eligible for University rank.

IX. ELIGIBILITY FOR AWARD OF THE DEGREE

A candidate shall be eligible for the award of the degree only if she has undergone the above degree for a period of not less than two academic years comprising of four semesters and passed the examinations

prescribed and fulfilled such conditions have been prescribed.

X. PROCEDURE IN THE EVENT OF FAILURE

If a candidate fails in a particular subject, she may reappear for the end semester examination in the concerned subject in subsequent semesters and shall pass the examination.

XI. COMMENCEMENT OF THESE REGULATIONS

These regulations shall take effect from the academic year 2020-21 (i.e.,) for the students who are to be admitted to the first year of the course during the academic year 2020-21 and thereafter.

XIII . BLOOM'S TAXONOMY BASED ASSESSMENT PATTERN

K1-Remember; K2- Understanding; K3- Apply; K4-Analyze; K5- Evaluate

1. Theory: 75 Marks

(i)Test - I & II and ESE:

| Knowledge Level | Section | Marks | Description | Total |
|-----------------|-----------------------|------------|-------------|-----------|
| K1 | A (One Mark) | 20 x 01=20 | Objective | 75 |
| K2 | B (Either or pattern) | 05 x 05=25 | Descriptive | |
| K3, K4 & K5 | C (Three out of five) | 03 x 10=30 | Detailed | |

Programme Outcomes

| | |
|------|--|
| PO 1 | Capable of demonstrating comprehensive knowledge and understanding of one or more disciplines that form a part of an undergraduate programme of study. |
| PO 2 | Ability to express thoughts and ideas effectively in writing and orally Communicate with others using appropriate media |

| | |
|-------|---|
| | confidently share ones views and express herself /himself. |
| PO 3 | Capability to apply analytic thought to a body of knowledge analyse and evaluate evidence arguments claims beliefs on the basis of empirical evidence identify relevant assumptions or implications |
| PO 4 | Capacity to extrapolate from what one has learned and apply their competencies to solve different kinds of non familiar problems rather than replicate curriculum content knowledge and apply ones learning to real life situations |
| PO 5 | Ability to evaluate the reliability and relevance of evidence identify logical flaws and holes in the arguments of others analyse and synthesise data from a variety of sources draw valid Conclusions. |
| PO 6 | A sense of inquiry and capability for asking relevant appropriate questions problematising synthesising and articulating ability to recognise cause and effect relationships define problems formulate hypotheses. |
| PO 7 | Ability to work effectively and respectfully with diverse teams facilitate cooperative or coordinated effort on the part of a group and act together as a group in the interests of work efficiently as a member of a team. |
| PO 8 | Ability to analyse interpret and draw conclusions from quantitative qualitative data and critically evaluate ideas, evidence and experiences from an open minded and reasoned perspective. |
| PO 9 | Critical sensibility to lived experiences with self awareness and reflexivity of both self and society. |
| PO 10 | Capability to use ICT in a variety of learning situations demonstrate ability to access evaluate and use a variety of relevant information sources and use appropriate software for analysis of data. |
| PO 11 | Ability to work independently, identify appropriate resources required for a project and manage a project through to completion. |
| PO 12 | Possess knowledge of the values and beliefs of multiple cultures and a global perspective. |
| PO 13 | Ability to embrace moral ethical values in conducting one's life formulate a position argument about an ethical issue from multiple perspectives and use ethical practices in all work. |
| PO 14 | Capability for mapping out the tasks of a team or an organization and setting direction formulating an inspiring vision building a |

| | |
|-------|---|
| | team who can help achieve the vision motivating. |
| PO 15 | Ability to acquire knowledge and skills including learning how to learn that are necessary for participating in learning activities throughout life through self paced. |

Programme Specific Outcomes

PS01: To foster a theoretical and practical knowledge on chemistry and its applications and to make responsible citizenships.

PS02: To deliver core and advanced courses on the applied chemistry.

PS03: To deepen learner-capacity for productive scientific thinking both within and beyond the classroom through extensive programmes.

PS04: To cultivate problem solving skills through chemical knowledge to address environmental problems, and to complement and reflect on social needs.

PS05: To develop innovative thinking, generate creative ideas towards scientific knowledge through well-structured seminars and assignments.

PS06: To apply modern methods of analysis to chemical systems in a laboratory setting.

| COs | COURSE OUTCOME |
|----------------|---|
| CO 1 | Students will be known to name the organic compounds systematically and they will be able to assess the aromaticity of any organic compounds. |
| CO 2 | Students can able to understand the formation of intermediates in organic reactions and the students can able to determine the mechanism of new organic reactions. |
| CO 3 | Students can able to understand the nucleophilic substitution reactions. |
| CO 4 | Knowledge of students will be enriched with stereochemistry and various types of substitution reactions which will help the students to carry out the research in future. |
| CO 5 | Students will systematically name the natural products and will study their stereochemistry. |

| Content of the Syllabus | | | |
|-------------------------|---|---------|----|
| Unit - I | Nomenclature and Aromaticity | Periods | 15 |
| | Nomenclature of aromatic heterocyclic compounds (containing one or two hetero atoms) – Nomenclature of alicyclic, bicyclic and tricyclic compounds. Concept of Aromaticity – aromatic character of benzene and heterocyclic compounds – benzene, pyrrole and pyridine. Effect of aromaticity on bond length, resonance energy and induced ring currents. Huckels rule – concept of homoaromaticity and antiaromaticity. Nonbenzenoid aromatic compounds – cyclopropeniumcation, cyclopentadienyl anion, ferrocene, diazocyclopentadiene, sydnone, azulene, tropolone ion, tropylium ion and annulenes – their structures and aromaticity. | | |
| Unit - II | Reactive intermediates and methods | Periods | 15 |
| | Structure, Stability, Generation and Reactions of Carbocation (Classical and Nonclassical), carbanions, carbenes, nitrenes and free radicals. Ylides – Generation, types and reactions. Enamines - Generation and reactions. Thermodynamic and kinetic control – methods of determination of reaction mechanisms – product analysis – determination of the presence of intermediate, isolation, detection, trapping – cross of experiments – isotopic labeling - isotopic effect – stereo chemical evidence – kinetic evidence. Microscopic reversibility – Hammond Postulate - Linear free energy relationship – Hammett equation – Taft equation - Limitations, application and deviations. | | |
| Unit - III | Nucleophilic substitution reactions | Periods | 15 |
| | Aliphatic Nucleophilic substitution reactions: SN1, SN2, SNi mechanism – factors affecting nucleophilic substitution - Neighbouring group participation, Ambident nucleophilic and ambident substrates. Substitution at vinyl carbon, allylic carbon and bridge head carbon. Von Braun reaction, Claisen condensation and Hydrolysis of ester. | | |

| | | | |
|------------------|--|---------|----|
| | Aromatic Nucleophilic substitution reactions: SN1, SN2 and SNAR mechanism. Typical reactions such as Gattermann reaction, Gattermann Koch reaction, Reimer – Tiemann reaction, Koble reaction. Ziegler alkylation – Chichibabin reaction – Cine substitutions. | | |
| Unit - IV | Electrophilic Substitution reactions | Periods | 15 |
| | Aromatic Electrophilic substitution reactions: Introduction – Mechanism of Electrophilic substitutions with examples. Orientation and reactivity – Electrophilic substitution on monosubstituted and disubstituted benzenes. Aliphatic Electrophilic substitution reactions: SE1 and SE2 reactions – Mechanism and reactivity. Reaction involving the migration of double bond – Halogenation of carbonyl compounds – Stork Enamine reactions – decarboxylation of aliphatic acids. Friedel craft acylation of olefinic carbon. | | |
| Unit - V | Stereochemistry | Periods | 15 |
| | Principles of symmetry- concept of chirality, Molecular symmetry and chirality, Newmann, Sawhorse, Fischer and Wedge representations and interconversions. Types of molecules exhibiting optical activity. Configurational nomenclature of acyclic and cyclic molecules: cis-trans, E & Z, D & L, (+ or –), d & l, R & S, erythro and threo; syn&anti. Stereospecific, Chemo, Regio, Enantio and stereo - selective organic transformations, asymmetric synthesis – Cram's rule. Conformational analysis – 1,2-disubstituted ethane derivatives – disubstituted cyclohexanes and their stereochemical features. Conformation and reactivity of substituted cyclohexanols (oxidation) cyclohexanones (reduction) and conformations of heterocycles. | | |
| Total Periods | | | 75 |

| 20P1CH02 | CORE PAPER II: Transition metal and Nuclear Chemistry | | | 5 | | | 05 | 25 | 75 | 100 |
| Course Objectives | 1. To gain knowledge on physical and chemical properties of transition and inner transition elements. 2. To give elaborate insight into the field of nuclear chemistry. | | | | | | | | | |
| POs | PROGRAMME OUTCOME | | | | | | | | | |
| PO 1 | Capable of demonstrating comprehensive knowledge and understanding of one or more disciplines that form a part of an undergraduate programme of study. | | | | | | | | | |
| PO 2 | Ability to express thoughts and ideas effectively in writing and orally Communicate with others using appropriate media confidently share ones views and express herself /himself. | | | | | | | | | |
| PO 3 | Capability to apply analytic thought to a body of knowledge analyse and evaluate evidence arguments claims beliefs on the basis of empirical evidence identify relevant assumptions or implications | | | | | | | | | |
| PO 4 | Capacity to extrapolate from what one has learned and apply their competencies to solve different kinds of non familiar problems rather than replicate curriculum content knowledge and apply ones learning to real life situations | | | | | | | | | |
| PO 5 | Ability to evaluate the reliability and relevance of evidence identify logical flaws and holes in the arguments of others analyse and synthesise data from a variety of sources draw valid Conclusions. | | | | | | | | | |
| PO 6 | A sense of inquiry and capability for asking relevant appropriate questions problematising synthesising and articulating ability to recognise cause and effect relationships define problems formulate hypotheses. | | | | | | | | | |
| PO 7 | Ability to work effectively and respectfully with diverse teams facilitate cooperative or coordinated effort on the part of a group and act together as a group in the interests of work efficiently as a member of a team. | | | | | | | | | |
| PO 8 | Ability to analyse interpret and draw conclusions from quantitative qualitative data and critically evaluate ideas, evidence and experiences from an open minded and reasoned perspective. | | | | | | | | | |
| PO 9 | Critical sensibility to lived experiences with self awareness and reflexivity of both self and society. | | | | | | | | | |
| PO 10 | Capability to use ICT in a variety of learning situations demonstrate ability to access evaluate and use a variety of relevant information sources and use appropriate software for analysis of data. | | | | | | | | | |
| PO 11 | Ability to work independently, identify appropriate resources required for a project and manage a project through to completion. | | | | | | | | | |
| PO 12 | Possess knowledge of the values and beliefs of multiple cultures and a global perspective. | | | | | | | | | |
| PO 13 | Ability to embrace moral ethical values in conducting one's life formulate a position argument about an ethical issue from multiple perspectives and use ethical practices in all work. | | | | | | | | | |
| PO 14 | Capability for mapping out the tasks of a team or an organization and setting direction formulating an inspiring vision building a team who can help achieve the vision motivating. | | | | | | | | | |
| PO 15 | Ability to acquire knowledge and skills including learning how to learn that are necessary for participating in learning activities throughout life through self paced. | | | | | | | | | |

| COs | COURSE OUTCOME |
|----------------|---|
| CO 1 | Students will learn the metallurgy and general properties of transition, and inner transition elements. |
| CO 2 | Students can explore constructive application of nuclear chemistry. |
| CO 3 | Students will know the present national and international status in nuclear mission. |
| CO 4 | Students will analyze the various nuclear decay process. |
| CO 5 | Students will evaluate the present methodologies in nuclear waste treatment. |
| Pre-requisites | |

| 1. Course End Delivery | |

| Content of the Syllabus | | | |
|-------------------------|---|---------|----|
| Unit - I | Transition Elements | Periods | 15 |
| | Position in the periodic table - Electronic configuration - General characteristics - Atomic radii - Ionic radii - Variation along the period and group - Variable valency - Colour - Magnetic properties - Catalytic property - Non-stoichiometry - Stabilization of unusual oxidation states - Structure (only) of d-block complexes - $[\text{Nb}_6\text{Cl}_{12}]^{2+}$ - $[\text{Re}_2\text{Cl}_8]^{2-}$ - $[\text{Mo}_6\text{Br}_8]^{4+}$ - $[\text{Ni}_2(\text{DMG})_2]$. | | |
| Unit - II | Inner Transition Elements | Periods | 15 |
| | Position in the periodic table - Electronic configuration - Oxidation state - Solubility - Magnetic properties - Colour and Spectra - Separation of lanthanides - Lanthanide contraction - Cause and consequences - Gadolinium break - Shift reagents - Extraction of Thorium and Uranium - Comparison of lanthanides and actinides- applications of lanthanides and actinides. | | |
| Unit - III | Fundamentals of Nuclear Chemistry | Periods | 15 |
| | Nuclear structure-mass and charge - Nuclear moments -Nuclear models (shell model and liquid drop model) - Binding energy - Stability rules - Magic numbers - n/p ratio - Nuclear forces - Modes of radioactive decay - Alpha decay - range - Ionizing power - Energy spectrum - Geiger-Nutta's rule, Theories of alpha decay - Tunnel effect - Beta decay - β^+ and β^- decay - Electron capture - Absorption - Range and Energy - Gamma ray - radioactive de-excitation - decay constant - Nuclear isomerism - Internal conversion - Auger effect. | | |
| Unit - IV | Nuclear Reactions and Instrumental Techniques | Periods | 15 |

| | | | |
|----------------------|--|---------|----|
| | Bethe's notation - Q value - Reaction cross section - Threshold energy - Columbic barrier - Excitation function - Various types of nuclear reactions - Scattering - evaporation - photonuclear - Spallation - Fragmentation - Fission - Fusion - Stripping - Pick-up reactions - Detection and measurement of radioactivity - Proportional counter - Geiger-Muller counter - Scintillation counter - Semiconductor detector - Cloud chamber - Charged particle accelerator - Linear accelerator - Cyclotron - Beatron - Synchrotron. | | |
| Unit - V | Nuclear Energy and Trace Elements | Periods | 15 |
| | Nuclear fission and Nuclear reactors - Characteristics of fission reactions - Product distribution of fission, Theories of fission - Fissile and fertile isotopes - Nuclear fusion and stellar energy - Fusion bomb - synthetic elements - Nuclear wastes - nuclear reprocessing - radiation hazards and prevention. Applications of radioactive isotopes - neutron activation analysis - isotopic dilution analysis - Uses of tracers in structural and mechanistic studies, agriculture, medicine and industry - Radio carbon dating - hot atom chemistry - Atomic Power Projects in India- nuclear holocaust. | | |
| Total Periods | | | 75 |

| Content of the Syllabus | | | |
|-------------------------|--|---------|----|
| Unit - I | Basics of Group Theory | Periods | 15 |
| | Principles of group theory - Symmetry elements and Symmetry operations. Properties of group - Abelian, non Abelian, sub groups and cyclic groups. Group multiplication tables, Classes and similarity transformation. Molecular point groups – Determination of point group of molecules. Representation of groups - Matrix representation of symmetry elements, Reducible and irreducible representations. Properties of irreducible representation - Great orthogonality theorem and its consequences - Construction of character table for point groups (C_{2v} , C_{3v} and C_{2h}). | | |
| Unit - II | Applications of Group Theory | Periods | 15 |
| | Standard reduction formula and conversion of reducible representation and irreducible representation, direct product representation. Hybridization schemes for atoms in molecules of different geometry - AB_4 tetrahedral and AB_3 triangular planar. Symmetries of vibrational modes in non linear molecules (H_2O , NH_3 and BF_3). Selection rules for vibrational spectroscopy – IR & Raman active, mutual exclusion rule and electronic transitions in formaldehyde. Symmetry in crystals - Hermann - Mauguin symbols- . Space groups of crystals -Translational elements of symmetry – Comparison of crystal symmetry with molecular symmetry | | |
| Unit - III | Chemical Kinetics | Periods | 15 |
| | Reactions in solution: Comparison between gas phase and liquid phase reactions. Effect of dielectric constant on reactions in solutions, effect of ionic strength on reactions in solutions - Primary salt effect. Influence of pressure on rates of reactions in solution - significance of volume and entropy of activations. Study of fast reactions: Flow methods, pulse methods and relaxation methods. Chain reactions – Stationary, non stationary chain and explosion, Explosive reaction of H_2O_2 . Linear free energy relation - Hammett and Taft equation. | | |
| Unit - IV | Kinetics and Catalysis | Periods | 15 |

| | | | |
|----------------------|---|---------|-----------|
| | Acid-base catalysis – Types and mechanism. Hammett and Bronsted equation, Acidity function – Hammett-Debye acidity function, Hammett-Zucker hypothesis – Catalysis in biological systems. Enzyme catalysis - Michaelis-Menten equation. Factors affecting enzyme catalyzed reaction: substrate concentration, pH and temperature. Inhibition of enzyme catalyzed reaction. | | |
| Unit - V | Surface Chemistry | Periods | 15 |
| | Adsorption - Types of adsorption. Physical Adsorption isotherm: Freundlich's adsorption isotherm, Langmuir's adsorption isotherm, Brunauer-Emmett-Teller (BET) adsorption isotherm and its limitations. Heat of adsorption - Estimation of surface areas – B.E.T method, Point B method and radioactive tracer methods. Chemisorption: kinetics of chemisorption, surface reactions and their mechanisms. Difference between physical and chemical adsorptions. | | |
| Total Periods | | | 75 |

| 20P2CH04 | CORE PAPER IV: Organic Reaction Mechanism | | 5 | | | 05 | 25 | 75 | 100 |
| Course Objectives | 1. To enrich the students knowledge in the field of reactions and reagents involved organic chemistry. 2. To impart knowledge in understanding the reaction conditions and mechanisms to arrive required product. | | | | | | | | |
| POs | PROGRAMME OUTCOME | | | | | | | | |
| PO 1 | Capable of demonstrating comprehensive knowledge and understanding of one or more disciplines that form a part of an undergraduate programme of study. | | | | | | | | |
| PO 2 | Ability to express thoughts and ideas effectively in writing and orally Communicate with others using appropriate media confidently share ones views and express herself /himself. | | | | | | | | |
| PO 3 | Capability to apply analytic thought to a body of knowledge analyse and evaluate evidence arguments claims beliefs on the basis of empirical evidence identify relevant assumptions or implications | | | | | | | | |
| PO 4 | Capacity to extrapolate from what one has learned and apply their competencies to solve different kinds of non familiar problems rather than replicate curriculum content knowledge and apply ones learning to real life situations | | | | | | | | |
| PO 5 | Ability to evaluate the reliability and relevance of evidence identify logical flaws and holes in the arguments of others analyse and synthesise data from a variety of sources draw valid Conclusions. | | | | | | | | |
| PO 6 | A sense of inquiry and capability for asking relevant appropriate questions problematising synthesising and articulating ability to recognise cause and effect relationships define problems formulate hypotheses. | | | | | | | | |
| PO 7 | Ability to work effectively and respectfully with diverse teams facilitate cooperative or coordinated effort on the part of a group and act together as a group in the interests of work efficiently as a member of a team. | | | | | | | | |
| PO 8 | Ability to analyse interpret and draw conclusions from quantitative qualitative data and critically evaluate ideas, evidence and experiences from an open minded and reasoned perspective. | | | | | | | | |
| PO 9 | Critical sensibility to lived experiences with self awareness and reflexivity of both self and society. | | | | | | | | |
| PO 10 | Capability to use ICT in a variety of learning situations demonstrate ability to access evaluate and use a variety of relevant information sources and use appropriate software for analysis of data. | | | | | | | | |
| PO 11 | Ability to work independently, identify appropriate resources required for a project and manage a project through to completion. | | | | | | | | |
| PO 12 | Possess knowledge of the values and beliefs of multiple cultures and a global perspective. | | | | | | | | |
| PO 13 | Ability to embrace moral ethical values in conducting one's life formulate a position argument about an ethical issue from multiple perspectives and use ethical practices in all work. | | | | | | | | |
| PO 14 | Capability for mapping out the tasks of a team or an organization and setting direction formulating an inspiring vision building a team who can help achieve the vision motivating. | | | | | | | | |
| PO 15 | Ability to acquire knowledge and skills including learning how to learn that are necessary for participating in learning activities throughout life through self paced. | | | | | | | | |

| COs | COURSE OUTCOME |
|----------------|---|
| CO 1 | Students will learn the addition reactions taking place in the organic molecules. |
| CO 2 | Students acquire deep knowledge on elimination reactions. |
| CO 3 | Students can understand the path of different molecular rearrangements. |
| CO 4 | Students will learn about the mechanism and applications of various naming reactions used in organic synthesis. |
| CO 5 | Students will evaluate the role of reagents in organic synthesis. |
| Pre-requisites | |

| Direct | |
| 1. Continuous Assessment Test I, II & Model 2. Assignment 3. End Semester Examinations | |
| Indirect | |
| 1. Course End Delivery | |

| Content of the Syllabus | | | |
|-------------------------|---|---------|----|
| Unit - I | Addition reactions | Periods | 15 |
| | Addition across C-C multiple bonds – Electrophillic, Nucleophilic, Free radicals, orientation and reactivity – Addition of halogen and nitrosyl chloride to olefin. Hydration of olefins and acetylenes. Epoxidation, Hydroboration, Hydroxylation, Michael addition and Birch reduction. Diels Alder reaction, 1,3-dipolar additions. Carbenes, Nitrenes and their addition to double bond. Simmon-Smith reaction, Mannich, Stobbe, Darzen, Wittig, Wittig-Horner, Grignard, Thope and Benzoin condensation. | | |
| Unit - II | Elimination reactions | Periods | 15 |
| | Elimination reactions – Mechanism of E1, E2 and E1CB – stereochemistry of elimination, Hofmann and Saytzeff rules – competition between Elimination and substitution – Pyrolytic – Cis elimination, Chugaev reaction – Typical reactions such as Dehydration, dehydrohalogenation, Hofmann degradation, Cope elimination – Bredt's rule. | | |
| Unit - III | Molecular rearrangements | Periods | 15 |
| | A detailed study of the mechanism of the following rearrangements. Wagner – Meerwin, Demyanov, Dienone–Phenol, Favorski, Baeyer – Villiger, Wolff, Stevens, Von – Richter, Beckmann, Kornblum–DeLaMare, Smiles, Jacobsen, Neber, Fries, Ireland-Claisen, Hofmann–Martius rearrangements. | | |
| Unit - IV | Organic naming reactions and applications | Periods | 15 |
| | A detailed study of the following naming reactions - Biginelli reaction, Hoeben – Hoesch reaction, Vilsmeierformylation, Bucherer reaction, Pauson – Khand reaction, Heck reaction, Suzzuki, Stille, Sonogashira, Negishi, Cadiot–Chodkiewicz coupling reactions. Huigens synthesis. Baylis-Hillman, Luche, Yamaguchi. | | |
| Unit - V | Reagents for Organic synthesis | Periods | 15 |

| | |
|----------------------|---|
| | Aluminium chloride, Aluminium isopropoxide, N-Bromosuccinimide, OsO ₄ , DCC, N-Chlorosuccinimide, Diazomethane, Fenton's reagent, Hydrogen peroxide, Lead tetraacetate, Lithium aluminium hydride, Perbenzoic acid, Periodic acid, Selenium dioxide, Sodium borohydride, NaCNBH ₃ , DDQ, Wilkinson catalyst, Wolff Kishner reagent, Wittig reagent. |
| Total Periods | |
| | 75 |

| Course Objectives | 1. To impart the knowledge on types of bonding in simple and complex molecules. 2. To understand the concept of HOMO and LUMO, and their influence in bond formation. | | | | | | | | | |
| POs | PROGRAMME OUTCOME | | | | | | | | | |
| PO 1 | Capable of demonstrating comprehensive knowledge and understanding of one or more disciplines that form a part of an undergraduate programme of study. | | | | | | | | | |
| PO 2 | Ability to express thoughts and ideas effectively in writing and orally Communicate with others using appropriate media confidently share ones views and express herself /himself. | | | | | | | | | |
| PO 3 | Capability to apply analytic thought to a body of knowledge analyse and evaluate evidence arguments claims beliefs on the basis of empirical evidence identify relevant assumptions or implications | | | | | | | | | |
| PO 4 | Capacity to extrapolate from what one has learned and apply their competencies to solve different kinds of non familiar problems rather than replicate curriculum content knowledge and apply ones learning to real life situations | | | | | | | | | |
| PO 5 | Ability to evaluate the reliability and relevance of evidence identify logical flaws and holes in the arguments of others analyse and synthesise data from a variety of sources draw valid Conclusions. | | | | | | | | | |
| PO 6 | A sense of inquiry and capability for asking relevant appropriate questions problematising synthesising and articulating ability to recognise cause and effect relationships define problems formulate hypotheses. | | | | | | | | | |
| PO 7 | Ability to work effectively and respectfully with diverse teams facilitate cooperative or coordinated effort on the part of a group and act together as a group in the interests of work efficiently as a member of a team. | | | | | | | | | |
| PO 8 | Ability to analyse interpret and draw conclusions from quantitative qualitative data and critically evaluate ideas, evidence and experiences from an open minded and reasoned perspective. | | | | | | | | | |
| PO 9 | Critical sensibility to lived experiences with self awareness and reflexivity of both self and society. | | | | | | | | | |
| PO 10 | Capability to use ICT in a variety of learning situations demonstrate ability to access evaluate and use a variety of relevant information sources and use appropriate software for analysis of data. | | | | | | | | | |
| PO 11 | Ability to work independently, identify appropriate resources required for a project and manage a project through to completion. | | | | | | | | | |
| PO 12 | Possess knowledge of the values and beliefs of multiple cultures and a global perspective. | | | | | | | | | |
| PO 13 | Ability to embrace moral ethical values in conducting one's life formulate a position argument about an ethical issue from multiple perspectives and use ethical practices in all work. | | | | | | | | | |
| PO 14 | Capability for mapping out the tasks of a team or an organization and setting direction formulating an inspiring vision building a team who can help achieve the vision motivating. | | | | | | | | | |
| PO 15 | Ability to acquire knowledge and skills including learning how to learn that are necessary for participating in learning activities throughout life through self paced. | | | | | | | | | |

| COs | COURSE OUTCOME |
|----------------|--|
| CO 1 | Students will acquire sound knowledge on bonding in inorganic molecules. |
| CO 2 | Students will learn the theories, mechanism of complex formation and the electronic spectra of coordination complexes. |
| CO 3 | Students will acquire knowledge about term symbols and its applications. |
| CO 4 | Students will analyze the bioinorganic molecules in coordination chemistry. |
| CO 5 | Students will evaluate the various coordination theories. |
| Pre-requisites | |

| Course Assessment Methods | |
|---------------------------|--|
| Direct | 1. Continuous Assessment Test I, II & Model 2. Assignment 3. End Semester Examinations |
| Indirect | 1. Course End Delivery |

| Content of the Syllabus | | | |
|-------------------------|---|---------|----|
| Unit - I | Ionic Bonding | Periods | 15 |
| | Ionic bonding - Lattice energy - Born equation-Born-Haber cycle - Radius ratio rule - Born Mayer equation - Kapustinskii modification - energetics of the dissolution of ionic compounds in polar solvents - polarization-Fajan s rule - results of polarization. Electronegativity – determination -Types of chemical forces - effects of chemical forces - melting and boiling points, solubility. | | |
| Unit - II | Covalent Bonding and Molecular Structure | Periods | 15 |
| | Covalent bonding Formal charges-Limitations of octet rule- Hybridization and geometry-VSEPR model of methane, ammonia, water, silicon tetrafluoride, AX ₂ and AX ₄ type, and some xenon compounds, Bent's rule - Failures of VBT-MO theory LCAO method-Molecular orbitals in homo nuclear diatomic molecules of oxygen, beryllium, nitrogen and carbon, hetero nuclear diatomic molecules such as HCl, NO and CO-HOMO and LUMO concepts in bonding. | | |
| Unit - III | Coordination Theories | Periods | 15 |
| | CFT-Splitting pattern of d-orbital in various environments of ligands octahedral, tetrahedral, square - planar-CFSE-Factors affecting the magnitude of CFSE-Weak and strong fields-Pairing energy-Jahn Teller distortion - Nephlauxetic effect-Limitations of CFT-LFT-Evidence for covalent nature of metal-ligand bonds-pi-bonding theory-Construction of MO diagram for sigma and pi Oh complexes. | | |
| Unit - IV | Reaction Mechanism in Coordination Complexes | Periods | 15 |
| | Stability of complexes, Thermodynamic and kinetic stability-stability constants-Substitution reactions-General mechanism-Schemes of octahedral, tetrahedral and square planar complexes-Trans effect-Theories of trans effect-pi-bonding theory and polarisation theory - Applications of trans effect-Catalysis by transition metal complexes, Hydrogenation of alkene-Wilkinson's catalyst, Hydroformylation - Oxo process, Wacker process and Ziegler-Natta catalysis. | | |

| | | | |
|----------------------|---|---------|----|
| Unit - V | Electronic Spectra and Organometallics | Periods | 15 |
| | Spectroscopic term symbols for dn ions-derivation of term symbols and ground state term symbols-Energy level diagrams. Electronic spectra of complexes-Orgel diagram - interpretation of electronic spectra of d1 to d9-Tanabe-Sugano diagrams-charge transfer spectra-Carbonyls Binuclear and tri nuclear carbonyls of iron - preparation, properties, uses - Nature of M-CO bond in carbonyls - Nitrosyls-Nature of M-NO bonding - Metallocenes Ferrocene, Cobaltocene-Preparation, Properties and structure. | | |
| Total Periods | | | 75 |

| 1. Course End Delivery | |

| Content of the Syllabus | | | |
|-------------------------|---|---------|----|
| Unit - I | Qualitative analysis of binary mixture of organic compounds : | Periods | 30 |
| | Preliminary pilot analysis, pilot report, bulk separation, systematic analysis of each component inclusive of preliminary identification, confirmatory tests, derivative preparation and recording melting point/boiling point of components. | | |
| Unit - II | Single stage preparations | Periods | 45 |
| | Single stage preparation of organic compounds involving synthetic methods like oxidation, acylation, nitration, sulphonation, Bromination, Esterification, hydrolysis and condensation (six preparations). | | |
| Total Periods | | | 75 |

| 20P2CHP02 | CORE PRACTICAL II: Inorganic Chemistry Practical-I | | | | | 5 | 04 | 40 | 60 | 100 |
| Course Objectives | 1. To acquire training in microscale experimental techniques. 2. To acquire knowledge on the properties of ions and their compounds. 3. To promote the students towards research activity and job opportunities | | | | | | | | | |
| POs | PROGRAMME OUTCOME | | | | | | | | | |
| PO 1 | Capable of demonstrating comprehensive knowledge and understanding of one or more disciplines that form a part of an undergraduate programme of study. | | | | | | | | | |
| PO 2 | Ability to express thoughts and ideas effectively in writing and orally Communicate with others using appropriate media confidently share ones views and express herself /himself. | | | | | | | | | |
| PO 3 | Capability to apply analytic thought to a body of knowledge analyse and evaluate evidence arguments claims beliefs on the basis of empirical evidence identify relevant assumptions or implications | | | | | | | | | |
| PO 4 | Capacity to extrapolate from what one has learned and apply their competencies to solve different kinds of non familiar problems rather than replicate curriculum content knowledge and apply ones learning to real life situations | | | | | | | | | |
| PO 5 | Ability to evaluate the reliability and relevance of evidence identify logical flaws and holes in the arguments of others analyse and synthesise data from a variety of sources draw valid Conclusions. | | | | | | | | | |
| PO 6 | A sense of inquiry and capability for asking relevant appropriate questions problematising synthesising and articulating ability to recognise cause and effect relationships define problems formulate hypotheses. | | | | | | | | | |
| PO 7 | Ability to work effectively and respectfully with diverse teams facilitate cooperative or coordinated effort on the part of a group and act together as a group in the interests of work efficiently as a member of a team. | | | | | | | | | |
| PO 8 | Ability to analyse interpret and draw conclusions from quantitative qualitative data and critically evaluate ideas, evidence and experiences from an open minded and reasoned perspective. | | | | | | | | | |
| PO 9 | Critical sensibility to lived experiences with self awareness and reflexivity of both self and society. | | | | | | | | | |
| PO 10 | Capability to use ICT in a variety of learning situations demonstrate ability to access evaluate and use a variety of relevant information sources and use appropriate software for analysis of data. | | | | | | | | | |
| PO 11 | Ability to work independently, identify appropriate resources required for a project and manage a project through to completion. | | | | | | | | | |
| PO 12 | Possess knowledge of the values and beliefs of multiple cultures and a global perspective. | | | | | | | | | |
| PO 13 | Ability to embrace moral ethical values in conducting one's life formulate a position argument about an ethical issue from multiple perspectives and use ethical practices in all work. | | | | | | | | | |
| PO 14 | Capability for mapping out the tasks of a team or an organization and setting direction formulating an inspiring vision building a team who can help achieve the vision motivating. | | | | | | | | | |
| PO 15 | Ability to acquire knowledge and skills including learning how to learn that are necessary for participating in learning activities throughout life through self paced. | | | | | | | | | |

| COs | COURSE OUTCOME |
|----------------|---|
| CO 1 | Students will learn how to conduct a process systematically and precisely. |
| CO 2 | The qualitative analysis gives a type of mental training and develops a power of reasoning not equal to any other course in chemistry. |
| CO 3 | The students will learn the nature, significance, and influence of errors and how they may best be avoided or minimized during qualitative and quantitative examination of a chemical compound. |
| CO 4 | Students will analyze the use of complexometric titrations in water analysis |
| CO 5 | Students will evaluate the rare cations using qualitative analysis. |
| Pre-requisites | |

| Content of the Syllabus | | | |
|-------------------------|--|---------|-----------|
| Unit - I | Introduction to Nanoscience | Periods | 15 |
| | Introduction - history - nanoscale & nanotechnology - nanotech Generation - nanoscience - nanocomposites - zero dimensional nanomaterials - one dimensional nanomaterial - two dimensional materials - three dimensional nanomaterials. Indian and global scenario in nanotechnology. | | |
| Unit - II | Synthesis of Nanomaterials | Periods | 15 |
| | Physical methods - Physical Vapour Deposition (PVD). Chemical methods- Thermolysis-sonochemical approach, CVD, Electrodeposition. Precipitation methods- Thermal decomposition of complex precursors, Reduction method, sol-gel, Hydrothermal, Solvothermal method. | | |
| Unit - III | Characterizations of nanomaterials | Periods | 15 |
| | X-ray Diffraction (XRD), Thermal gravimetric analysis (TGA), Differential Scanning Calorimetry (DSC), UV spectroscopy, Photo Electron Spectroscopy (XPS). Electron Microscopy: Scanning Electron Microscopy (SEM), Transmission Electron Microscopy (TEM). Morphological: SAED analysis, Atomic Force Microscopy (AFM). | | |
| Unit - IV | Properties and Applications of Nanoarticles | Periods | 15 |
| | Size dependence of Properties - Chemical Reactivity – Solubility - Melting point - Electronic energy levels - Bohr radius. Optical properties - surface plasmon resonance, Quantum size effects. Magnetic properties - size dependent properties such as coercivity and saturation magnetization. Applications: Medicine, Nanoelectronics, batteries, environmental protection, food and agriculture, energy, nanomaterial based products. Risks of nanomaterials. | | |
| Unit - V | Nano biomaterials | Periods | 15 |
| | Introduction: Biological building blocks - size of building blocks and nanostructures - protein nanoparticles. Nucleic Acids - DNA Double Nanowire, Genetic code and protein synthesis - Biological nanostructures - Multilayer films. Biopolymers, Biomaterials. | | |
| Total Periods | | | 75 |

| Course Code | Course Name | | | Periods per Week | | | Credit | Maximum Marks | | |
| | | | | L | T | P | C | CA | ESE | Total |
| 20P1CHE02 | Elective: Instrumental Methods of Analysis | | | 4 | | | 04 | 25 | 75 | 100 |
| Course Objectives | 1. To enable the students to handling of instruments. Acquire the fundamentals and principles of spectroscopic techniques. Enhance the knowledge in thermo and electro analytical methods. | | | | | | | | | |
| POs | PROGRAMME OUTCOME | | | | | | | | | |
| PO 1 | Capable of demonstrating comprehensive knowledge and understanding of one or more disciplines that form a part of an undergraduate programme of study. | | | | | | | | | |
| PO 2 | Ability to express thoughts and ideas effectively in writing and orally Communicate with others using appropriate media confidently share ones views and express herself /himself. | | | | | | | | | |
| PO 3 | Capability to apply analytic thought to a body of knowledge analyse and evaluate evidence arguments claims beliefs on the basis of empirical evidence identify relevant assumptions or implications | | | | | | | | | |
| PO 4 | Capacity to extrapolate from what one has learned and apply their competencies to solve different kinds of non familiar problems rather than replicate curriculum content knowledge and apply ones learning to real life situations | | | | | | | | | |
| PO 5 | Ability to evaluate the reliability and relevance of evidence identify logical flaws and holes in the arguments of others analyse and synthesise data from a variety of sources draw valid Conclusions. | | | | | | | | | |
| PO 6 | A sense of inquiry and capability for asking relevant appropriate questions problematising synthesising and articulating ability to recognise cause and effect relationships define problems formulate hypotheses. | | | | | | | | | |
| PO 7 | Ability to work effectively and respectfully with diverse teams facilitate cooperative or coordinated effort on the part of a group and act together as a group in the interests of work efficiently as a member of a team. | | | | | | | | | |
| PO 8 | Ability to analyse interpret and draw conclusions from quantitative qualitative data and critically evaluate ideas, evidence and experiences from an open minded and reasoned perspective. | | | | | | | | | |
| PO 9 | Critical sensibility to lived experiences with self awareness and reflexivity of both self and society. | | | | | | | | | |
| PO 10 | Capability to use ICT in a variety of learning situations demonstrate ability to access evaluate and use a variety of relevant information sources and use appropriate software for analysis of data. | | | | | | | | | |
| PO 11 | Ability to work independently, identify appropriate resources required for a project and manage a project through to completion. | | | | | | | | | |
| PO 12 | Possess knowledge of the values and beliefs of multiple cultures and a global perspective. | | | | | | | | | |
| PO 13 | Ability to embrace moral ethical values in conducting one's life formulate a position argument about an ethical issue from multiple perspectives and use ethical practices in all work. | | | | | | | | | |
| PO 14 | Capability for mapping out the tasks of a team or an organization and setting direction formulating an inspiring vision building a team who can help achieve the vision motivating. | | | | | | | | | |
| PO 15 | Ability to acquire knowledge and skills including learning how to learn that are necessary for participating in learning activities throughout life through self paced. | | | | | | | | | |

| COs | COURSE OUTCOME |
|----------------|--|
| CO 1 | Students will understand the fundamentals of molecular spectroscopy. |
| CO 2 | Students will learn about the concepts of electronic spectroscopy. |
| CO 3 | Students will apply their knowledge in absorption and emission spectroscopy. |
| CO 4 | Students will analyze the various electro analytical methods. |
| CO 5 | Students can evaluate the thermal stability of various materials using TGA. |
| Pre-requisites | |

| Content of the Syllabus | | | |
|-------------------------|---|---------|----|
| Unit - I | Fundamentals of spectroscopy | Periods | 15 |
| | Electromagnetic spectrum: Electromagnetic radiation - properties, wave parameters - interaction of light with matter - types of spectroscopy: Atomic & Molecular spectroscopy -Absorption and Emission spectra. | | |
| Unit - II | UV And IR spectroscopic techniques | Periods | 15 |
| | UV-Visible spectroscopy - Principle, instrumentation - photocolormeter and spectrophotometer. Infrared spectroscopy - principle, instrumentation - source - monochromator - cell - sampling techniques – detector and recorders. | | |
| Unit - III | Atomic absorption and emission spectroscopic techniques | Periods | 15 |
| | Flame Spectroscopy, Atomic Absorption Spectroscopy (AAS): Principle, theory, instrumentation and application. Luminescence Spectroscopy, Fluorescence Spectroscopy: Principle, theory, instrumentation and application. | | |
| Unit - IV | Electro analytical methods | Periods | 15 |
| | Polarography - principle - concentration polarization- dropping mercury electrode- advantage and disadvantage - convection, migration and diffusion currents - Ilkovic equation(derivation not needed) and its significance - Amperometry - principle and uses. | | |
| Unit - V | Thermo analytical methods | Periods | 15 |
| | Principles and instrumentation thermo gravimetric analysis and differential gravimetric analysis - characteristics and curves - factors affecting TGA and DTA curves- calcium oxalate monohydrate and silver nitrate- thermometric titrations-principle and applications. | | |
| Total Periods | | | 75 |

| Indirect | |
| 1. Course End Delivery | |

| Content of the Syllabus | | | |
|-------------------------|--|---------|----|
| Unit - I | Electro chemistry - I | Periods | 15 |
| | Introduction to electrochemical cells-Types-Chemical cells with and without transferences-Concentration cells- types- electrode concentration cells-electrolytic concentration cells - with and without transferences - liquid junction - salt bridge - derivation- Electrical double layer, theories of double layer -Electrokinetic phenomena: Electroosmosis – electrophoresis - Diffusion, Streaming and Sedimentation potentials - electro-capillary phenomena, electro-capillary curve–electrochromism- electrochemical noise. | | |
| Unit - II | Electro chemistry - II | Periods | 15 |
| | Debye - Huckel theory of inter-ionic attraction, ionic atmosphere, time of relaxation, relaxation and - phoretic effects, Derivation of Debye-Huckel-Onsagar equation and its validity for dilute solutions at appreciably concentrated solutions. Debye-Falkenhagen and Wein effects. Mean ionic activity coefficients and their determination. Debye – Huckel Bronsted equations - Derivation of Debye-Huckel limiting law, Quantitative and qualitative verification, ion association and Bjerrum theory. | | |
| Unit - III | Photochemistry | Periods | 15 |
| | Absorption of light and nature of electronic spectra, electronic transition, Frank-Condon principle, selection rules, photodissociation, predissociation, photochemical reactions: photoreduction, photo-oxidation, photodimerization, photochemical substitution, photoisomerization – transition metal complexes - photochemistry of environment: Green house effect. Photo physical phenomena: Electronic structure of molecules, molecular orbital, electronically excited singlet states, designation based on multiplicity rule, life time of electronically excited state, construction of Jablonski diagram. Stern-Volmer equation, critical energy transfer distances, energy transfer efficiency, examples and analytical significance, bimolecular collisional quenching. | | |
| Unit - IV | Organic Photochemistry | Periods | 15 |

| | | | |
|----------------------|--|---------|----|
| | Fundamental concepts - Photooxidation reaction (Formation of Peroxy compounds) – Photoreduction of ketones and enones, Norrish type I and II reactions-Photochemistry of Alkenes, Dienes and Aromatic compounds - Photoisomerisation – Cis and Trans isomerization - Photoaddition reaction-Paterno-Buchirreaction-Barton reaction Photo–Fries rearrangement and photorearrangement of 2,5-Cyclohexadienones. | | |
| Unit - V | Applied Photochemistry | Periods | 15 |
| | Photochemistry reaction in the atmosphere - oxygen and ozone - nitrogen oxide - chlorofluoro carbons - organic compounds - chemistry of vision – photography - photosensitisers-ultraviolet screening agents - optical bleach – photochromism - photoimaging - photochemistry of polymers - Photo polymerization: imaging, curing - photodegradation and photostabilization–photosynthesis - photochemistry of excited redox reactions- solar energy conversion and storage. | | |
| Total Periods | | | 75 |

| Course Objectives | To enable the students to identify the organic compounds. Acquire the fundamentals and principles of spectroscopic techniques. Enhance the knowledge in mass, NMR, IR spectroscopy. | | | | | | | | | |
| POs | PROGRAMME OUTCOME | | | | | | | | | |
| PO 1 | Capable of demonstrating comprehensive knowledge and understanding of one or more disciplines that form a part of an undergraduate programme of study. | | | | | | | | | |
| PO 2 | Ability to express thoughts and ideas effectively in writing and orally Communicate with others using appropriate media confidently share ones views and express herself /himself. | | | | | | | | | |
| PO 3 | Capability to apply analytic thought to a body of knowledge analyse and evaluate evidence arguments claims beliefs on the basis of empirical evidence identify relevant assumptions or implications | | | | | | | | | |
| PO 4 | Capacity to extrapolate from what one has learned and apply their competencies to solve different kinds of non familiar problems rather than replicate curriculum content knowledge and apply ones learning to real life situations | | | | | | | | | |
| PO 5 | Ability to evaluate the reliability and relevance of evidence identify logical flaws and holes in the arguments of others analyse and synthesise data from a variety of sources draw valid Conclusions. | | | | | | | | | |
| PO 6 | A sense of inquiry and capability for asking relevant appropriate questions problematising synthesising and articulating ability to recognise cause and effect relationships define problems formulate hypotheses. | | | | | | | | | |
| PO 7 | Ability to work effectively and respectfully with diverse teams facilitate cooperative or coordinated effort on the part of a group and act together as a group in the interests of work efficiently as a member of a team. | | | | | | | | | |
| PO 8 | Ability to analyse interpret and draw conclusions from quantitative qualitative data and critically evaluate ideas, evidence and experiences from an open minded and reasoned perspective. | | | | | | | | | |
| PO 9 | Critical sensibility to lived experiences with self awareness and reflexivity of both self and society. | | | | | | | | | |
| PO 10 | Capability to use ICT in a variety of learning situations demonstrate ability to access evaluate and use a variety of relevant information sources and use appropriate software for analysis of data. | | | | | | | | | |
| PO 11 | Ability to work independently, identify appropriate resources required for a project and manage a project through to completion. | | | | | | | | | |
| PO 12 | Possess knowledge of the values and beliefs of multiple cultures and a global perspective. | | | | | | | | | |
| PO 13 | Ability to embrace moral ethical values in conducting one's life formulate a position argument about an ethical issue from multiple perspectives and use ethical practices in all work. | | | | | | | | | |
| PO 14 | Capability for mapping out the tasks of a team or an organization and setting direction formulating an inspiring vision building a team who can help achieve the vision motivating. | | | | | | | | | |
| PO 15 | Ability to acquire knowledge and skills including learning how to learn that are necessary for participating in learning activities throughout life through self paced. | | | | | | | | | |

| COs | COURSE OUTCOME |
|----------------|---|
| CO 1 | Students will understand the basic principles of UV visible spectroscopy. |
| CO 2 | Students will learn about the basic concepts of IR spectroscopy. |
| CO 3 | Students will apply their knowledge on interpretation of mass spectrum. |
| CO 4 | Students will analyze the chemical shift in molecules using NMR. |
| CO 5 | Students will evaluate the types of spectra. |
| Pre-requisites | |

| KNOWLEDGE LEVELS | | | | | | | | | | | | | | | |
|---|-------------------------|-----|-----|-----|-----|-------|-----|-----|-----|------|------|------|------|------|------|
| 1.Remembering, 2.Understanding, 3.Applying, 4.Analyzing, 5.Evaluating, 6.Synthesizing | | | | | | | | | | | | | | | |
| CO / PO / KL Mapping | | | | | | | | | | | | | | | |
| (3/2/1 indicates the strength of correlation, 3-strong, 2-medium, 1-weak) | | | | | | | | | | | | | | | |

| PSO1 | 2 | 2 | 3 | 2 | 1 |
| PSO2 | 1 | 1 | 2 | 3 | 2 |
| PSO3 | 2 | 2 | 1 | 1 | 1 |

| Course Assessment Methods | |
|--|--|
| Direct | |
| 1. Continuous Assessment Test I, II & Model 2. Assignment 3. End Semester Examinations | |
| Indirect | |
| 1. Course End Delivery | |

| Content of the Syllabus | | | |
|-------------------------|--|---------|-----------|
| Unit - I | UV Visible Spectroscopy | Periods | 15 |
| | Frank-condon principle, Types of electronic transitions, Chromophores & Auxochromes, absorption and intensity shifts, Factors influencing positions & intensity of absorption bands, Absorption spectra of dienes, polyenes & unsaturated carbonyl compounds, Woodward - Fieser rules. | | |
| Unit - II | IR Spectroscopy | Periods | 15 |
| | Vibrational frequencies & factors affecting them, identification of functional groups, Finger Print Region, Significance of Far IR region. | | |
| Unit - III | Mass Spectrometry | Periods | 15 |
| | Principle - EI, CI & FAB - Base peak, isotopic peaks, metastable peak, parent peak, Fragmentation - Nitrogen, even electron rule and pattern, McLafferty rearrangement, Retro – Diel's Alder reaction fragmentation pattern of hydrocarbons, alcohols, aldehydes and ketones. | | |
| Unit - IV | NMR Spectroscopy | Periods | 15 |
| | Basic principles of NMR experiments - CW & FT NMR - ¹ H NMR - Chemical Shift & Coupling constant - Factors influencing Proton Chemical Shift & Proton - Proton Coupling constant, AX & AB spin system - Spin decoupling - Nuclear Overhaust effect - Chemical exchange. ¹³ C NMR chemical shift & factor affecting ¹³ C Chemical shift. | | |
| Unit - V | Identification of organic compounds | Periods | 15 |
| | Identification of organic molecules using UV, IR, NMR and Mass spectroscopic techniques. | | |
| Total Periods | | | 75 |

DEPARTMENT OF CHEMISTRY

MODEL QUESTION PAPER

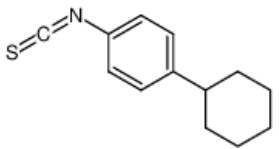

| Programme(s) | Title of the Paper | Semester |
|-----------------|---|----------|
| M.Sc. Chemistry | CONCEPTS OF ORGANIC CHEMISTRY AND STEREOCHEMISTRY | I |

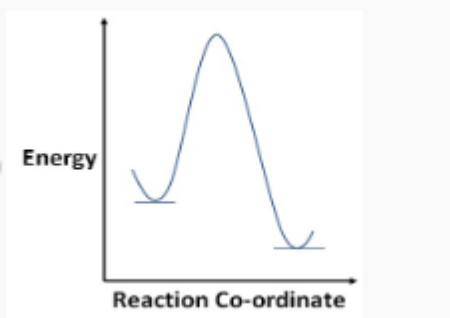

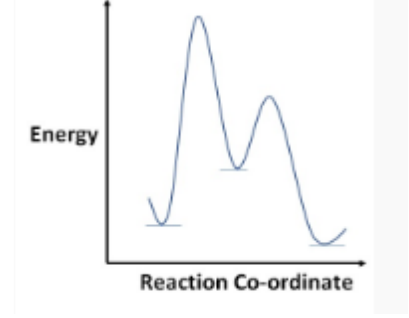

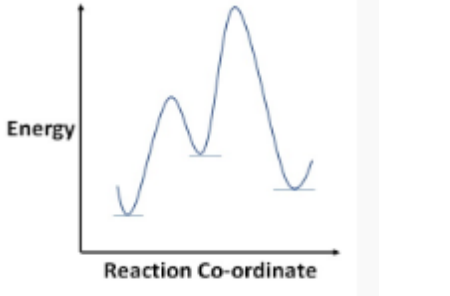

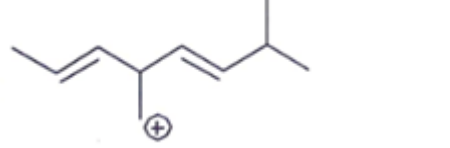

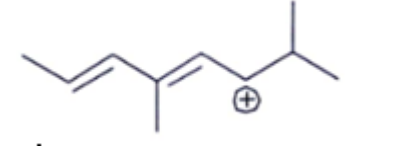

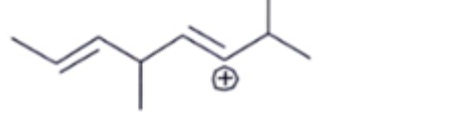

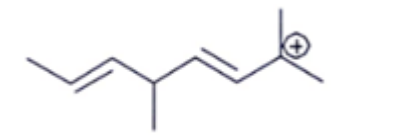

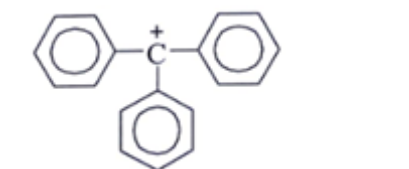

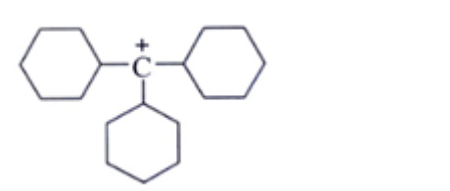

Time: 3 Hr.

Max.Marks : 75

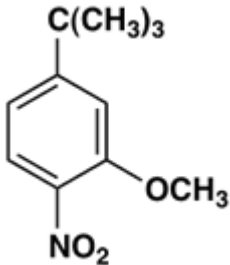

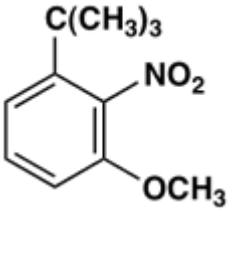

Section A

Answer all questions (20 x 1 = 10)

| | | | | |
|----|--|---|----|--|
| 1 | Predict the IUPAC name of the following compound. | | K1 | CO-1 |
| |  | | | |
| | A | 1-cyclohexyl-4-isothiocyanato-benzene | B | 1-cyclohexyl-4-thiocyanato-benzene |
| | C | 4-cyclohexyl-1-isothiocyanato-benzene | D | 4-cyclohexyl-1-thiocyanato-benzene |
| 2 | Which of the following statement about cinnoline is correct? | | K1 | CO-1 |
| | A | Heterocyclic containing N & S and antiaromatic | B | Heterocyclic containing N & S and aromatic |
| | C | Heterocyclic aromatic containing two N atoms | D | Alicyclic containing two nitrogen atoms |
| 3. | Sydnone are five-membered pseudo-aromatic heterocyclic molecule. | | K1 | CO-1 |
| | A | six-membered, pseudo-aromatic heterocyclic molecule | B | five-membered, pseudo-aromatic heterocyclic molecule |
| | C | six-membered, aromatic heterocyclic molecule | D | five-membered, aromatic heterocyclic molecule |
| 4 | An example of homoaromatic compound is | | | |
| | A | cycloheptatrienyl cation | B | tropylium cation |
| | C | cyclopropenyl cation | D | cyclooctatrienyl cation |

| | | | | | |
|---|---|---|--|------|--|
| 5 | Which of the following reaction coordinate diagram depicts the following reaction? $\text{PhCMe}_2\text{Cl} + \text{OH}^- \longrightarrow \text{PhCMe}_2\text{OH} + \text{Cl}^-$ | | K1 | CO-2 | |
| A |  | B |  | | |
| C |  | D | None of the above | | |
| 6 | Which carbocation is the most stable? | | K1 | CO-2 | |
| A |  | B |  | | |
| C |  | D |  | | |
| 7 | Which one among the following carbocations has the longest half-life? | | K1 | CO-2 | |
| A |  | B |  | | |
| C |  | D | $\text{H}_3\text{C}-\overset{+}{\text{C}}-\text{CH}_3$ CH_3 | | |
| 8 | Which of the following method can be used to determine the reaction mechanisms? | | K1 | CO-2 | |
| A | Intermediate trapping and cross experiments | B | Isotopic labelling | | |
| C | stereo chemical evidence | D | All of the above | | |

| | | | |
|----|---|--------------------------------------|------|
| 9 | Which of the following compound shows the correct decreasing order of solvolysis with aqueous ethanol? | K1 | CO-3 |
| | | | |
| | A III > II > I > IV | B III > II > IV > I | |
| | C II > III > IV > I | D III > I > IV > II | |
| 10 | Examples of ambient nucleophile and ambient substrate are, respectively | K1 | CO-3 |
| | A Thiocyanate ion and 1,3-dichlorobutane | B Nitrate ion and 1,3-dimethylbutane | |
| | C Thiocyanate ion and 1,3-dimethylbutane | D Nitrate ion and Thiocyanate ion | |
| 11 | The condition for aromatic nucleophilic aromatic substitution reaction is/are..... | K1 | CO-3 |
| | A electron-poor aromatics | B good nucleophiles | |
| | C good leaving group | D all of the above | |
| 12 | is a method for producing 2-aminopyridine derivatives by the reaction of pyridine with sodium amide | K1 | CO-3 |
| | A Gattermann reaction | B Chichibabin reaction | |
| | C Gattermann Koch reaction | D Reimer – Tiemann reaction | |
| 13 | Which is most reactive in electrophilic substitution? | K1 | CO-4 |
| | A | B | |
| | C | D | |
| 14 | Which is obtained as the main mononitration product upon reaction of <i>m-t</i> -butylanisole (1- <i>t</i> -butyl-3-methoxybenzene) with HNO ₃ -H ₂ SO ₄ ? | K1 | CO-4 |
| | A | B | |

| | | | | | | |
|---|--|---|----|---|------|--|
| | C |  | D |  | | |
| 15 | Which of the following statements regarding electrophilic aromatic substitution is wrong? | | K1 | CO-4 | | |
| | A | Acetyl and cyano substituents are both deactivating and <i>m</i> -directing. | B | Alkyl groups are activating and <i>o,p</i> -directing. | | |
| | C | Ammonio groups are <i>m</i> -directing but amino groups are <i>o,p</i> -directing. | D | Chloro and methoxy substituents are both deactivating and <i>o,p</i> -directing. | | |
| 16 | An example of Michael addition reaction is | | K1 | CO-4 | | |
| | A | Stork enamine reaction | B | Friedel craft acylation | | |
| | C | Ziegler alkylation | D | Chichibabin reaction | | |
| 17 | Which of the compounds below exists as only three stereoisomers? | | K1 | CO-5 | | |
| | A | 1,4-dibromobutane | B | 2,3-dibromobutane | | |
| | C | 2,3-dibromopentane | D | 1,1-dibromocyclopentane | | |
| 18 | Enantiomers are | | K1 | CO-5 | | |
| | A | mirror images and optically active | B | optically inactive compounds | | |
| | C | stereoisomers | D | both A & C | | |
| 19 | The reaction in which the starting materials differ only in their configuration are converted to stereoisomerically distinct products is called | | K1 | CO-5 | | |
| | A | regioselective | B | chemoselective | | |
| | C | stereospecific reaction | D | all of the above | | |
| 20 | Consider the reaction of trans-2-butene with Br ₂ in CH ₂ Cl ₂ . Which statement concerning this reaction is correct? | | K1 | CO-5 | | |
| | A | The product is optically inactive because it is a racemic mixture of enantiomers. | B | The product is optically inactive because it is meso | | |
| | C | The product is optically inactive because it does not possess any chirality centers. | D | The product is optically inactive because it is a racemic mixture of diastereomers. | | |
| Section B | | | | | | |
| Answer All questions (5 x 5 = 25) | | | | | | |
| 21 | A | Predict the aromatic, non-aromatic and anti aromatic nature in the following compounds. (i) cycloheptatriene (ii) cyclobutadiene (iii) cyclooctatetraene (iv) cyclopentadienyl anion (v) pyridine | | K2 | CO-1 | |

| | | | | |
|---|---|--|----|------|
| | | OR | | |
| | B | Explain Homoaromaticity and Anti aromaticity with examples | K2 | CO-1 |
| 22 | A | Give the order of stability of following carbocations and justify it. (i) tropylium ion (ii) Benzyl cation (iii) t-butyl carbocation (iv) Isopropyl carbocation (v) di-t- butyl carbocation | K2 | CO-2 |
| | | OR | | |
| | B | Explain the microscopic reversibility with example? | K2 | CO-2 |
| 23 | A | Explain S _N i Mechanism. | K2 | CO-3 |
| | | OR | | |
| | B | Explain Gattermann reaction, Gattermann Koch reaction with mechanism | K2 | CO-3 |
| 24 | A | Give the mechanism of electrophilic substitution reactions | K2 | CO-4 |
| | | OR | | |
| | B | Explain the concept of orientation and reactivity using disubstituted benzene. | K2 | CO-4 |
| 25 | A | Explain regioselective transformation with examples. | K2 | CO-5 |
| | | OR | | |
| | B | Analyse the conformations of di-substituted cyclohexane. | K2 | CO-5 |
| Section C | | | | |
| Answer ANY THREE Questions (3 x 10 = 30) | | | | |
| 26 | | Explain with example about effect of aromaticity on band length, resonance energy and induced ring current. | K3 | CO-1 |
| 27 | | Explain stability, structure and generation of carbenes and nitrenes ? | K4 | CO-2 |
| 28 | | Explain about the NGP in nucleophilic substitution reactions | K5 | CO-3 |
| 29 | | Explain the mechanism of Stork Enamine reaction and Friedal Craft acylation of olifinic carbon. | K4 | CO-4 |
| 30 | | Explain the optical inactivity of meso tartaric acid using Fischer, Newmann and Sawhorse projection formulas? | K3 | CO-5 |

MODEL QUESTION PAPER

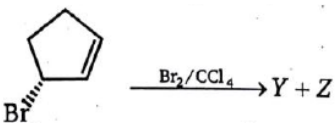

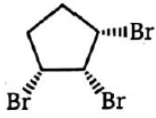

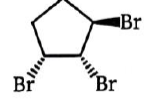

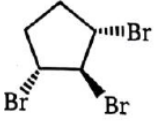

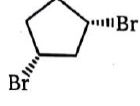

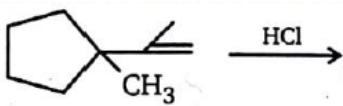

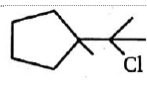

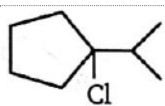

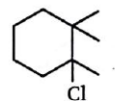

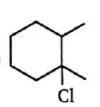

| Programme(s) | Title of the Paper | Semester |
|-----------------|----------------------------|----------|
| M.Sc. Chemistry | ORGANIC REACTION MECHANISM | II |

Time: 3 Hr.

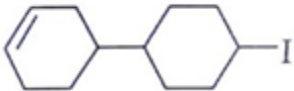

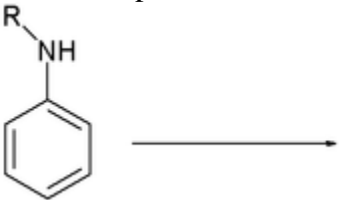

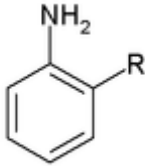

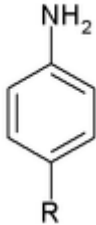

Max.Marks : 75

Section A

Answer all questions (20 x 1 = 20)

| | | | |
|----|---|----|---|
| 1 | (R)-3-bromo cyclopentene reacts with Br_2/CCl_4 to form two products, Y & Z, Y is not optically active. What is the structure of Y? | K2 | CO-1 |
| |  | | |
| A |  | B |  |
| C |  | D |  |
| 2 | Complete the following reactions: | K1 | CO-1 |
| |  | | |
| A |  | B |  |
| C |  | D |  |
| 3. | Which of the following equations does not show the correct main products? | K3 | CO-1 |

| | | | | | |
|---|--|---|---|--|------|
| A | | B | | | |
| C | | D | | | |
| 4 | Which combination gives exclusive product as a result of addition reaction? | | | K1 | CO-1 |
| A | Symmetrical reagent + unsymmetrical substrate | | B | Br ₂ + (Z) but-2-ene | |
| C | Symmetrical reagent + symmetrical substrate | | D | all of the above | |
| 5 | Which of the following statements regarding the E1 mechanism is wrong? | | | K3 | CO-2 |
| A | Reactions by the E1 mechanism are unimolecular in the rate-determining step. | | B | Reactions by the E1 mechanism are generally first order. | |
| C | Reactions by the E1 mechanism usually occur in one step. | | D | Reactions by the E1 mechanism are multi-step reactions. | |
| 6 | Which is the main product of the following reaction? | | | K1 | CO-2 |
| | | | | | |
| A | | | B | | |
| C | | | D | | |
| 7 | Which is the main product of the following reaction? | | | K2 | CO-2 |
| | | | | | |
| A | | | B | | |
| C | | | D | | |
| 8 | Predict the product for the following elimination reaction. | | | K2 | CO-2 |
| | | | | | |

| | | | | | | |
|----|--|--|---|--|----|------|
| | A |  | B |  | | |
| | C |  | D |  | | |
| 9 | A rearrangement the hydrogen, alkyl or aryl group in a carbocation migrates from one carbon to a neighboring carbon resulting in 1,2-rearrangement reactions | | | | K1 | CO-3 |
| | A | Martius rearrangements | B | Ireland-Claisen | | |
| | C | Wagner–Meerwein | D | Baeyer – Villiger | | |
| 10 | Predict the product of Martius rearrangements | | | | K4 | CO-3 |
| |  | | | | | |
| | A |  | B |  | | |
| | C | Both A & B | D | None of the above | | |
| 11 | Which of the following rearrangements uses allyl ester of a carboxylic acid in its silyl-stabilized enolate (silyl ketene acetal) form? | | | | K1 | CO-3 |
| | A | Ireland-Claisen | B | Claisen Rearrangement | | |
| | C | Cope Rearrangement | D | all of the above | | |
| 12 | Which reaction uses peracids for the conversion of cyclic ketones to lactones | | | | K4 | CO-3 |
| | A | Von – Richter | B | Baeyer – Villiger | | |
| | C | Stevens | D | Neber | | |
| 13 | The reaction which involves the reaction between β -keto ester, an aryl aldehyde, and urea to produce pyrimidones under acidic conditions is reaction. | | | | K1 | CO-4 |
| | A | Vilsmeier formylation | B | Negishi | | |
| | C | Biginelli | D | Luche | | |
| 14 | Predict the product of the following reaction: | | | | K2 | CO-4 |

| | | | | | |
|----|---|--|---|--|------|
| | | | | | |
| | A | | B | | |
| | C | | D | All of the above | |
| 15 | Complete the following stille reaction. | | | K4 | CO-4 |
| | $R'-X + Y \xrightarrow{\text{Pd-Cat}} R'-R + Z$ | | | | |
| | A | Y=XSnBu ₃ & Z=RSnBu ₃ | B | Y=XPtBu ₃ & Z=RPtBu ₃ | |
| | C | Y=RSnBu ₃ & Z=XSnBu ₃ | D | None of the above | |
| 16 | Predict the Steps Y and Step Z in the following Cadiot–Chodkiewicz reaction | | | K1 | CO-4 |
| | | | | | |
| | A | X = Oxidative addition & Y = Reductive elimination | B | X = Oxidative addition & Y = Reductive addition | |
| | C | X = Oxidative addition & Y = Oxidative elimination | D | X = Reductive addition & Y = Reductive elimination | |
| 17 | N-Bromosuccinimide is used for substitution of hydrogen at carbon | | | K1 | CO-5 |
| | A | α-carbon to carbonyl | B | vinyllic | |
| | C | allylic | D | all of the above | |
| 18 | The reagent DCC is used as | | | K2 | CO-5 |
| | A | oxidising agent | B | reducing agent | |
| | C | dehydrating agent | D | none of the above | |
| 19 | Selenium dioxide is mainly used to oxidize thecarbon atoms adjacent to a double bond to form allylic hydroxy derivative | | | K2 | CO-5 |
| | A | α-methylene | B | β-methylene | |
| | C | carbonyl | D | terminal | |
| 20 | The Wilkinson catalyst is | | | K2 | CO-5 |
| | A | [RuCl(PPh ₃) ₃] | B | [PdCl(PPh ₃) ₃] | |
| | C | [RhCl(PPh ₃) ₃] | D | [ReCl(PPh ₃) ₃] | |

| Section B | | | | |
|---|---|--|----|------|
| Answer All questions (5 x 5 = 25) | | | | |
| 21 | A | Addition reaction of alkenes leads to trans product. Why? | K2 | CO-1 |
| OR | | | | |
| | B | Write a note on hydroboration. | K2 | CO-1 |
| 22 | A | Discuss E1CB mechanism. | K2 | CO-2 |
| OR | | | | |
| | B | State and explain Hoffman and Saytzeff rule. | K1 | CO-2 |
| 23 | A | Write a notes on DeLa mare rearrangement. | K1 | CO-3 |
| OR | | | | |
| | B | Discuss the Neber rearrangement. | K3 | CO-3 |
| 24 | A | Explain Biginelli reaction. | K1 | CO-4 |
| OR | | | | |
| | B | Write a notes on Pauson-Khand reaction | K4 | CO-4 |
| 25 | A | Explain the role of AlCl ₃ in Friedal Craft's reaction and Fries rearrangement. | K2 | CO-5 |
| OR | | | | |
| | B | Write the application of DDQ. | K4 | CO-5 |
| Section C | | | | |
| Answer ANY THREE Questions (3 x 10 = 30) | | | | |
| 26 | | Explain the following addition reaction with mechanism: (i) Simmon-smith reaction (ii) Wittig-Horner reaction | K1 | CO-1 |
| 27 | | Give the mechanism of Cope elimination and Hoffmann degradation. | K2 | CO-2 |
| 28 | | Explain Demyanov and Smiles rearrangement. | K2 | CO-3 |
| 29 | | Explain the mechanism of Luche and Suzzuki reactions. | K2 | CO-5 |
| 30 | | Explain the application of OsO ₄ and Pb(COOMe) ₄ in organic synthesis. | K1 | CO-4 |

DEPARTMENT OF CHEMISTRY

MODEL QUESTION PAPER

| Programme(s) | Title of the Paper | Semester |
|------------------|--|----------|
| M.Sc., CHEMISTRY | TRANSITION METAL AND NUCLEAR CHEMISTRY | I |

Time: 3 Hrs.

Max.Marks : 75

Section A

Answer all questions (20 x 1 = 20)

| | | | | |
|---|---|---|----|---|
| 1 | Which of the following arrangements does not represent the correct order of the property stated against it? | | K5 | CO -1 |
| | A | $V^{2+} < Cr^{2+} < Mn^{2+} < Fe^{2+}$: paramagnetic behaviour | B | $Ni^{2+} < Co^{2+} < Fe^{2+} < Mn^{2+}$: ionic size |
| | C | $Co^{3+} < Fe^{3+} < Cr^{3+} < Sc^{3+}$: stability in aqueous solution | D | $Sc < Ti < Cr < Mn$: number of oxidation states |
| 2 | among the following contain partially filled d – sub shell and does not show variable oxidation states. | | K4 | CO -1 |
| | A | Zn | B | Cd |
| | C | La | D | Hg |
| 3 | Which one is of the following is the lightest transition element? | | K1 | CO -1 |
| | A | Ti | B | Sc |
| | C | Fe | D | Hg |
| 4 | has the maximum number of unpaired electrons. | | K3 | CO -1 |
| | A | Fe^{2+} | B | Fe^{3+} |
| | C | Co^{3+} | D | Co^{2+} |
| 5 | Lanthanide contraction is caused due to, | | K1 | CO -2 |
| | A | the appreciable shielding on outer | B | the appreciable shielding on outer electrons by 5d electrons from the nuclear |

| | | | | | | |
|----|--|---|---|---|----|-------|
| | | electrons by 4f electrons from the nuclear charge | | charge | | |
| | C | the same effective nuclear charge from Ce to Lu | D | the imperfect shielding on outer electrons by 4f electrons from the nuclear charge. | | |
| 6 | Which of following radioactive elements in lanthanides | | | | K1 | CO -2 |
| | A | Promethium (Pm) | B | Lutetium (Lu) | | |
| | C | Ytterbium (Yb) | D | Samarium (Sm) | | |
| 7 | The actinides exhibit more spread in place than the 4f orbital's | | | | K2 | CO -2 |
| | A | The 5f orbital's are more spread in place than the 4f orbital's | B | Energy difference between 5f and 6d orbital is less than that of 4f and 5d orbital's. | | |
| | C | Energy difference between 5f and 6d orbital is more than that of 4f and 5d orbital's. | D | Actinides are more reactive than that of lanthanides. | | |
| 8 | Which one of these not magic no | | | | K2 | CO -2 |
| | A | 2 | B | 8 | | |
| | C | 20 | D | 36 | | |
| 9 | One atomic mass unit is equal to | | | | K1 | CO -3 |
| | A | 931.5 eV | B | 931.5 erg | | |
| | C | 931.5 MeV | D | 1931.5 MeV | | |
| 10 | Baryon contains | | | | K1 | CO -3 |
| | A | 1 quarks | B | 2 quarks | | |
| | C | 3 quarks | D | 4 quarks | | |
| 11 | Which one is related to nuclear stability | | | | K2 | CO -3 |
| | A | Binding energy | B | Magic no | | |

| | | | | | | |
|----|---|---|---|--|----|-------|
| | C | N/P Ratio | D | All | | |
| 12 | Alpha particle emission is explained with | | | | K3 | CO -3 |
| | A | Binding energy | B | Nuclear tunnel effect | | |
| | C | Nuclear isomerism | D | Auger effect | | |
| 13 | Exoergic nuclear reaction | | | | K3 | CO -4 |
| | A | $Q = +ve$ | B | $Q = -ve$ | | |
| | C | $Q = 0$ | D | None of the above | | |
| 14 | Coulomb barrier is due to the..... | | | | K1 | CO -4 |
| | A | Projectile +ve target -ve | B | Projectile -ve target +ve | | |
| | C | Projectile +ve and target +ve | D | None of the above | | |
| 15 | Excitation function related to | | | | K1 | CO -4 |
| | A | Choice of the nuclear reaction | B | Incoming and outgoing projectile beam | | |
| | C | Both A and B | D | None of the above | | |
| 16 | After beta decay parent nucleus shows atomic no | | | | K2 | CO -4 |
| | A | -1 | B | +1 | | |
| | C | -2 | D | No change | | |
| 17 | Which one is not a characteristics of nuclear fission | | | | K1 | CO -5 |
| | A | Every step two are more lighter nuclei are produced | B | Every step two are more neutrons are produced | | |
| | C | Nuclear chain reaction happened | D | No radiation formed | | |
| 18 | The following radioactive isotope is used in agricultural process | | | | K1 | CO -5 |
| | A | N13 | B | P32 | | |
| | C | C 12 | D | O16 | | |
| 19 | Which one is a detection and measurement technique of radioactive material? | | | | K3 | CO -5 |
| | A | Cloud chamber | B | Geiger-Muller counter | | |

| | | | | | | |
|---|--|--|---|---------------|----|--------|
| | | method | | | | |
| | C | Scintillation counter | D | All the above | | |
| 20 | The half life period of ${}^6\text{C}^{14}$ | | | | K2 | CO -5 |
| | A | 4352 years | B | 5568 years | | |
| | C | 8564 years | D | 1432 years | | |
| Section B | | | | | | |
| Answer All questions (5 x 5 = 25) | | | | | | |
| 21 | A | Write the structure of $(\text{Re}_2\text{Cl}_8)^{2-}$ and $(\text{Mo}_6\text{Br}_8)^{4+}$ | | | K1 | CO – 1 |
| OR | | | | | | |
| | B | Write short note on colour and magnetic properties of d block elements with example. | | | K2 | CO – 1 |
| 22 | A | Explain about properties of inner transition elements. | | | K1 | CO – 2 |
| OR | | | | | | |
| | B | Write causes and consequences of gadolinium break. | | | K3 | CO – 2 |
| 23 | A | Briefly explain nuclear stability. | | | K4 | CO – 3 |
| OR | | | | | | |
| | B | What is semi empirical formula? Explain the terms. | | | K2 | CO – 3 |
| 24 | A | Write note on nuclear isomerism. | | | K1 | CO – 4 |
| OR | | | | | | |
| | B | Explain scintillation detector. | | | K1 | CO – 4 |
| 25 | A | What are fissile and fertile nuclides? Give examples. | | | K2 | CO – 5 |
| OR | | | | | | |
| | B | Write short note on application of radioactive isotopes. | | | K1 | CO – 5 |
| Section C | | | | | | |
| Answer ANY THREE Questions (3 x 10 = 30) | | | | | | |
| 26 | Briefly explain about general characteristics of d block elements. | | | | K1 | CO – 1 |
| 27 | Write short note on extraction of thorium. | | | | K3 | CO – 2 |

| | | | |
|----|---|----|--------|
| 28 | Explain i) Binding energy ii) Magic number iii) Meson theory | K2 | CO – 3 |
| 29 | Explain the following detection methods i) cloud chamber ii) scintillation detector | K4 | CO – 4 |
| 30 | Briefly explain the term nuclear fission and nuclear fusion reaction. | K1 | CO – 5 |

MODEL QUESTION PAPER

| Programme(s) | Title of the Paper | Semester |
|-----------------|---|----------|
| M.Sc. Chemistry | CHEMICAL BONDING AND COORDINATION CHEMISTRY | II |

Time: 3 Hrs.

Max.Marks : 75

Section A

Answer all questions (20 x 1 = 20)

| | | | | |
|---|--|-------------------|----|------------------------|
| 1 | Which of the following molecule have ionic bond? | | K1 | CO-1 |
| | A | O ₂ | B | Cl ₂ |
| | C | NaCl | D | SO ₂ |
| 2 | Which factor is used to determine if a bond is considered ionic? a) _____ c) d) | | K1 | CO-1 |
| | A | Electronegativity | B | mass |
| | C | size | D | number of atoms bound. |
| 3 | Which element in periodic table possess highest electronegativity | | K1 | CO-1 |
| | A | Hydrogen | B | Carbon |
| | C | Fluorine | D | Helium |
| 4 | Which element in periodic table possess highest electronegativity next to fluorine | | K3 | CO-1 |
| | A | Pb | B | O ₂ |
| | C | Ba | D | Ag |
| 5 | What kind of hybrid orbitals are utilized by the carbon atom in CH ₄ molecules? | | K2 | CO-2 |
| | A | sp ² | B | sp ³ |
| | C | sp | D | d ² sp |
| 6 | Which one of the following violate the octet rule? | | K2 | CO-2 |
| | A | AsF ₅ | B | NF ₃ |

| | | | | | | |
|----|---|---|---|---|------|--|
| | C | PCl_3 | D | CBr_4 | | |
| 7 | Carbon monoxide has ten bonding electrons and four antibonding electrons. Therefore it has a bond order of, | | | K3 | CO-2 | |
| | A | 3 | B | 7 | | |
| | C | 1 | D | 2 | | |
| 8 | The atoms in water molecule adopt what kind of geometry if you include the lone pair of electrons? | | | K2 | CO-2 | |
| | A | Linear | B | Tetrahedral | | |
| | C | Pyramidal | D | Octahedral | | |
| 9 | sp^3 hybridization involves the hybridization of how many atomic orbitals? | | | K2 | CO-3 | |
| | A | 3 | B | 2 | | |
| | C | 4 | D | none 5 theabove | | |
| 10 | The geometry of XeF_4 is _____ from the VESPR theory | | | K2 | CO-3 | |
| | A | tetrahedral | B | angular | | |
| | C | trigonalplanar | D | Square planar | | |
| 11 | How many unpaired electrons are there in the strong field Iron(II) octahedral complex | | | K2 | CO-3 | |
| | A | 1 | B | 2 | | |
| | C | 0 | D | 4 | | |
| 12 | Strong field ligands such as CN^- | | | K4 | CO-3 | |
| | A | usually produce low spin complexes and high crystal field splittings. | B | usually produce high spin complexes and small crystal field splittings. | | |
| | C | cannot form low spin complexes | D | usually produce low spin complexes and small crystal field splittings. | | |
| 13 | Which one of the following complexes can exhibit geometrical isomerism? | | | K1 | CO-4 | |
| | A | $[\text{Pt}(\text{NH}_3)_2\text{Cl}_2]$ (square planar) | B | $[\text{Zn}(\text{NH}_3)_2\text{Cl}_2]$ (tetrahedral) | | |
| | C | $[\text{Cu}(\text{CN})_2]^-$ (linear) | D | $[\text{Cu}(\text{NH}_3)_4]^{2+}$ (square planar) | | |
| 14 | Which one of the following complexe can exhibit cis isomer? a) b) c) d) | | | K1 | CO-4 | |
| | A | $[\text{Pt}(\text{NH}_3)_2\text{Cl}_2]$ | B | $[\text{PtCl}_4]$ | | |
| | C | $[\text{Cu}(\text{Cl})_2]^-$ | D | $[\text{Pt}(\text{NH}_3)_4]^{2+}$ | | |
| 15 | Which one of the following complexes can exhibit trans isomer? | | | K2 | CO-4 | |
| | A | $[\text{Pt}(\text{NH}_3)_2\text{Cl}_2]$ | B | $[\text{PtCl}_4]$ | | |
| | C | $[\text{Cu}(\text{Cl})_2]^-$ | D | $[\text{Pt}(\text{NH}_3)_4]^{2+}$ | | |
| 16 | Organometallic chemistry is a branch of chemistry deals with compounds possessing..... | | | K2 | CO-4 | |

| | | | | | | |
|---|--|--|---|------------------|----|------|
| | A | Carbon-Carbon Bond | B | Metal-Metal Bond | | |
| | C | Metal-Carbon Bond | D | Metal-Boron Bond | | |
| 17 | The multiple bond character of the metal-carbon bond in metal carbonyls is due to the presence of..... | | | | K2 | CO-5 |
| | A | Carbon-Carbon Bond | B | Metal-Metal Bond | | |
| | C | Hydrogen Bonding | D | Backbonding | | |
| 18 | Atomic states are well described by the term symbols of the form..... | | | | K1 | CO-5 |
| | A | $^{J+1} L_{2S+1}$ | B | $^J L_{2S+1}$ | | |
| | C | $^{2S+1} L_J$ | D | $^{2S} L_J$ | | |
| 19 | The ground state term symbol for Fluorine (2p5 system) is | | | | K2 | CO-5 |
| | A | $^2 P_{3/2}$ | B | $^2 P_{5/2}$ | | |
| | C | $^3 P_{3/2}$ | D | $^2 S_{3/2}$ | | |
| 20 | The oxidation state of Ferrocene (Fe(C5H5)2) is | | | | K3 | CO-5 |
| | A | 3+ | B | 0 | | |
| | C | 2+ | D | 4+ | | |
| Section B | | | | | | |
| Answer All questions (5 x 5 = 25) | | | | | | |
| 21 | A | State and explain Fajan's rule with an example | | | K4 | CO-1 |
| OR | | | | | | |
| | B | Describe radius ratio rule. | | | K3 | CO-1 |
| 22 | A | Explain hybridization and geometry of NH3. | | | K2 | CO-2 |
| OR | | | | | | |
| | B | What are the failures of VBT. | | | K4 | CO-2 |
| 23 | A | State and explain Jahn Teller distortion with an example. | | | K1 | CO-3 |
| OR | | | | | | |
| | B | Describe splitting of d-orbitals in square planar geometry | | | K4 | CO-3 |
| 24 | A | Write a note on trans effect with an example | | | K3 | CO-4 |
| OR | | | | | | |
| | B | Discuss hydrogenation of alkene using Wilkinson's catalyst. | | | K2 | CO-4 |
| 25 | A | (i) What is ground term for d2 system. (ii) Give selection rule for electronic spectra. | | | K1 | CO-5 |
| OR | | | | | | |
| | B | Draw and explain Orgel diagram of d3 system | | | K1 | CO-5 |
| Section C | | | | | | |
| Answer ANY THREE Questions (3 x 10 = 30) | | | | | | |

| | | | | |
|----|--|--|----|------|
| | | | | |
| 26 | | Write note on (i) Lattice energy (ii) Born-Habercycle | K3 | CO-1 |
| 27 | | Explain LCAO method for molecular orbitals in O ₂ . | K1 | CO-2 |
| 28 | | Illustrate splitting of d-orbitals in octahedral and Tetrahedral geometry. | K3 | CO-3 |
| 29 | | i) Differentiate thermodynamic and kinetic stability. (ii) Write notes on stability constant. | K1 | CO-4 |
| 30 | | (i) Derive term symbol for d ⁴ system. (ii) Explain charge transfer spectra with an example. | K2 | CO-5 |

| Programme(s) | Title of the Paper | Semester |
|-----------------|--|----------|
| M.Sc. Chemistry | GROUP THEORY, KINETICS AND SURFACE CHEMISTRY | I |

Time: 3 Hrs.

Max.Marks : 75

Section A

Answer all questions (20 x 1 = 20)

| | | | | |
|---|--|----------------------|----|-------------------|
| 1 | Which one has higher symmetry? | | K4 | CO-1 |
| | A | Square | B | Sphere |
| | C | Rectangle | D | Cube |
| 2 | Number of irreducible representations in C_{2h} is _____ | | K5 | CO-1 |
| | A | 2 | B | 3 |
| | C | 4 | D | None of the above |
| 3 | Irreducible representation is | | K1 | CO-1 |
| | A | Basic representation | B | Reducible |
| | C | Non reducible | D | Both A&C |
| 4 | Point group of Benzene is _____ | | K5 | CO-1 |
| | A | D_{5h} | B | D_{6h} |
| | C | D_{6d} | D | None of the above |
| 5 | Number of vibrational modes in H_2O is | | K5 | CO-2 |
| | A | 2 | B | 3 |
| | C | 6 | D | 9 |

| | | | | |
|----|---|----------------------------|----|--------------------------|
| 6 | Number of faces in octahedron is | | K2 | CO-2 |
| | A | 6 | B | 8 |
| | C | 10 | D | 12 |
| 7 | Point group of Rhombohedral is | | K1 | CO-2 |
| | A | C 2/m | B | R 3m |
| | C | P 6mm | D | I 23 |
| 8 | Nature of hybrid in AB ₃ type molecule is | | K5 | CO-2 |
| | A | sp ³ | B | sp |
| | C | dsp ² | D | None of the above |
| 9 | The number of chain carrier is greater than unity. Such reactions are called as | | K2 | CO-3 |
| | A | Chain reactions | B | Explosion |
| | C | Stationary chain reactions | D | Non stationary reactions |
| 10 | . _____ equation is best applicable to study of free energy relation | | K1 | CO-3 |
| | A | Tafel | B | Hammett |
| | C | Free energy relation | D | None of the above |
| 11 | A unimolecular reaction may have a _____ entropy of activation | | K1 | CO-3 |
| | A | One | B | Zero |
| | C | Three | D | Five |
| 12 | The theory of pressure effects on rate was formulated by | | K1 | CO-3 |
| | A | Van't hoff | B | Arrhenius |
| | C | Lewis and Randall | D | Eigen |
| 13 | The word catalysis was first used by | | K1 | CO-4 |

| | | | | | | |
|---|---|-----------------------|---|-------------------|----|------|
| | A | Dobernier | B | Thenard | | |
| | C | Berzelius | D | Both A & B | | |
| 14 | Eobs of Arrhenius intermediates is _____ | | | | K3 | CO-4 |
| | A | $-U+E'_2$ | B | E_2 | | |
| | C | $-U+E_2+E'_2$ | D | $-U+E_2$ | | |
| 15 | If PH = 5, the rate of enzyme catalysed reaction is | | | | K4 | CO-4 |
| | A | Increase | B | Decreases | | |
| | C | Moderate | D | No changes | | |
| 16 | _____inhibition of enzyme catalysed reaction is cannot be removed by dialysis | | | | K1 | CO-4 |
| | A | Competitive | B | Non competitive | | |
| | C | Uncompetitive | D | Irreversible | | |
| 17 | Gas behaves _____ in Langmuir adsorption isotherm | | | | K2 | CO-5 |
| | A | Uniform energetically | B | Ideally | | |
| | C | Non ideally | D | None of the above | | |
| 18 | Physical adsorption is usually observed | | | | K2 | CO-5 |
| | A | Mobile surface | B | Inter surface | | |
| | C | Both A & B | D | None of the above | | |
| 19 | Adsorption curves are mathematically expressed as | | | | K1 | CO-5 |
| | A | $a=f(T)$ | B | $a=f(T,P)$ | | |
| | C | $a=f(P)$ | D | $P=f(T,A)$ | | |
| 20 | _____ adsorption isotherm is valid over a certain range of pressure only | | | | K2 | CO-5 |
| | A | Langmuir | B | Type VII | | |
| | C | Freundlich | D | Type V | | |
| Section B | | | | | | |
| Answer All questions (5 x 5 = 25) | | | | | | |

| | | | | |
|---|---|--|----|------|
| 21 | A | Write briefly about improper axis of symmetry with an example.K-1 | K1 | CO-1 |
| | | OR | | |
| | B | What are the rules of group? | K1 | CO-1 |
| 22 | A | Derive selection rule for IR spectra using group theory. | K3 | CO-2 |
| | | OR | | |
| | B | Determine hybrid orbitals in CH ₄ . | K3 | CO-2 |
| 23 | A | Explain the effect of dielectric constant on reaction rate in solution. | K4 | CO-3 |
| | | OR | | |
| | B | Derive rate constant for fast reaction by using temperature jump technique. | K2 | CO-3 |
| 24 | A | Describe about Bronsted catalysis Law. | K2 | CO-4 |
| | | OR | | |
| | B | Describe about Vant Hoff and Arrhenius intermediates. | K4 | CO-4 |
| 25 | A | List out the major difference between physical and chemical adsorption. | K2 | CO-5 |
| | | OR | | |
| | B | Describe the effect of temperature on adsorption. | K2 | CO-5 |
| Section C | | | | |
| Answer ANY THREE Questions (3 x 10 = 30) | | | | |
| 26 | | Deduce the character table for C _{2v} point group | K5 | CO-1 |
| 27 | | Determine the number of vibrational modes in H ₂ O. | K5 | CO-2 |
| 28 | | Explain the effect of ionic strength on reaction rate in solutions. | K4 | CO-3 |
| 29 | | Explain the effect of substrate concentration, temperature and pH on enzyme catalyzed reactions. | K2 | CO-4 |
| 30 | | Discuss briefly about Langmuir adsorption isotherm and its significances. | K2 | CO-5 |

| M.Sc. Chemistry | NANOSCIENCE AND NANOTECHNOLOGY | I |

Time: 3 Hrs.

Max. Marks : 75

Section A

Answer all questions (20 x 1 = 20)

| | | | | |
|---|--|------------------------|----|--|
| 1 | Who coined the word 'nanotechnology'? | | K1 | CO1 |
| | A | Eric Drexler | B | Richard Feynmann |
| | C | Sumio Tjijima | D | Richard Smalley |
| 2 | Nanoscience can be studied with the help of... | | K2 | CO1 |
| | A | quantum mechanics | B | Newtonian mechanics |
| | C | macro-dynamics | D | geophysics |
| 3 | With the help of _____, Robert F. Curl and others discovered fullerene | | K1 | CO1 |
| | A | electron microscope | B | magnetic resonance |
| | C | condensation technique | D | mass spectrograph |
| 4 | Which of these historical works of art contain nanotechnology? | | K1 | CO1 |
| | A | Lycurgus cup | B | Medieval stained glass windows in churches |
| | C | Damascus steel swords | D | All of the above |
| 5 | Carbon atoms make _____ type of bond with other carbon atoms. | | K2 | CO2 |
| | A | covalent | B | ionic |
| | C | metallic | D | hydrogen |

| | | | | |
|----|---|--|----|--|
| 6 | One of the advantages of sol-gel method is able to get uniform and _____ powder. | | K1 | CO2 |
| | A | Micro size | B | Large size |
| | C | Nano size | D | Small size |
| 7 | What is the general name for the class of structures made of rolled up carbon lattices? | | K1 | CO2 |
| | A | Nanorods | B | Nanotubes |
| | C | Nanosheets | D | Fullerods |
| 8 | While synthesizing the nano cones the plasma temperature is above _____ | | K1 | CO2 |
| | A | 1000°C | B | 1500°C |
| | C | 2000°C | D | 2500°C |
| 9 | The size of a quantum dot is _____ nm. | | K1 | CO3 |
| | A | 5 | B | 10 |
| | C | 50 | D | 100 |
| 10 | During DTA (Differential thermal analysis) what kind of reference material is used? | | K1 | CO3 |
| | A | Chemically active | B | Physically active |
| | C | Inert | D | Having catalytic property |
| 11 | Thermal analysis is defined as _____ | | K2 | CO3 |
| | A | Measurement of concentration of materials as a function of temperature | B | Measurement of solubility of materials as a function of temperature |
| | C | Measurement of physical properties as a function of temperature | D | Measurement of line positions of crystals as a function of temperature |
| 12 | Graphene is a: | | K1 | CO3 |
| | A | wide band-gap semiconductor | B | gapless-band semiconductor |
| | C | not a semiconductor but behaves like graphite | D | a narrow bandgap semiconductor |
| 13 | Which of the following is the principal factor which causes the properties of nanomaterials to differ significantly from other materials? | | K2 | CO4 |

| | | | | | | |
|---|---|---|---|--|----|-----|
| | A | Size distribution | B | Specific surface feature | | |
| | C | Quantum size effects | D | All the above | | |
| 14 | What are the advantages of nano-composite packages? | | | | K2 | CO4 |
| | A | Lighter and biodegradable | B | Enhanced thermal stability, conductivity and mechanical strength | | |
| | C | Gas barrier properties | D | All the above | | |
| 15 | Coating the nano crystals with the ceramics is carried that leads to _____ | | | | K2 | CO4 |
| | A | Corrosion | B | Corrosion resistant | | |
| | C | Wear and tear | D | Soft | | |
| 16 | _____ is the field in which the nano particles are used with silica coated iron oxide iron oxide. | | | | K3 | CO4 |
| | A | Magnetic applications | B | Electronics | | |
| | C | Medical diagnosis | D | Structural and mechanical materials | | |
| 17 | The genetic code translated the language of _____ | | | | K1 | CO5 |
| | A | Proteins into that of RNA | B | Amino acids into that of RNA | | |
| | C | RNA into that of proteins | D | RNA into that of DNA | | |
| 18 | By nano scale distribution of the _____ in matrix improves the life and performance | | | | K3 | CO5 |
| | A | Carbide | B | Tungsten | | |
| | C | Hydrides | D | Nitrites | | |
| 19 | The synthesized magnetic nano particles from _____ have been found to self-arrange automatically. | | | | K1 | CO5 |
| | A | Zinc | B | Copper | | |
| | C | Iron | D | Zirconium | | |
| 20 | Nano particles target the rare _____ causing cells and remove them from blood. | | | | K3 | CO5 |
| | A | Infection | B | Fever | | |
| | C | Tumour | D | Cold | | |
| Section B | | | | | | |
| Answer All questions (5 x 5 = 25) | | | | | | |
| 21 | A | Write the difference between one and two dimensional nanomaterials. | | | K2 | CO1 |
| OR | | | | | | |

| | | | | |
|---|---|--|----|-----|
| | B | Sketch the steps involved in nanotech generation. | K2 | CO1 |
| | | | | |
| 22 | A | Discuss about the synthesis of nanomaterial by sol-gel method. | K2 | CO2 |
| | | OR | | |
| | B | Briefly explain the synthesis of nanomaterials using electrodeposition process | K2 | CO2 |
| | | | | |
| 23 | A | Explain the thermal gravimetric analysis. | K2 | CO3 |
| | | OR | | |
| | B | Write the applications of scanning electron microscopy. | K2 | CO3 |
| | | | | |
| 24 | A | Discuss the applications of nanoparticles in food and agriculture. | K2 | CO4 |
| | | OR | | |
| | B | Write note on risks of nanomaterials. | K2 | CO4 |
| | | | | |
| 25 | A | What are biopolymers and biomaterials? Explain with an example. | K2 | CO5 |
| | | OR | | |
| | B | Write short note on; Multilayer films. | K2 | CO5 |
| Section C | | | | |
| Answer ANY THREE Questions (3 x 10 = 30) | | | | |
| | | | | |
| 26 | | Explain Indian and global scenario in nanotechnology. | K5 | CO1 |
| | | | | |
| 27 | | Discuss about the synthesis of nanomaterial by PVD method. | K3 | CO2 |
| | | | | |
| 28 | | What is SAED analysis? Explain with examples | K4 | CO3 |
| | | | | |
| 29 | | Briefly explain the properties and applications of metal nanocomposites. | K5 | CO4 |
| | | | | |
| 30 | | Explain the terms; DNA double nanowire, Genetic code and protein nanoparticle. | K3 | CO5 |

Section A

Answer all questions (20 x 1 = 20)

| | | | | |
|---|---|---|----|---|
| 1 | How can an electric double layer be formed around the solid particles of suspensions? | | K2 | CO-1 |
| | A | The particles are charged as a matter of course | B | As a result of the attractive forces acting between the particles |
| | C | Ions are adsorbed on the surface | D | As a result of the adsorption of a polar substance. |
| 2 | The reverse of electro-osmosis | | K3 | CO-1 |
| | A | zeta potential | B | Osmosis |
| | C | iso-electric point | D | streaming potential |
| 3 | In this equation $V_w = k \ln (C_g/C_0) + V_e$, where V_e is | | K1 | CO-1 |
| | A | electrophoretic mobility | B | zeta potential |
| | C | polarization | D | Poisson's velocity |
| 4 | Which method is not a sedimentation method? | | K2 | CO-1 |
| | A | Ultracentrifugation | B | Sedimentation |
| | C | Gelfiltration | D | Centrifugation |
| 5 | Pick out the ionic strength for a solution of 0.10 M NaCl. | | K3 | CO-2 |
| | A | 0.2 M | B | 0.5 M |
| | C | 0.1 M | D | 0.25 M |
| 6 | As the ionic strength, μ increases the activity coefficient (Y) | | K2 | CO-2 |
| | A | increases | B | decreases |

| | | | | | | |
|----|---|------------------------------------|---|--|----|------|
| | C | neutral | D | None of these | | |
| 7 | Debye-Hückel theory is valid only | | | | K1 | CO-2 |
| | A | High concentration | B | Higher concentration | | |
| | C | Low concentration | D | non-ideal solution | | |
| 8 | Which ion is kinetically inert? | | | | K1 | CO-2 |
| | A | Cr^{2+} | B | Co^{3+} | | |
| | C | Co^{2+} | D | Fe^{3+} | | |
| 9 | A photochemical reaction is | | | | K1 | CO-3 |
| | A | Catalyzed by light | B | initiated by light | | |
| | C | accompanied with emission of light | D | used to convert heat energy into light | | |
| 10 | Photochemical reaction of trans-2-butene with itself will produce which of the following products? | | | | K3 | CO-3 |
| | | | | | | |
| | A | A and B | B | C and D | | |
| | C | A and C | D | B and D | | |
| 11 | Fluorescence is a slow process | | | | K1 | CO-3 |
| | A | 10^{-9} to 10^{-7} sec | B | 10^{-8} to 10^{-6} sec | | |
| | C | 10^{-3} to 10^{-8} sec | D | 10^{-9} to 10^{-1} sec | | |
| 12 | Photochemical reactions are independent of | | | | K1 | CO-3 |
| | A | Pressure | B | Temperature | | |
| | C | Free energy | D | All the above | | |
| 13 | A photochemically-induced electrocyclic reaction involves which of a molecule's molecular orbitals? | | | | K3 | CO-4 |
| | A | HOMO ⁻¹ | B | HOMO | | |
| | C | LUMO | D | LUMO ⁺¹ | | |
| 14 | Which of the following reactions converts an unsaturated ether to a γ,δ -unsaturated carbonyl compound? | | | | K3 | CO-4 |
| | A | Cope rearrangement | B | Claisen rearrangement | | |
| | C | Photochemical [2+2] reaction | D | Diels-Alder reaction | | |
| 15 | The transition in intersystem crossing is | | | | K1 | CO-4 |

| | | | | | | |
|-----------------------------------|---|--|---|-----------------------|----|------|
| | A | $S_1 \rightarrow T_1$ | B | $T_1 \rightarrow S_0$ | | |
| | C | $S_0 \rightarrow S_n$ | D | $T_1 \rightarrow S_0$ | | |
| 16 | Examples for Non-Equilibration of Excited Rotamers | | | | K2 | CO-4 |
| | A | 1,3-cyclohexadiene | B | hexane | | |
| | C | Fluvene | D | cyclohexane | | |
| 17 | Example for atomic photosensitizers | | | | K1 | CO-5 |
| | A | Mercury | B | Nitrogen | | |
| | C | Carbon monoxide | D | Nickel | | |
| 18 | Emission occurs at ordinary temperature, the emitted radiation is also known as | | | | K2 | CO-5 |
| | A | Black light | B | Blue light | | |
| | C | Cold light | D | White light | | |
| 19 | The wavelength of X-ray is | | | | K1 | CO-5 |
| | A | Below 0.1 nm | B | 10–200 nm | | |
| | C | 360–800 nm | D | 0.1–10 nm | | |
| 20 | Systemic name for PLA is | | | | K2 | CO-5 |
| | A | 2-hydroxypropanoic acid | B | hydroxyester | | |
| | C | polyesters | D | polyamides | | |
| Section B | | | | | | |
| Answer All questions (5 x 5 = 25) | | | | | | |
| 21 | A | Discuss the Chemical cells with and without transferences | | | K2 | CO-1 |
| OR | | | | | | |
| | B | Explain the Streaming and Sedimentation potentials. | | | K1 | CO-1 |
| 22 | A | What do you mean by Debye-Falkenhagen and Wien effects. | | | K2 | CO-2 |
| OR | | | | | | |
| | B | Explain the Quantitative and qualitative verification of Debye- Huckel limiting law. | | | K3 | CO-2 |
| 23 | A | Explain the construction of Jablonski diagram | | | K3 | CO-3 |
| OR | | | | | | |
| | B | Write a note on Frank- Condon principle and its selection rules. | | | K3 | CO-3 |
| 24 | A | Explain the formation of peroxy compounds. | | | K4 | CO-4 |
| OR | | | | | | |
| | B | Write a note on photo - fries rearrangement. | | | K2 | CO-4 |
| 25 | A | How will you explain the photosensitizers and chemistry of vision? | | | K1 | CO-5 |

| | | | | |
|--|---|---|----|------|
| | | OR | | |
| | B | Explain photodegradation and photo stabilisation. | K2 | CO-5 |
| Section C | | | | |
| Answer ANY THREE Questions (3 x 10 = 30) | | | | |
| | | | | |
| 26 | | Explain the theories of doublelayer. | K4 | CO-1 |
| 27 | | Derive the Debye - Huckel theory of inter-ionic attraction and ionicatmosphere. | K3 | CO-2 |
| 28 | | What is mean by photochemical reactions and explain photo reduction and oxidation, Photodimerization. | K3 | CO-3 |
| 29 | | Explain the Norish type I and norish type II with examples. | K3 | CO-4 |
| 30 | | Explain the ultraviolet screening agents , optical bleach and photochronism | K4 | CO-5 |

| Programme | M.Sc | Programme Code | PCH | | | Regulations | 2020-2022 | | | |
| Department | Chemistry | | | Semester | | | 3 | | | |
| Course Code | Course Name | | | Periods per Week | | | Credit | Maximum Marks | | |
| | | | | L | T | P | C | CA | ESE | Total |
| 20P3CH06 | CORE PAPER VI: Natural Products, Pericyclic reactions and Retro synthesis | | | 5 | | | 05 | 25 | 75 | 100 |
| Course Objectives | To enable student to learn about the chemistry of natural products. To learn the concepts of pericyclic reactions. To learn the relation between the structure and physiological properties of chemicals. To learn the basic principles and various method. | | | | | | | | | |
| POs | PROGRAMME OUTCOME | | | | | | | | | |
| PO 1 | Capable of demonstrating comprehensive knowledge and understanding of one or more disciplines that form a part of an undergraduate programme of study. | | | | | | | | | |
| PO 2 | Ability to express thoughts and ideas effectively in writing and orally Communicate with others using appropriate media confidently share ones views and express herself /himself. | | | | | | | | | |
| PO 3 | Capability to apply analytic thought to a body of knowledge analyse and evaluate evidence arguments claims beliefs on the basis of empirical evidence identify relevant assumptions or implications | | | | | | | | | |
| PO 4 | Capacity to extrapolate from what one has learned and apply their competencies to solve different kinds of non familiar problems rather than replicate curriculum content knowledge and apply ones learning to real life situations | | | | | | | | | |
| PO 5 | Ability to evaluate the reliability and relevance of evidence identify logical flaws and holes in the arguments of others analyse and synthesise data from a variety of sources draw valid Conclusions. | | | | | | | | | |
| PO 6 | A sense of inquiry and capability for asking relevant appropriate questions problematising synthesising and articulating ability to recognise cause and effect relationships define problems formulate hypotheses. | | | | | | | | | |
| PO 7 | Ability to work effectively and respectfully with diverse teams facilitate cooperative or coordinated effort on the part of a group and act together as a group in the interests of work efficiently as a member of a team. | | | | | | | | | |
| PO 8 | Ability to analyse interpret and draw conclusions from quantitative qualitative data and critically evaluate ideas, evidence and experiences from an open minded and reasoned perspective. | | | | | | | | | |
| PO 9 | Critical sensibility to lived experiences with self awareness and reflexivity of both self and society. | | | | | | | | | |
| PO 10 | Capability to use ICT in a variety of learning situations demonstrate ability to access evaluate and use a variety of relevant information sources and use appropriate software for analysis of data. | | | | | | | | | |
| PO 11 | Ability to work independently, identify appropriate resources required for a project and manage a project through to completion. | | | | | | | | | |
| PO 12 | Possess knowledge of the values and beliefs of multiple cultures and a global perspective. | | | | | | | | | |
| PO 13 | Ability to embrace moral ethical values in conducting one's life formulate a position argument about an ethical issue from multiple perspectives and use ethical practices in all work. | | | | | | | | | |
| PO 14 | Capability for mapping out the tasks of a team or an organization and setting direction formulating an inspiring vision building a team who can help achieve the vision motivating. | | | | | | | | | |
| PO 15 | Ability to acquire knowledge and skills including learning how to learn that are necessary for participating in learning activities throughout life through self paced. | | | | | | | | | |

| COs | COURSE OUTCOME |
|----------------|---|
| CO 1 | Students can learn about the chemical properties and structure of organic compounds like terpenoids, alkaloids, steroids and flavones etc derived from plant materials. |
| CO 2 | Students can understand isolation, characterisation and laboratory synthesis of natural products. |
| CO 3 | Student can know the concept of HOMO and LUMO, and their influence in bond formation. |
| CO 4 | Students study the nature of double bonded compounds and the possible isomer arrived upon their rearrangement. |
| CO 5 | Knowledge of student will be enriched with green chemistry and various types of eco-friendly reactions could be conducted on their own. |
| Pre-requisites | |

|--|
| Direct |
| 1. Continuous Assessment Test I, II & Model 2. Assignment 3. End Semester Examinations |
| Indirect |
| 1. Course End Delivery |

| Content of the Syllabus | | | |
|-------------------------|---|---------|----|
| Unit - I | Terpenoids and Steroids | Periods | 15 |
| | Terpenes: classification, general structural elucidation, structural elucidation by chemical degradation and synthesis of α -pinene, camphor, zingiberene. Steroids: classification, structural elucidation of cholesterol (synthesis not required), stigmasterol (synthesis not required), structure and synthetic aspects of estrone and progesterone. | | |
| Unit - II | Alkaloids and Flavonoids | Periods | 15 |
| | Alkaloids: classification, general structural elucidation, structural elucidation by chemical degradation and synthesis of papaverine, quinine, morphine and reserpine. Flavones: introduction and Baker-Venkatraman synthesis - Flavanol: synthesis of quercetin – Isoflavones: synthesis of daidzein. | | |
| Unit - III | Anthocyanins and Vitamins | Periods | 15 |
| | Introduction to anthocyanins – synthesis of anthocyanins. structure and biological applications - uric acid, purine derivatives and xanthine bases Vitamins: introduction to fat and water soluble vitamins, structural elucidation of vitamin B6, vitamin B12, and vitamin K | | |
| Unit - IV | Pericyclic Reactions | Periods | 15 |
| | Electrocyclic reactions (butadiene-cyclobutene system), cyclo-addition reactions ((4 + 2) and (2+2)) systems, sigmatropic and cheletropic reactions, use of frontier molecular orbital and correlation diagrams, 1,3 and 1,5 - hydrogen shifts. Sigmatropic rearrangements: Claisen, Cope and oxy-Cope rearrangements. | | |
| Unit - V | Strategies for Synthesis | Periods | 15 |

| | |
|---------------|---|
| | Retrosynthetic analysis: synthons and synthetic equivalents, functional group interconversion - disconnection approach – one group C-X, two group C-X and one group C-C disconnections - chemoselectivity, umpolung - protection and deprotection : alcohols, carbonyls, carboxylic acids and amino functional groups |
| Total Periods | |
| 75 | |

| | |
|---------------------|---|

| PO 14 | Capability for mapping out the tasks of a team or an organization and setting direction formulating an inspiring vision building a team who can help achieve the vision motivating. | | | | | | | | | |
| PO 15 | Ability to acquire knowledge and skills including learning how to learn that are necessary for participating in learning activities throughout life through self paced. | | | | | | | | | |

| COs | COURSE OUTCOME |
|----------------|--|
| CO 1 | Students have the knowledge of application and properties of non aqueous solvents and formation of liquid and gaseous molecules. |
| CO 2 | Students can able understand the commercial application of Organometallic Chemistry & catalysis. |
| CO 3 | Students are enable to understand the basic of crystal structure, application of the analytical tools like XRD, AAS and PES tools in elucidating three dimensional structure of the inorganic molecules. |
| CO 4 | Students can know the importance of biologically important materials in our body. |
| CO 5 | Students will have enriched knowledge on porphyrin and other bioinorganic molecules. |
| Pre-requisites | |

| 1. Course End Delivery | |

| Content of the Syllabus | | | |
|-------------------------|---|---------|----|
| Unit - I | Boron compounds and Clusters Boron hydrides | Periods | 15 |
| | Inorganic chains - rings - cages and clusters - catenation - heterocatenation - intercalation chemistry - one dimensional conductor - isopolyanions - heteropolyanions - borazines - phosphazenes - phosphazene polymers - ring compounds of sulphur and nitrogen - homocyclic inorganic systems - cages - boron cage compounds - metal clusters - dinuclear clusters - trinuclear clusters - tetranuclear clusters - hexanuclear clusters - structural prediction of organometallic clusters. | | |
| Unit - II | Organometallic Chemistry & Catalysis | Periods | 15 |
| | Carbon donors - Alkyls and Aryls-preparation and properties; Carbonyls -18 electron rule, isolobal concept - application to structure of carbonyls (simple and polynuclear); Nitrosyls - bridging and terminal nitrosyls, bent and linear nitrosyls; dinitrogen complexes; Chain Carbon donors - Olefins, acetylene and allyl complexes - synthesis, structure and bonding; Cyclic Carbon donors - Metallocene - synthesis, structure and bonding (Ferrocene only). Hydrogenation of olefins (Wilkinson's catalyst); hydroformylation of olefins using Cobalt or Rhodium catalysts (oxo process); Oxidation of olefins to aldehydes and ketones (Wacker process); polymerization (Ziegler-Natta catalyst); Cyclo oligomerization of acetylene using Nickel catalyst (Reppé's catalyst); polymer bound catalysts. | | |
| Unit - III | Solid State Chemistry | Periods | 15 |
| | Space lattice - unit cell- crystal systems- elements of symmetry- space groups-Miller indices- crystal analysis- XRD - rotating crystal method- powder method - packing of atoms and ions in solids- Electrical properties of solids – Band theory, semiconductors, super conductors, theory of super conductivity – defects in solids - solid state electrolytes; magnetic properties of solids – dia, para, ferro, antiferro and ferrimagnetism; hysteresis; | | |

| | | | |
|------------------|---|---------|----|
| | Optical properties – solid – state lasers and Inorganic phosphors. Reactions in solid state and phase transitions – diffusion coefficient, diffusion mechanism, vacancy and interstitial diffusions, formation of spinels and inverse spinels; solid solutions. | | |
| Unit - IV | Atomic absorption, emission spectroscopy and Crystal Studies | Periods | 15 |
| | Atomic absorption spectroscopy and flame emission spectroscopy: Basic principles - flame characteristics - atomizers and burners- interference instrumentation and applications of AAS and FES. PES –theory of XPS, UPES-evaluation of ionization potential-chemical identification of elements – ESCA - Koopmann’s theorem-chemical shift - UPES, XPS of N ₂ , O ₂ , and HCl-evaluation of vibration constants from UPES-spin orbit coupling. | | |
| Unit - V | Bio-inorganic Chemistry | Periods | 15 |
| | Porphyrin ring system - Metalloporphyrins - Haemoglobin and Myoglobin-structures and work functions - other oxygen carriers - Cytochromes: Structure and work functions in respiration - Chlorophyll, structure - photo synthetic sequence - Sulphur proteins - (Non - Haemo iron protein) - Copper oxidizes - Blue copper proteins - Carboxyl peptidase A: Structure, function - Carbonic anhydrase: Inhibition and Poisoning - Corrin ring system - Vitamin B12, In vivo and in vitro nitrogen fixation - Molecular mechanism of ion transport across the membrane - Na and K ion pumps-Chelate therapy-cis-platin. | | |
| Total Periods | | | 75 |

| 20P3CH08 | CORE PAPER VIII: Quantum Chemistry and Thermodynamics | | | 5 | | | 05 | 25 | 75 | 100 |
| Course Objectives | To impart knowledge in the field of Quantum chemistry with applications. To enable the students to acquire knowledge on statistical thermodynamics. To understand the difference between classical and statistical thermodynamics | | | | | | | | | |
| POs | PROGRAMME OUTCOME | | | | | | | | | |
| PO 1 | Capable of demonstrating comprehensive knowledge and understanding of one or more disciplines that form a part of an undergraduate programme of study. | | | | | | | | | |
| PO 2 | Ability to express thoughts and ideas effectively in writing and orally Communicate with others using appropriate media confidently share ones views and express herself /himself. | | | | | | | | | |
| PO 3 | Capability to apply analytic thought to a body of knowledge analyse and evaluate evidence arguments claims beliefs on the basis of empirical evidence identify relevant assumptions or implications | | | | | | | | | |
| PO 4 | Capacity to extrapolate from what one has learned and apply their competencies to solve different kinds of non familiar problems rather than replicate curriculum content knowledge and apply ones learning to real life situations | | | | | | | | | |
| PO 5 | Ability to evaluate the reliability and relevance of evidence identify logical flaws and holes in the arguments of others analyse and synthesise data from a variety of sources draw valid Conclusions. | | | | | | | | | |
| PO 6 | A sense of inquiry and capability for asking relevant appropriate questions problematising synthesising and articulating ability to recognise cause and effect relationships define problems formulate hypotheses. | | | | | | | | | |
| PO 7 | Ability to work effectively and respectfully with diverse teams facilitate cooperative or coordinated effort on the part of a group and act together as a group in the interests of work efficiently as a member of a team. | | | | | | | | | |
| PO 8 | Ability to analyse interpret and draw conclusions from quantitative qualitative data and critically evaluate ideas, evidence and experiences from an open minded and reasoned perspective. | | | | | | | | | |
| PO 9 | Critical sensibility to lived experiences with self awareness and reflexivity of both self and society. | | | | | | | | | |
| PO 10 | Capability to use ICT in a variety of learning situations demonstrate ability to access evaluate and use a variety of relevant information sources and use appropriate software for analysis of data. | | | | | | | | | |
| PO 11 | Ability to work independently, identify appropriate resources required for a project and manage a project through to completion. | | | | | | | | | |
| PO 12 | Possess knowledge of the values and beliefs of multiple cultures and a global perspective. | | | | | | | | | |
| PO 13 | Ability to embrace moral ethical values in conducting one's life formulate a position argument about an ethical issue from multiple perspectives and use ethical practices in all work. | | | | | | | | | |
| PO 14 | Capability for mapping out the tasks of a team or an organization and setting direction formulating an inspiring vision building a team who can help achieve the vision motivating. | | | | | | | | | |
| PO 15 | Ability to acquire knowledge and skills including learning how to learn that are necessary for participating in learning activities throughout life through self paced. | | | | | | | | | |

| COs | COURSE OUTCOME | | | | | | | | | | | | | | |
|--|--|-----|-----|-----|-----|-------|-----|-----|-----|------|------|------|------|------|------|
| CO 1 | Students will be able to identify wave functions using operators and recognize functions and values. | | | | | | | | | | | | | | |
| CO 2 | Students will learn to perturbation and variation. | | | | | | | | | | | | | | |
| CO 3 | Students can learn the concept of chemical potential, fugacity of gases, Activity and activity coefficient | | | | | | | | | | | | | | |
| CO 4 | Students will learn the Objectives and various functions of Statistical thermodynamics | | | | | | | | | | | | | | |
| CO 5 | Students acquire deep knowledge about the concept of non equilibrium and applications | | | | | | | | | | | | | | |
| Pre-requisites | | | | | | | | | | | | | | | |

| 1. Course End Delivery |

| Content of the Syllabus | | | |
|-------------------------|--|---------|----|
| Unit - I | Quantum Chemistry-I | Periods | 15 |
| | Quantum theory: Inadequacy of classical mechanics, Black body Radiation – Experimental results of Black body radiation – Photoelectric effect – De – Broglie equation – Heisenberg uncertainty principle – Compton effect. Born's interpretation of wave function. Operators and commutation relations, Eigen functions and Eigen values. Quantum mechanical postulates – Schrodinger equation and its solution to the problem of a particle in one and three dimensional boxes, the harmonic oscillator, the rigid rotator and Hydrogen atom (Arriving solution for energy and wave function). The origin of quantum numbers and their physical significance – Probability distribution of electrons. Approximation methods – Perturbation and Variation methods – application of Variation method to Hydrogen and Helium atom. | | |
| Unit - II | Quantum Chemistry-II | Periods | 15 |
| | Theory of chemical bonding – Born – Oppenheimer approximation – LCAO – MO approximation for hydrogen molecule ion and Hydrogen – Valence Bond theory of Hydrogen molecule. Concept of Hybridization – sp, sp ² and sp ³ hybridization – Huckel Molecular orbital (HMO) theory for conjugated π- system – applications to simple systems (Ethylene and butadiene) – Physical Significance of HMO coefficients. Self consistent field approximation – Hartree and Hartree – Fock Self Consistent field theory – Slater type orbitals – Slater rules. | | |
| Unit - III | Thermodynamics - I | Periods | 15 |
| | Thermodynamics of non-ideal systems - Concept of chemical potential - Gibbs-Duhem equation - Variation of chemical potential with temperature and pressure - Concept of fugacity of gases - Determination by graphical method and from equation of state - Variation of fugacity with temperature and pressure - Fugacity coefficient - Activity and activity coefficient - Variation of activity of a gas with pressure and temperature. Determination of solvent activity by vapour pressure method and Cryoscopic method. | | |

| | | | |
|------------------|--|---------|----|
| Unit - IV | Statistical Thermodynamics | Periods | 15 |
| | Objectives of Statistical thermodynamics, concept of thermodynamical and mathematical probabilities, Distribution of distinguishable and non distinguishable particles. Maxwell-Boltzmann, Bose-Einstein and Fermi-Dirac statistics Law – comparisons. Partition Function – Translational, Vibrational, Rotational and Electronic partition Functions. Thermodynamic Functions in terms of partition Function, Statistical expression for equilibrium constant C. Calculation of Equilibrium Constant from Partition function (isotopic exchange equilibria and dissociation of diatomic molecules) Heat capacities of monoatomic crystals - Einstein s and Debye s theories of heat capacities. | | |
| Unit - V | Irreversible Thermodynamics | Periods | 15 |
| | Reversible and Irreversible process – Types of irreversibility of process. Postulates of Non-Equilibrium thermodynamics. Entropy production - heat flow and matter flow. Prologine’s principle of minimum entropy production. Forces, fluxes and Flows - Entropy production of forces and fluxes. Linear laws - Phenomenological law - Onsager reciprocal relation - proof by Microscopic reversibility - Electro kinetic phenomenon – Diffusion. Non-Equilibrium stationary states and Applications – Peltier effect. | | |
| Total Periods | | | 75 |

| 1. Course End Delivery |

| Content of the Syllabus | | | |
|-------------------------|--|---------|----|
| Unit - I | Basic Concepts | Periods | 15 |
| | Monomers, Polymers - natural, Semisynthetic, synthetic degree of polymerization, Linear, branched and network Polymers. Addition polymerization: Mechanism of Free radical, cationic and anionic polymerization. Condensation Polymerization in homogeneous and heterogeneous systems. | | |
| Unit - II | Co-ordination and co-polymerization | Periods | 15 |
| | Kinetics, mono and bimetallic mechanism of co-ordination polymers. Advantages of Zeigler-Natta catalyst. Co-polymerization: Block and graft co-polymers, Types of co-polymerization. Reactivity ratio. Cross-linked polymers and their applications. | | |
| Unit - III | Molecular Weight and Properties | Periods | 15 |
| | Importance of molecular weight – Average molecular weight - Number average, weight average and viscosity average molecular weights. Measurement of molecular weights-Viscosity, light scattering, osmotic and ultracentrifugation methods. Polymer structure and physical properties–crystalline melting point T _m . Glass transition temperature (T _g), Determination of T _g . Relationship between T _m and T _g . | | |
| Unit - IV | Polymer Processing | Periods | 15 |
| | Compounding, processing techniques: calendering, die casting, rotational casting, film casting, injection moulding, blow moulding extrusion, moulding, thermoforming, foaming, reinforcing and fibre spinning. Plastics, thermoplastic and thermosetting polymers. | | |
| Unit - V | Preparation and applications of Commercial Polymers | Periods | 15 |
| | Polyethylene, polyvinyl chloride, polyamides, polyesters, phenolic resins, epoxy resins. Natural rubber and rubbers derived from butadiene, Buna-S. Functional polymers, Fire retarding polymers and electrically conducting polymers. Biomedical polymers–contact lens, dental polymers, artificial heart, kidney, skin and blood cells. | | |
| Total Periods | | | 75 |

| PO 9 | Critical sensibility to lived experiences with self awareness and reflexivity of both self and society. | | | | | | | | | |
| PO 10 | Capability to use ICT in a variety of learning situations demonstrate ability to access evaluate and use a variety of relevant information sources and use appropriate software for analysis of data. | | | | | | | | | |
| PO 11 | Ability to work independently, identify appropriate resources required for a project and manage a project through to completion. | | | | | | | | | |
| PO 12 | Possess knowledge of the values and beliefs of multiple cultures and a global perspective. | | | | | | | | | |
| PO 13 | Ability to embrace moral ethical values in conducting one's life formulate a position argument about an ethical issue from multiple perspectives and use ethical practices in all work. | | | | | | | | | |
| PO 14 | Capability for mapping out the tasks of a team or an organization and setting direction formulating an inspiring vision building a team who can help achieve the vision motivating. | | | | | | | | | |
| PO 15 | Ability to acquire knowledge and skills including learning how to learn that are necessary for participating in learning activities throughout life through self paced. | | | | | | | | | |

| COs | COURSE OUTCOME |
|----------------|--|
| CO 1 | Students enable to understand various fermentation processes. |
| CO 2 | Acquire knowledge about different drugs and pharmaceutical aids. |
| CO 3 | Students know about the types of pigments and its use. |
| CO 4 | Students will analyze the applications of enamels, adhesives and explosives. |
| CO 5 | Students enable to understand importance of oils and fats for commercial applications. |
| Pre-requisites | |

|--|--|
| Direct | |
| 1. Continuous Assessment Test I, II & Model 2. Assignment 3. End Semester Examinations | |
| Indirect | |
| 1. Course End Delivery | |

| Content of the Syllabus | | | |
|-------------------------|---|---------|----|
| Unit - I | Fermentation | Periods | 15 |
| | Introduction - Historical - Conditions favourable for fermentation. Characteristics for enzymes - short accounts of some fermentation processes – Manufacture of beer – sprits- wines and vinegar. Ethyl alcohol from molasses- Preparation of wash distillation- Alcohol from waste sulphite liquor. | | |
| Unit - II | Drugs, diagnostic reagents and pharmaceuticals aids | Periods | 15 |
| | Drugs: Definition sources of drugs – some important drugs – aspirin – phenacetin – paracetamol – penicillin – chlormycetin – structure – properties – uses. Organic diagnostic reagents – definition – uses – sodium diatrizoate, phenol red Evans blue, indigo carmine, methylene blue, xylose, Histamine and sodium benzoate - properties – uses. Organic pharmaceuticals aids – Definition – preservatives – antioxidants – flavouring agents – colouring agents – sweetening agents - Emulsifying agents and stabilising agents – examples for each class – uses (structure and preparation not necessary) | | |
| Unit - III | Pigments | Periods | 15 |
| | Definition – composition, characteristics and uses of white pigments - white lead, Zinc oxide Lithopone and TiO ₂ – Blue pigments – Ultra marine blue, cobalt blue and iron blue – characteristics – uses. Red pigments – red lead –characteristics and uses. Green pigments – chrome green, Guigwet’s green and chromium oxide – characteristics and their uses- Black pigments- Yellow pigments. | | |
| Unit - IV | Adhesives, Enamels and Explosives | Periods | 15 |
| | Adhesives: definition – classification of adhesives – animal glue – preparation- uses – protein adhesives - starch adhesives – preparation – uses. Enamels: Introduction - Raw Materials – Manufacture and Applications Explosives: Introduction- Classification- preparation and uses of explosives- Nitro cellulose, TNT, Picric acid, Gun Powder, Cordite and Dynamite. | | |

| | | | |
|-----------------|---|---------|----|
| Unit - V | Oils and Fats | Periods | 15 |
| | Introduction – distinction, properties- classification- vegetable oils, Manufacture of cotton seed oil and soybean oil- Refining of crude vegetable oils- coconut oil, palm oil- peanut oil- olive oil- castor oil- safflower oil. Analysis of oils and fats: Definition and determination of Saponification value, Iodine value and RM value. | | |
| Total Periods | | | 75 |

| 20P4CH09 | CORE PAPER IX: Physical methods in Chemistry | | 5 | | | 05 | 25 | 75 | 100 | |
| Course Objectives | To make the students to understand the principles of vibrational and rotational spectroscopy. To acquire knowledge in the field of UV-Vis spectroscopy and its application to organic chemistry. | | | | | | | | | |
| POs | PROGRAMME OUTCOME | | | | | | | | | |
| PO 1 | Capable of demonstrating comprehensive knowledge and understanding of one or more disciplines that form a part of an undergraduate programme of study. | | | | | | | | | |
| PO 2 | Ability to express thoughts and ideas effectively in writing and orally Communicate with others using appropriate media confidently share ones views and express herself /himself. | | | | | | | | | |
| PO 3 | Capability to apply analytic thought to a body of knowledge analyse and evaluate evidence arguments claims beliefs on the basis of empirical evidence identify relevant assumptions or implications | | | | | | | | | |
| PO 4 | Capacity to extrapolate from what one has learned and apply their competencies to solve different kinds of non familiar problems rather than replicate curriculum content knowledge and apply ones learning to real life situations | | | | | | | | | |
| PO 5 | Ability to evaluate the reliability and relevance of evidence identify logical flaws and holes in the arguments of others analyse and synthesise data from a variety of sources draw valid Conclusions. | | | | | | | | | |
| PO 6 | A sense of inquiry and capability for asking relevant appropriate questions problematising synthesising and articulating ability to recognise cause and effect relationships define problems formulate hypotheses. | | | | | | | | | |
| PO 7 | Ability to work effectively and respectfully with diverse teams facilitate cooperative or coordinated effort on the part of a group and act together as a group in the interests of work efficiently as a member of a team. | | | | | | | | | |
| PO 8 | Ability to analyse interpret and draw conclusions from quantitative qualitative data and critically evaluate ideas, evidence and experiences from an open minded and reasoned perspective. | | | | | | | | | |
| PO 9 | Critical sensibility to lived experiences with self awareness and reflexivity of both self and society. | | | | | | | | | |
| PO 10 | Capability to use ICT in a variety of learning situations demonstrate ability to access evaluate and use a variety of relevant information sources and use appropriate software for analysis of data. | | | | | | | | | |
| PO 11 | Ability to work independently, identify appropriate resources required for a project and manage a project through to completion. | | | | | | | | | |
| PO 12 | Possess knowledge of the values and beliefs of multiple cultures and a global perspective. | | | | | | | | | |
| PO 13 | Ability to embrace moral ethical values in conducting one's life formulate a position argument about an ethical issue from multiple perspectives and use ethical practices in all work. | | | | | | | | | |
| PO 14 | Capability for mapping out the tasks of a team or an organization and setting direction formulating an inspiring vision building a team who can help achieve the vision motivating. | | | | | | | | | |
| PO 15 | Ability to acquire knowledge and skills including learning how to learn that are necessary for participating in learning activities throughout life through self paced. | | | | | | | | | |

| COs | COURSE OUTCOME |
|----------------|---|
| CO 1 | Students will learn about Electromagnetic radiation |
| CO 2 | Students can understand the importance |
| CO 3 | Students will learn about the theory of UV spectroscopy, Fluorescence Spectroscopy and its applications |
| CO 4 | Students will analyze theory and applications of NMR and EPR spectroscopy |
| CO 5 | Students will evaluate the molecular weight of the organic compounds |
| Pre-requisites | |

| Content of the Syllabus | | | |
|-------------------------|--|---------|----|
| Unit - I | Microwave spectra | Periods | 15 |
| | Introduction: Electromagnetic radiation, Interaction of light with matter, mechanism of absorption & emission of radiation. Rotational, vibrational, and electronic transitions in molecules; regions and representation of spectra. Micro wave Spectroscopy: Diatomic molecules as rigid rotors: rotational energy levels, intensity of spectral lines, selection rules, effect of isotopic substitution. Diatomic molecules as non-rigid rotors. Rotational spectra of polyatomic molecules – Linear and Symmetric top molecule. | | |
| Unit - II | Vibrational Spectra | Periods | 15 |
| | Vibrational Spectroscopy: Vibrating diatomic molecule: energy of diatomic molecules as simple harmonic and Anharmonic oscillator - energy levels, vibrational transitions, selection rules; Diatomic vibrating rotator: Born-Oppenheimer approximation, vibration-rotational spectra, selection rules; P, Q, R branches. Vibrations of polyatomic molecules: fundamental vibrations and its symmetry, normal modes of vibration, overtones and combination of bands. Raman Effect: Rayleigh and Raman scattering, Stokes and anti-Stokes lines, molecular polarizability, Raman selection rules. Raman spectra: rotational Raman spectra- linear molecules, symmetric top and spherical top molecules; vibrational Raman spectra-symmetry and Raman active vibrations, rule of mutual exclusion. | | |
| Unit - III | UV and fluorescence Spectroscopy | Periods | 15 |
| | UV-spectroscopy: Theory, Instrumentation, Beer-Lamberts Law, bands in UV-VIS spectrum. Electronic transitions – Types, selection rules, Characteristic absorption (λ_{\max} and ϵ_{\max}) Conjugated double bond – dienes, carbonyl compounds and aryl groups. Factors influencing absorption. Spectroscopic terms – Chromophore, Auxochrome, Bathochromic shift, Hypsochromic shift and Hypochromic shift and applications of UV. Fluorescence Spectroscopy – Principles, instrumentation and applications. | | |

| | | | |
|------------------|--|---------|----|
| Unit - IV | NMR and ESR Spectroscopy | Periods | 15 |
| | NMR Spectra: Theory, Instrumentation. Chemical shift - Factors affecting chemical shift, Shielding and deshielding mechanisms. Spin-spin coupling, Coupling constant – Geminal and Vicinal coupling constant, heteronuclear couplings, Nuclear Overhauser effect. Introduction to ¹³ C NMR, ¹⁹ F NMR, ³¹ P NMR and applications of ¹ H NMR. ESR Spectroscopy – Theory, derivative curves, g values, Hyperfine splitting, Isotropic and anisotropic systems and Applications | | |
| Unit - V | Mass and Mossbauer Spectroscopy | Periods | 15 |
| | Mass Spectroscopy: Theory, Instrumentation, Types of ions- Molecular ion, Fragment ion, rearrangement and Metastable ion, odd even ions. Molecular ion peak and Base peak. Determination of molecular formula - Nitrogen rule, ring rule - Isotopic abundance analysis - Fragmentation process: Retro Diels Alder rearrangement - McLattery rearrangement - Double bond and ring equivalence. Fragmentation (alcohol, hydrocarbon, carbonyl compounds and nitro compounds). Mossbauer Spectroscopy: Line width - Isomer shift - Quadrupole interactions - Magnetic interactions, Structural elucidation of iron tin complexes. | | |
| Total Periods | | | 75 |

| 1. Course End Delivery |

| Content of the Syllabus | | | |
|-------------------------|--|---------|----|
| Unit - I | Fundamentals of Environmental Chemistry | Periods | 15 |
| | Concept of environmental chemistry, Composition of atmosphere, vertical temperature and vertical structure of the atmosphere. Environmental pollution: Types and sources of Pollutants - air, water and soil pollution. Prevention and control of pollutions. . Biogeochemical cycles C, N, P, S and O. Biological control of chemical factors in the environment. | | |
| Unit - II | Water Chemistry | Periods | 15 |
| | Characteristics of water, Quality of natural water, quality requirements of portable water, organic, humic and colloidal material in water, chemical composition of water bodies, Commercial water purification method- reverse osmosis method-disinfection of water- purification method of water for industrial purpose- lime-soda process, ion exchange process, Zeolite process. Water pollution and its environmental impact, eutrophication, Water quality parameters: pH, conductivity, TDS, DO, BOD and COD. Role of water in the environment- Hydrological cycle. | | |
| Unit - III | Industrial Pollutants | Periods | 15 |
| | Polymers and Plastics - The classification - The characteristics - Environmental Implications of polymers and plastics - abatement procedures for polymers and plastics pollution. Asbestos- Structural characteristics of Asbestos - applications of asbestos - sources of asbestos in the environment - analysis of asbestos - effects of asbestos pollution - Mitigation of asbestos pollution. Polychlorinated Biphenyls The need - Fate of poly chlorinated Biphenyls in the Environment - Environmental Implications of Polychlorinated Biphenyls - Abatement procedures for poly chlorinated Biphenyls pollution. | | |
| Unit - IV | Agricultural Pollutants | Periods | 15 |

| | | | |
|-----------------|--|---------|----|
| | Fertilizers The classification - Environmental implications of fertilizers - Abatement procedures for fertilizers pollution - Eutrophication. Insecticides The classification - The characteristics - Environmental implications of insecticides - Abatement procedures for insecticides pollution - Bhopal Episode. Fungicides and Herbicides The need - The classification - The characteristics - Environmental Implications of Fungicides and Herbicides - Abatement procedures for fungicides and Herbicides pollution. | | |
| Unit - V | Waste Management and Recycling | Periods | 15 |
| | Sources and classification of waste. Waste management - Land filling - Incineration - Disposal of medicinal waste - New technique to treat industrial and farm effluents - Reduce, reuse and recycle - Wealth from waste recycling - Recycling technique - Utilizing agricultural waste - Energy Recovery from Waste - Municipal waste into road making - Electricity from tannery waste - Vermicomposting - biogas – Plastic recycling techniques - Waste water and its treatment recycling of sewage - Removal of hazardous wastes from contaminated metals. | | |
| Total Periods | | | 75 |

| 20P4CHE06 | ELECTIVE VI: Corrosion Principles, Protection and Monitoring | | | 5 | | | 04 | 25 | 75 | 100 |
| Course Objectives | To provide an understanding of the corrosion principles and engineering methods used to minimize and prevent the corrosion. Understanding various corrosion processes, protection methods and materials selection with practical examples. | | | | | | | | | |
| POs | PROGRAMME OUTCOME | | | | | | | | | |
| PO 1 | Capable of demonstrating comprehensive knowledge and understanding of one or more disciplines that form a part of an undergraduate programme of study. | | | | | | | | | |
| PO 2 | Ability to express thoughts and ideas effectively in writing and orally Communicate with others using appropriate media confidently share ones views and express herself /himself. | | | | | | | | | |
| PO 3 | Capability to apply analytic thought to a body of knowledge analyse and evaluate evidence arguments claims beliefs on the basis of empirical evidence identify relevant assumptions or implications | | | | | | | | | |
| PO 4 | Capacity to extrapolate from what one has learned and apply their competencies to solve different kinds of non familiar problems rather than replicate curriculum content knowledge and apply ones learning to real life situations | | | | | | | | | |
| PO 5 | Ability to evaluate the reliability and relevance of evidence identify logical flaws and holes in the arguments of others analyse and synthesise data from a variety of sources draw valid Conclusions. | | | | | | | | | |
| PO 6 | A sense of inquiry and capability for asking relevant appropriate questions problematising synthesising and articulating ability to recognise cause and effect relationships define problems formulate hypotheses. | | | | | | | | | |
| PO 7 | Ability to work effectively and respectfully with diverse teams facilitate cooperative or coordinated effort on the part of a group and act together as a group in the interests of work efficiently as a member of a team. | | | | | | | | | |
| PO 8 | Ability to analyse interpret and draw conclusions from quantitative qualitative data and critically evaluate ideas, evidence and experiences from an open minded and reasoned perspective. | | | | | | | | | |
| PO 9 | Critical sensibility to lived experiences with self awareness and reflexivity of both self and society. | | | | | | | | | |
| PO 10 | Capability to use ICT in a variety of learning situations demonstrate ability to access evaluate and use a variety of relevant information sources and use appropriate software for analysis of data. | | | | | | | | | |
| PO 11 | Ability to work independently, identify appropriate resources required for a project and manage a project through to completion. | | | | | | | | | |
| PO 12 | Possess knowledge of the values and beliefs of multiple cultures and a global perspective. | | | | | | | | | |
| PO 13 | Ability to embrace moral ethical values in conducting one's life formulate a position argument about an ethical issue from multiple perspectives and use ethical practices in all work. | | | | | | | | | |
| PO 14 | Capability for mapping out the tasks of a team or an organization and setting direction formulating an inspiring vision building a team who can help achieve the vision motivating. | | | | | | | | | |
| PO 15 | Ability to acquire knowledge and skills including learning how to learn that are necessary for participating in learning activities throughout life through self paced. | | | | | | | | | |

| COs | COURSE OUTCOME |
|----------------|--|
| CO 1 | Students will acquire sound knowledge about corrosion and its types |
| CO 2 | Students learn the importance of polarization and its causes |
| CO 3 | Students will acquire knowledge about corrosion monitoring techniques |
| CO 4 | Students will acquire knowledge about corrosion coating and prevention |
| CO 5 | Students will evaluate the efficiency of corrosion inhibitor |
| Pre-requisites | |

| 1. Course End Delivery | |

| Content of the Syllabus | | | |
|-------------------------|--|---------|----|
| Unit - I | Basic Concepts of corrosion | Periods | 15 |
| | Corrosion – Introduction – definition – consequences of corrosion. Theories of corrosion – dry corrosion – wet or electrochemical corrosion – difference. Corrosion rate expression. Forms of corrosion – Galvanic – crevice – pitting – intergranular – selective leaching – erosion – stress – hydrogen damage – their prevention. | | |
| Unit - II | Thermodynamics of corrosion | Periods | 15 |
| | Thermodynamics – Change of Gibbs free energy. Pourbaix diagram of water, iron and aluminium – limitations of Pourbaix diagram. Polarization – measurement – causes of polarization. Concentration polarization – activation polarization – resistance polarization (Basic ideas only). | | |
| Unit - III | Corrosion monitoring techniques | Periods | 15 |
| | Corrosion monitoring techniques – Weight loss method – hydrogen permeation studies – electrical resistance measurement – linear polarisation resistance – potentiodynamic and galvanodynamic polarization – electrochemical impedance spectroscopy. | | |
| Unit - IV | Corrosion prevention | Periods | 15 |
| | Corrosion prevention – material selection – change of environment – proper design – anodic and cathodic protection – application of coatings – types of coatings. Hot dipping – metal cladding – cementation – electroplating – surface or chemical conversion coating – anodising – vitreous or porcelain enamel coating – paints (Basic idea only). | | |
| Unit - V | Corrosion inhibitors | Periods | 15 |
| | Corrosion inhibitors – definition – types – chemical passivators – adsorption inhibitors – film forming inhibitors – vapour phase inhibitors – advantages of using inhibitors. Industrial application of inhibitors – inhibition of reinforcing steel in concrete, coal water slurries, cooling water system, acid solutions and oxygen scavengers. Green inhibition – definition. | | |
| Total Periods | | | 75 |

| Programme | M.Sc | Programme Code | PCH | | | Regulations | 2020-2022 | | | |
| Department | Chemistry | | | Semester | | | 4 | | | |
| Course Code | Course Name | | | Periods per Week | | | Credit | Maximum Marks | | |
| | | | | L | T | P | C | CA | ESE | Total |
| 20P4CHCP06 | CORE PRACTICAL II: Physical Chemistry Practical - II | | | | | 4 | 04 | 40 | 60 | 100 |
| Course Objectives | To apply the principles of phase rule, adsorption in the analysis of physical and chemical properties of the given compounds and develop laboratory skills and the ability to work with instruments independently. | | | | | | | | | |
| POs | PROGRAMME OUTCOME | | | | | | | | | |
| PO 1 | Capable of demonstrating comprehensive knowledge and understanding of one or more disciplines that form a part of an undergraduate programme of study. | | | | | | | | | |
| PO 2 | Ability to express thoughts and ideas effectively in writing and orally Communicate with others using appropriate media confidently share ones views and express herself /himself. | | | | | | | | | |
| PO 3 | Capability to apply analytic thought to a body of knowledge analyse and evaluate evidence arguments claims beliefs on the basis of empirical evidence identify relevant assumptions or implications | | | | | | | | | |
| PO 4 | Capacity to extrapolate from what one has learned and apply their competencies to solve different kinds of non familiar problems rather than replicate curriculum content knowledge and apply ones learning to real life situations | | | | | | | | | |
| PO 5 | Ability to evaluate the reliability and relevance of evidence identify logical flaws and holes in the arguments of others analyse and synthesise data from a variety of sources draw valid Conclusions. | | | | | | | | | |
| PO 6 | A sense of inquiry and capability for asking relevant appropriate questions problematising synthesising and articulating ability to recognise cause and effect relationships define problems formulate hypotheses. | | | | | | | | | |
| PO 7 | Ability to work effectively and respectfully with diverse teams facilitate cooperative or coordinated effort on the part of a group and act together as a group in the interests of work efficiently as a member of a team. | | | | | | | | | |
| PO 8 | Ability to analyse interpret and draw conclusions from quantitative qualitative data and critically evaluate ideas, evidence and experiences from an open minded and reasoned perspective. | | | | | | | | | |
| PO 9 | Critical sensibility to lived experiences with self awareness and reflexivity of both self and society. | | | | | | | | | |
| PO 10 | Capability to use ICT in a variety of learning situations demonstrate ability to access evaluate and use a variety of relevant information sources and use appropriate software for analysis of data. | | | | | | | | | |
| PO 11 | Ability to work independently, identify appropriate resources required for a project and manage a project through to completion. | | | | | | | | | |
| PO 12 | Possess knowledge of the values and beliefs of multiple cultures and a global perspective. | | | | | | | | | |
| PO 13 | Ability to embrace moral ethical values in conducting one's life formulate a position argument about an ethical issue from multiple perspectives and use ethical practices in all work. | | | | | | | | | |
| PO 14 | Capability for mapping out the tasks of a team or an organization and setting direction formulating an inspiring vision building a team who can help achieve the vision motivating. | | | | | | | | | |
| PO 15 | Ability to acquire knowledge and skills including learning how to learn that are necessary for participating in learning activities throughout life through self paced. | | | | | | | | | |

| COs | COURSE OUTCOME |
|----------------|---|
| CO 1 | Students will understand the breadth and concepts of physical chemistry. |
| CO 2 | Students will develop skills in procedures and instrumental methods applied in analytical and practical tasks of physical chemistry |
| CO 3 | Students will plan, conduct, review and report the experiment. |
| CO 4 | Students will analyze the possible errors in phase studies. |
| CO 5 | Students will evaluate the adsorption mechanism with time. |
| Pre-requisites | |

DEPARTMENT OF CHEMISTRY

MODEL QUESTION PAPER

| Programme(s) | Title of the Paper | Semester |
|-----------------|--|----------|
| M.Sc. CHEMISTRY | Natural Products, Pericyclic reactions and Retro synthesis | III |

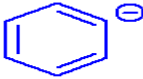

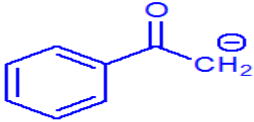

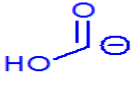

Time: 3 Hrs.

Max.Marks : 75

Section A
Answer all questions (20 x 1 = 20)

| | | | |
|---|---|-------------------|------|
| 1 | Zingiberene is example for | K1 | CO-1 |
| | A Mono terpenes | B Sesqui terpenes | |
| | C Di terpenes | D Tri terpenes | |
| 2 | Which one of the following is an example of bicyclic mono terpenes? | K2 | CO-1 |
| | A α -Pinene | B Meroquinine | |
| | C Citral | C None of these | |
| 3 | Which of the following is animal sterol Cholesterol is ----- compound | K2 | CO-1 |
| | A Mycoesterol | B Stigmasterol | |
| | C Cholesterol | D None of these | |
| 4 | How many angular methyl group present in oestrone? | K2 | CO-1 |
| | A 2 | B 3 | |
| | C 1 | D 4 | |
| 5 | Quinine on oxidation with chromic acid gives quininic acid and | K2 | CO-2 |
| | A Lutidine | B Conine | |
| | C Formic acid | D Papaverine | |
| 6 | Which of the following alkaloid having Isoquinoline group? | K1 | CO-2 |
| | A Quinine | B Conine | |
| | C Nicotine | D Papaverine | |
| 7 | Dihydro flavone is otherwise called_____ | K1 | CO-2 |

| | | | | | | |
|----|--|-------------------------|---|-------------------------|----|------|
| | A | Flavanoid | B | Isoflavone | | |
| | C | Flavanone | D | Chalcone | | |
| 8 | Flavonoids is a powerful _____ | | | | K1 | CO-2 |
| | A | Antioxidant agent | B | Antibiotic agent | | |
| | C | Chromones | D | Flavones | | |
| 9 | The fundamental nucleus in anthocyanines is _____ | | | | K1 | CO-3 |
| | A | Fluoroglucinol | B | Benzopyrylium chloride | | |
| | C | Phenolic acid | D | None of the above | | |
| 10 | Which one of the following is purine bases? | | | | K2 | CO-3 |
| | A | Adenine and Thymine | B | Thymine and Cytosine | | |
| | C | Cytosine and Guanine | D | Adenine and Guanine | | |
| 11 | Which of the following vitamins is also known as cobalamin? | | | | K1 | CO-3 |
| | A | Vitamin B ₄ | B | Vitamin B ₂ | | |
| | C | Vitamin B ₆ | D | Vitamin B ₁₂ | | |
| 12 | Which of the following is essential for the development of red blood cell? | | | | K1 | CO-3 |
| | A | Vitamin A | B | Vitamin C | | |
| | C | Vitamin B ₁₂ | D | Vitamin D | | |
| 13 | The electrocyclic reaction for ground state of hexatrienes ----- rotatory | | | | K3 | CO-4 |
| | A | Con | B | Dis | | |
| | C | Con or Dis | D | Cannot be predicted | | |
| 14 | The product of following reaction is | | | | K1 | CO-4 |
| | | | | | | |
| | A | | B | | | |
| | C | | D | | | |
| 15 | In a cyclo addition reaction, if both the bonds to a component are formed on the same face, the process is termed as | | | | K3 | CO-4 |
| | A | Suprafacial | B | Antarafacial | | |
| | C | Supra-suprafacial | D | Antara-antarafacial | | |
| 16 | | | | | K2 | CO-4 |
| | The above sigmatropic reaction is example of | | | | | |

| | | | | | | |
|---|---|--|---|--|---|------|
| | A | [1,4] | B | [1,4] | | |
| | C | [1,5] | D | [1,5] | | |
| 17 | The following species is best known as | | CHO^- | | K1 | CO-5 |
| | A | a1 species | B | d1 umpolung | | |
| | C | d2 species | D | a2 species | | |
| 18 | Which of the following statements best describes a synthon? | | | | K1 | CO-5 |
| | A | A synthetic reagent used in a reaction | B | A key intermediate in a reaction sequence | | |
| | C | A transition state involved in a reaction mechanism | D | A hypothetical structure that would result in a given reaction if it existed | | |
| 19 | Which of the following synthons is an example of Umpolung ? | | | | K1 | CO-5 |
| |  | |  | |  | |
| | A | | B | | D | |
| | C | | D | | | |
| 20 | Which of the following statements best describes a disconnection in retrosynthesis? | | | | K3 | CO-5 |
| | A | A disconnection involves a theoretical disconnection of a bond in a target structure in order to identify simpler structures that could be linked through the formation of that bond | B | A disconnection involves identifying stages where a bond is split in the corresponding synthesis | | |
| | C | A disconnection identifies retrosynthetic stages which would not be feasible in the corresponding synthesis | D | A disconnection describes the reaction conditions required to split a target structure into simpler molecules. | | |
| Section B | | | | | | |
| Answer All questions (5 x 5 = 25) | | | | | | |
| 21 | A | Describe the following synthesis, 1) Papaverine 2) Zingiberene | | | K2 | CO-1 |
| | | OR | | | | |
| | B | Explain the structural elucidation of α - pinene. | | | K1 | CO-1 |
| 22 | A | What are alkaloids? Explain its classification in brief. | | | K2 | CO-2 |
| | | OR | | | | |

| | | | | |
|---|---|--|----|------|
| | B | Explain about the Kostaneck synthesis of flavones | K3 | CO-2 |
| 23 | A | Describe the synthesis of anthocyanin in detail. | K3 | CO-3 |
| | | OR | | |
| | B | Describe the structural elucidation of vitamin B12 in brief. | K1 | CO-3 |
| 24 | A | Write a detailed note on cycloaddition | K2 | CO-4 |
| | | OR | | |
| | B | Explain the Claisen rearrangement with mechanism | K2 | CO-4 |
| 25 | A | Explain synthons with their synthetic equivalent. | K1 | CO-5 |
| | | OR | | |
| | B | Describe disconnection approach. | K2 | CO-5 |
| Section C | | | | |
| Answer ANY THREE Questions (3 x 10 = 30) | | | | |
| | | | | |
| 26 | | Explain the structural elucidation of cholesterol. | K4 | CO-1 |
| 27 | | What are alkaloids? Describe the structural elucidation of morphine in detail. | K3 | CO-2 |
| 28 | | Explain the structure and biological applications of anthocyanins in detail | K3 | CO-3 |
| 29 | | Explain the FMO method for analyzing an electrocyclic reactions with an example. | K3 | CO-4 |
| 30 | | Explain umpolung in carbonyls and amino functional group | K4 | CO-5 |

Time: 3 Hrs.

Max.Marks : 75

Section A

Answer all questions (20 x 1 = 20)

| | | | |
|---|--|--|------|
| 1 | The complete combustion of diborane is _____ | K1 | CO-1 |
| | A endothermi | B exothermic | |
| | C there is no change in energy | D Depends on the reaction | |
| 2 | Which of the following compound exists in liquid state? | K2 | CO-1 |
| | A Diborane | B Pentaborane | |
| | C Decaborane | C Borane | |
| 3 | 7(i)+ B(OCH ₃) ₃ → NaBH ₄ + 6(ii)+ 3(iii) Name the compounds i, ii, iii? | K2 | CO-1 |
| | A i.sodium hydride ii.sodium iii.methanol | B i.sodium ii.methanol iii.sodium hydride | |
| | C i.sodium ii.sodium hydride iii.methanol | D i.sodium hydride ii.methanol iii.sodium | |
| 4 | Which of the following is not used as raw material for production of boranes? | K2 | CO-1 |
| | A Methanol | B Sodium borohydride | |
| | C Glycol ether | D Mineral oil | |
| 5 | Which of the following is the neutral complex which follows the 18- electron rule? | K2 | CO-2 |
| | A (η ⁵ -C ₅ H ₅)Fe(CO) ₂ | B (η ⁵ -C ₅ H ₅) ₂ Mo(CO) ₃ | |
| | C (η ⁵ -C ₅ H ₅) ₂ Co | D (η ⁵ -C ₅ H ₅) ₂ Re(η ⁶ -C ₆ H ₆) | |
| 6 | How many M — M bonds are present in [Cp Mo(CO) ₃] ₂ ? | K1 | CO-2 |
| | A 1 | B 2 | |
| | C 0 | D 4 | |

| | | | | |
|----|---|--|----|------|
| 7 | Which of the following complex has a highest oxidation state of metal? | | K1 | CO-2 |
| | A $(\eta^6\text{-C}_6\text{H}_6)_2\text{Cr}$ | B $\text{Mn}(\text{CO})_5\text{Cl}$ | | |
| | C $\text{Na}_2[\text{Fe}(\text{CO})_4]$ | D $\text{K}[\text{Mn}(\text{C}_5)]$ | | |
| 8 | Which of following pair is not isolobal? | | K1 | CO-2 |
| | A $\text{Mn}(\text{CO})_5, \text{CH}_3$ | B $[\text{Fe}(\text{CO})_4], \text{O}$ | | |
| | C $\text{Mn}(\text{CO})_5, \text{Cl}$ | D $\text{Mn}(\text{CO})_5, \text{O}$ | | |
| 9 | The smallest repetitive unit of the crystal structure is known as | | K1 | CO-3 |
| | A atoms | B Compound | | |
| | C Unit cell | D Lattice | | |
| 10 | Crystals in which the number of the combinations of the symmetric molecule is limited to 32 is known as _____ | | K2 | CO-3 |
| | A Crystallographic unit cell | B Crystallographic point groups | | |
| | C Crystallographic crystals | D crystallographic atoms. | | |
| 11 | The point coordinates of the vertex just opposite to the origin are | | K1 | CO-3 |
| | A 000 | B 001 | | |
| | C 011 | D 111 | | |
| 12 | Example for dia-magnetic materials | | K1 | CO-3 |
| | A super conductors | B Alkali metals | | |
| | C Transition metals | D Ferrites | | |
| 13 | Which of the following is the principle of Atomic Absorption Spectroscopy? | | K3 | CO-4 |
| | A Radiation is absorbed by non-excited atoms in vapour state and are excited to higher states | B Medium absorbs radiation and transmitted radiation is measured | | |
| | C Colour is measured | D Colour is simply observed | | |
| 14 | In Atomic Absorption Spectroscopy, which of the following is the generally used radiation source? | | K1 | CO-4 |
| | A Tungsten lamp | B Xenon mercury arc lamp | | |
| | C Hydrogen or deuterium discharge lamp | D Hollow cathode lamp | | |

| | | | | |
|---|--|--|----|------------------------------------|
| 15 | ESCA gives sufficient chemical information upto a depth about_armstrong in metals. | | K3 | CO-4 |
| | A | 5-20 | B | 15-40 |
| | C | 40-100 | D | 100-200 |
| 16 | Discrete electrons cannot be observed in electron ionization of an atom due to which of the following reasons? | | K2 | CO-4 |
| | A | Environmental disturbances | B | Same mass |
| | C | Same charge | D | the electron- electron interaction |
| 17 | Oxidation state of Iron in haemoglobin is | | K1 | CO-5 |
| | A | +1 | B | +2 |
| | C | +3 | D | None |
| 18 | The ligand system present in vitamin B ₁₂ | | K1 | CO-5 |
| | A | porphyrin | B | Corrin |
| | C | Phthalocyanin | D | crown ether |
| 19 | Central metal atom/ion in chlorophyll is | | K1 | CO-5 |
| | A | Iron | B | Manganese |
| | C | Magnesium | D | Zinc |
| 20 | What are the complications that occur in severe thalassemia disease? | | K3 | CO-5 |
| | A | Bone deformities | B | Enlarged spleen |
| | C | Heart problems | D | All of the above |
| Section B | | | | |
| Answer All questions (5 x 5 = 25) | | | | |
| 21 | A | Explain the ring compounds of sulphur and nitrogen | K2 | CO-1 |
| | OR | | | |
| | B | Distinguish between isopolyanions - heteropolyanions | K1 | CO-1 |
| 22 | A | Describe the synthesis and structure of metallocene. | K2 | CO-2 |
| | OR | | | |
| | B | Express your ideas about chain carbon donar and cyclic carbon donar. | K3 | CO-2 |
| 23 | A | Write notes on space groups and miller indices. | K3 | CO-3 |
| | OR | | | |

| | | | | |
|---|---|---|----|------|
| | B | Explain magnetic properties of solids. | K1 | CO-3 |
| 24 | A | Describe about principle of AAS. | K2 | CO-4 |
| | | OR | | |
| | B | Write notes on Koopman's theorem and chemical shift. | K2 | CO-4 |
| 25 | A | Explain the structure and work function of haemoglobin. | K1 | CO-5 |
| | | OR | | |
| | B | Describe about chelate therapy. | K2 | CO-5 |
| Section C | | | | |
| Answer ANY THREE Questions (3 x 10 = 30) | | | | |
| | | | | |
| 26 | | Explain in detail about metal clusters and its types | K4 | CO-1 |
| 27 | | Write the hydroformylation of olefins using Cobalt or Rhodium catalysts | K3 | CO-2 |
| 28 | | Explain defects in solids. | K3 | CO-3 |
| 29 | | Discuss theory and applications of PES. | K3 | CO-4 |
| 30 | | Explain the structure and work functions of Chlorophyll. | K4 | CO-5 |

MODEL QUESTION PAPER

| Programme(s) | Title of the Paper | Semester |
|------------------|--------------------------------------|----------|
| M.Sc., Chemistry | Quantum Chemistry and Thermodynamics | III |

Time: 3 Hrs.

Max. Marks : 75

Section A

Answer all questions (20 x 1 = 20)

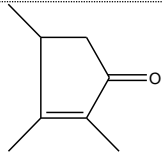

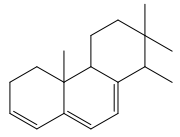

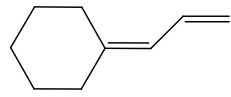

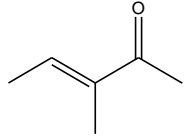

| | | | |
|---|--|-----------------------|------|
| 1 | Out of these which one is angular variables | K1 | CO-1 |
| | A φ, θ | B θ, r | |
| | C φ, r | D r, R | |
| 2 | $\int \psi \psi^* d\tau = 1$, eigen functions are | K1 | CO-1 |
| | A real | B normalized | |
| | C orthogonal | D continuous | |
| 3 | If a particle is in 1D box and $n=3$, the E is | K1 | CO-1 |
| | A $h^2/8Ma^2$ | B $12h^2/8Ma^2$ | |
| | C $9h^2/8Ma^2$ | D $4h^2/8Ma^2$ | |
| 4 | $Y_{lm}(\theta, \varphi)$ are called | K1 | CO-1 |
| | A quantum number | B wave function | |
| | C reduced mass | D spherical harmonics | |
| 5 | $\bar{E} - E_0$ is always | K1 | CO-2 |
| | A positive | B zero | |
| | C negative | D constant | |
| 6 | The integral S_{ab} is called | K1 | CO-2 |
| | A coulomb integral | B overlap integral | |
| | C resonance integral | D secular integral | |
| 7 | The energy level E_4 of benzene molecule is | K1 | CO-2 |
| | A $2\alpha - \beta$ | B $\alpha - 2\beta$ | |
| | C $\alpha - \beta$ | D $\alpha + \beta$ | |
| 8 | \hat{F} denotes | K1 | CO-2 |
| | A linear operator | B angular operator | |

| | | | | |
|----|--|-----------------------------|----|------|
| | C Hermitian operator | D Fock operator | | |
| 9 | Fugacity was introduced by | | K1 | CO-3 |
| | A Duhem | B Morgan | | |
| | C Lewis | D Gibbs | | |
| 10 | Gibbs Helmholtz equation of 'T' is | | K1 | CO-3 |
| | A \bar{H}/T^2 | B $-\bar{H}/T^2$ | | |
| | C \bar{H}/T | D $-\bar{H}/T$ | | |
| 11 | The quantity H_o-H represents | | K1 | CO-3 |
| | A ideal heat of formation | B ideal heat of fusion | | |
| | C ideal heat of vaporization | D ideal heat of evaporation | | |
| 12 | C_p in Kirchoff's law represents | | K1 | CO-3 |
| | A current potential | B constant | | |
| | C energy | D heat capacity | | |
| 13 | The equation for the evaluation of β in M.B. distribution law is | | K1 | CO-4 |
| | A $\beta = 1/kT$ | B $\beta = -1/kT$ | | |
| | C $\beta = kT$ | D $\beta = 2/kT$ | | |
| 14 | The vibrational energy levels of a diatomic are given by | | K1 | CO-4 |
| | A $E_n = (n + 1/2) hv$ | B $E_n = (n + 1) hv$ | | |
| | C $E_n = (n + 2) hv$ | D all the above | | |
| 15 | What is the rotational partition function of H_2 at 300 K? | | K1 | CO-4 |
| | A 1.923 | B 1.723 | | |
| | C 1.823 | D 1.623 | | |
| 16 | A partition function can be used to calculate | | K1 | CO-4 |
| | A Free energy | B Enthalpies | | |
| | C Entropies | D none of these | | |
| 17 | The essential contribution to the thermodynamics of the non-equilibrium systems was brought by | | K1 | CO-5 |
| | A Fermi | B Einstein | | |
| | C Pokrovskii | D Prigogine | | |

| | | | | |
|---|--|--|----|-----------------------------|
| 18 | Non-equilibrium thermodynamics is concerned with transport processes and | | K1 | CO-5 |
| | A | energy of chemical reactions | B | rates of chemical reactions |
| | C | frequency | D | state variables |
| 19 | The thermodynamic study of non-equilibrium steady states, in which entropy production and some flows are | | K1 | CO-5 |
| | A | Zero | B | Non-zero |
| | C | one | D | none of these |
| 20 | The entropy (S) is a function of the collection of | | K1 | CO-5 |
| | A | Intensive variable | B | Massieu potential |
| | C | extensive quantities | D | extended Massieu function |
| Section B | | | | |
| Answer All questions (5 x 5 = 25) | | | | |
| 21 | A | Explain the postulates of quantum mechanics. | | K2 CO-1 |
| OR | | | | |
| | B | Illustrate eigen value and eigen function. | | K2 CO-1 |
| 22 | A | Write a note on self consistent field approximation. | | K2 CO-2 |
| OR | | | | |
| | B | Give the application of VB theory to hydrogen molecule. | | K2 CO-2 |
| 23 | A | Find out the fugacity of a real gas by graphical method. | | K2 CO-3 |
| OR | | | | |
| | B | Illustrate Gibbs Duhem equation. | | K2 CO-3 |
| 24 | A | Write a brief note on vibrational partition function. | | K2 CO-1 |
| OR | | | | |
| | B | Discuss about distribution of distinguishable and non distinguishable particles. | | K2 CO-1 |
| 25 | A | Justify the entropy production in heat flow and matter flow. | | K2 CO-2 |
| OR | | | | |
| | B | Describe in detailed about non-equilibrium stationary states. | | K2 CO-2 |
| Section C | | | | |
| Answer ANY THREE Questions (3 x 10 = 30) | | | | |
| 26 | | Prove and derive a S.E. for application of perturbation method to H atom. | | K3 CO-1 |
| 27 | | Explain HMO theory to ethylene system. | | K4 CO-2 |
| 28 | | Determine the fugacity of a real gas by equation of state. | | K5 CO-3 |
| 29 | | Derive and explain Fermi-Dirac statistics law. | | K3 CO-1 |
| 30 | | Verify Onsager reciprocal relation using electro kinetic phenomenon. | | K4 CO-2 |

| | | | | | | |
|----|---|--------------------------------------|---|--|----|------|
| | C | R branch lines | D | P branch lines | | |
| 8 | $\epsilon_J = BJ(J+1) - DJ^2(J+1)^2$, here D denotes | | | | K1 | CO-2 |
| | A | distortion constant | B | Boltzmann's constant | | |
| | C | rotational constant | D | centrifugal distortion constant | | |
| 9 | UV spectroscopy is useful for the detection of | | | | K1 | CO-3 |
| | A | functional group | B | extent of conjugation | | |
| | C | geometrical isomers | D | all of these | | |
| 10 | The energy difference between π and π^* is kcal/mole | | | | K1 | CO-3 |
| | A | 186 | B | 176 | | |
| | C | 156 | D | 136 | | |
| 11 | An auxochrome is one which is | | | | K1 | CO-3 |
| | A | colour enhancing | B | atom with lone pair of electrons | | |
| | C | extending conjugation | D | all of these | | |
| 12 | The main advantage of fluorescence over UV-Vis spectroscopy is | | | | K1 | CO-3 |
| | A | Its sensitivity | B | Its compatibility with separation techniques | | |
| | C | Its compatibility with most analytes | D | None of the above | | |
| 13 | NMR spectra are observed in region | | | | K1 | CO-4 |
| | A | radio frequency | B | microwave | | |
| | C | UV/Vis | D | X-ray | | |
| 14 | Which of the following solvents cannot be used in NMR spectroscopy? | | | | K1 | CO-4 |
| | A | CCl_4 | B | CS_2 | | |
| | C | CHCl_3 | D | $(\text{CCl}_3)_2\text{C}=\text{O}$ | | |
| 15 | Vicinal F-F coupling ranges from cps | | | | K1 | CO-4 |
| | A | 43-370 | B | 0-58 | | |
| | C | 0-39 | D | 42-80 | | |
| 16 | ESR is used to control the state of electron spin quits in | | | | K1 | CO-4 |
| | A | diamond | B | gallium | | |
| | C | silicon | D | all the above | | |
| 17 | The molecular ion peak is usually intense for | | | | K1 | CO-5 |
| | A | aromatic compounds | B | conjugated olefins | | |
| | C | alcohols | D | neoalkanes | | |
| 18 | In case of polynuclear hydrocarbons, the base peak appears | | | | K1 | CO-5 |

| | | | | | | |
|---|---|--|---|---------------------------|----|------|
| | A | as parent ion peak | B | at 91 due to tropyium ion | | |
| | C | at 77 due to phenylcation | D | None of these | | |
| 19 | | McLafferty rearrangement base peak in mass spectrum is usually the base peak for | | | K1 | CO-5 |
| | A | aldehydes | B | ketones | | |
| | C | acids | D | all of these | | |
| 20 | | Mossbauer Spectroscopy associates with rays | | | K1 | CO-5 |
| | A | radio | B | gamma | | |
| | C | X-ray | D | Cosmic | | |
| Section B | | | | | | |
| Answer All questions (5 x 5 = 25) | | | | | | |
| 21 | A | Write a brief note on vibrational partition function. | | | K2 | CO-1 |
| OR | | | | | | |
| | B | Discuss about distribution of distinguishable and non distinguishable particles. | | | K2 | CO-1 |
| 22 | A | Justify the entropy production in heat flow and matter flow. | | | K2 | CO-2 |
| OR | | | | | | |
| | B | Describe in detailed about non-equilibrium stationary states. | | | K2 | CO-2 |
| 23 | A | List out and explain bands in UV-Vis spectrum. | | | K2 | CO-3 |
| OR | | | | | | |
| | B | Explain the principles and applications of fluorescence spectroscopy. | | | K2 | CO-3 |
| 24 | A | Write a detailed note on absorption and emission spectrum. | | | K2 | CO-4 |
| OR | | | | | | |
| | B | Describe rotational, vibrational and electronic spectra. | | | K2 | CO-4 |
| 25 | A | Draw and explain the energy of diatomic molecule. | | | K2 | CO-5 |
| OR | | | | | | |
| | B | Explain the rotational Raman spectra of symmetric top molecules. | | | K2 | CO-5 |
| Section C | | | | | | |
| Answer ANY THREE Questions (3 x 10 = 30) | | | | | | |
| 26 | | Draw and derive the energy equation for rigid linear diatomic molecules. | | | K3 | CO-1 |
| 27 | | Justify the pure rotational Raman spectra of linear molecules. | | | K4 | CO-2 |
| 28 | | Calculate λ_{\max} for the following compounds. (i) (ii) | | | K5 | CO-3 |

| | | | | |
|----|--|--|----|------|
| | |   | | |
| | | <p>(iii)</p>  <p>(iv)</p>  | | |
| 29 | | Define chemical shift. What are the factors affecting chemical shift? | K4 | CO-4 |
| 30 | | Draw and explain the components of mass spectrophotometer. | K3 | CO-5 |

MODEL QUESTION PAPER

| Programme(s) | Title of the Paper | Semester |
|-----------------|-------------------------|----------|
| M.Sc. Chemistry | Environmental Chemistry | IV |

Time: 3 Hrs.

Max.Marks : 75

Section A

Answer all questions (20 x 1 = 20)

| | | | | |
|---|---|--------------------|----|-------------------|
| 1 | Which of the following is produced when electrical discharges pass through oxygen in air? | | K1 | CO-1 |
| | A | Ozone | B | Methane |
| | C | CFCs | D | Lead compounds |
| 2 | Temperature of outer mesosphere is | | K1 | CO-1 |
| | A | 93°C | B | -93°C |
| | C | 5°C | D | -5°C |
| 3 | Disease caused by eating fish found in water contaminated with industrial waste having mercury is | | K1 | CO-1 |
| | A | Minamata disease | B | Brights disease |
| | C | Hashimotos disease | D | Osteosclerosis |
| 4 | Which of the following play significant role in depletion of ozone layer? | | K2 | CO-1 |
| | A | Oxides of nitrogen | B | Oxides of carbon |
| | C | Oxides of sulphur | D | None of the above |
| 5 | The optimum value in natural water is _____ | | K1 | CO-2 |
| | A | 2-4ppm | B | 4-7ppm |
| | C | 4-6ppm | D | 2-7ppm |
| 6 | By aerobic process _____ of biodegradable water is converted into the biomass. | | K1 | CO-2 |
| | A | 10% | B | 30% |
| | C | 50% | D | 75% |
| 7 | Reacting the water with _____ removes the odour due to the phenols. | | K2 | CO-2 |
| | A | KMnO ₄ | B | MnO ₄ |
| | C | Potassium | D | Magnesium |

| | | | | |
|----|--|--|----|--|
| 8 | Bio-chemical oxygen demand (BOD) for the first 20 days is generally referred to | | K1 | CO-2 |
| | A | Initial demand | B | First stage demand |
| | C | Carbonaceous demand | D | All of these |
| 9 | Plastics enter the marine environment primarily by | | K2 | CO-3 |
| | A | being dumped or lost there | B | debris carried in runoff |
| | C | washing out of landfills | D | none of the answers are correct |
| 10 | Which of the following is a health hazard often found in kitchen cabinets and furniture? | | K2 | CO-3 |
| | A | Mold | B | Radon |
| | C | Asbestos | D | Formaldehyde |
| 11 | Polychlorinated biphenyls (PCBs), affecting | | K1 | CO-3 |
| | A | Estrogen metabolism | B | Blood Circulation |
| | C | Cell membrane | D | Biodegradable |
| 12 | Polychlorinated biphenyls' are by products of plastics, lubricants, rubber and | | K2 | CO-3 |
| | A | Paper production | B | Wood production |
| | C | Steel production | D | All of above |
| 13 | What is impact of overuse of inorganic fertilizers? | | K1 | CO-4 |
| | A | High level of nitrates & Eutrophications | B | Salinization |
| | C | Desalinization | D | Increase soil Fertility |
| 14 | Costly and harmful pesticides can be replaced by | | K1 | CO-4 |
| | A | Artificial Predators | B | Natural Predators |
| | C | Small Animals | D | Weeds |
| 15 | What are impacts of over cultivation & over grazing? | | K2 | CO-4 |
| | A | Soil Erosion, Degradation, Desertification | B | Desertification & Salinization |
| | C | Soil erosion & Salinization | D | Eutrophication |
| 16 | If water containing DDT (dichloro-diphenyl-trichloroethane: C ₁₄ H ₉ O ₅) is fed upon by cattle, it will | | K2 | CO-4 |
| | A | get stored in the liver | B | get stored in the fatty tissues of animals |
| | C | be excreted out with urine | D | get stored in the muscle fibers |
| 17 | The simplest and most common method used in the cities is to collect and dump the waste in a ____ | | K1 | CO-5 |
| | A | landfill | B | river |
| | C | ocean | D | any of the above |

| | | | | | | |
|---|---|---|---|-----------------------------------|----|------|
| 18 | Which of the below is not an idea behind solid waste management? | | | | K2 | CO-5 |
| | A | Control of waste generation | B | Storage and collection | | |
| | C | Disposal | D | Stop waste generation | | |
| 19 | Under which rule of Government, guidelines for solid waste management are followed today? | | | | K1 | CO-5 |
| | A | Municipal Solid Waste Rules, 2000 | B | Municipal Solid Waste Rules, 2016 | | |
| | C | Solid Waste Rules, 2000 | D | Solid Waste Rules, 2016 | | |
| 20 | Which gas produced in open dumps from the decomposition of biodegradable waste? | | | | K2 | CO-5 |
| | A | Ethane | B | Methane | | |
| | C | Propene | D | Ethene | | |
| Section B | | | | | | |
| Answer All questions (5x 5 = 25) | | | | | | |
| 21 | A | Explain the terms of chemical potential and chemical equilibria in environmental Concept. | | | K2 | CO-1 |
| | | OR | | | | |
| | B | Write short notes on fundamentals of environmental chemistry | | | K2 | CO-1 |
| 22 | A | Discuss the detrimental effects of inorganic pollutants in water. | | | K3 | CO-2 |
| | | OR | | | | |
| | B | Explain redox potential in water chemistry. | | | K3 | CO-2 |
| 23 | A | Write a short note on Polychlorinated Biphenyls. | | | K2 | CO-3 |
| | | OR | | | | |
| | B | Write a note on sources of asbestos in the environment. | | | K2 | CO-3 |
| 24 | A | Write the short notes on Environmental Implications of Fungicides and Herbicides. | | | K3 | CO-4 |
| | | OR | | | | |
| | B | Explain the Environmental implications of Insecticides. | | | K3 | CO-4 |
| 25 | A | Write notes on Municipal waste into road making. | | | K4 | CO-5 |
| | | OR | | | | |
| | B | Explain about Waste management. | | | K4 | CO-5 |
| Section C | | | | | | |
| Answer ANY THREE Questions (3 x 10 = 30) | | | | | | |
| 26 | | Explain the sample techniques for air, water and soil in Environmental chemistry. | | | K4 | CO-1 |
| 27 | | What are COD and BOD? Explain with suitable method to calculate. | | | K4 | CO-2 |
| 28 | | Explain the Environmental Implications of Polymers and Plastics. | | | K2 | CO-3 |

| | | | | |
|----|--|---|----|------|
| 29 | | Explain the Abatement procedures for fungicides and Herbicides pollution. | K4 | CO-4 |
| 30 | | Write the notes on the following (i) Utilizing agricultural waste (ii) Wealth from waste. | K4 | CO-5 |

VIVEKANANDHA COLLEGE OF ARTS AND SCIENCES COLLEGE FOR WOMEN

DEPARTMENT OF CHEMISTRY

MODEL QUESTION PAPER

| Programme(s) | Title of the Paper | Semester |
|-----------------|---|----------|
| M.Sc. CHEMISTRY | Corrosion Principles, Protection and Monitoring | IV |

Time: 3 Hrs.

Max.Marks : 75

Section A
Answer all questions (20 x 1 = 20)

| | | | | |
|---|---|---|----|---------------------------------------|
| 1 | What is mechanism of dry corrosion | | K1 | CO-1 |
| | A | Absorption | B | Electrochemical theory |
| | C | Differential solubility | D | B & C |
| 2 | Which of the following factors affect the corrosion rate of the metal? | | K2 | CO-1 |
| | A | Relative surface area of an cathode and anode | B | Nature of the metal oxide layer |
| | C | Purity of metal | C | All of these |
| 3 | The cathodic reaction that occurs during corrosion in oxygenated acidic solution is | | K2 | CO-1 |
| | A | $2H^+ + 2e^- \rightarrow H_2$ | B | $4H^+ + 4e^- + O_2 \rightarrow 4OH^-$ |
| | C | $2H_2O + 2e^- \rightarrow 2H_2 + 2OH^-$ | D | $2H_2O + 2e^- \rightarrow 2OH^-$ |
| 4 | Which theory explains the oxidation of metals? | | K2 | CO-1 |
| | A | Collision theory | B | Molecular orbital theory |
| | C | Wagner theory | D | Mixed potential theory |
| 5 | Which of the following materials will undergo corrosion | | K2 | CO-2 |
| | A | Metals | B | Metals and non metals |
| | C | Ceramics and plastics | D | All of the above |
| 6 | Which of the following subjects are important in controlling the corrosion? | | K1 | CO-2 |
| | A | Thermodynamics | B | Electrochemistry |
| | C | Both | D | Materials characterization |

| | | | | |
|----|--|--|----|--|
| 7 | What type of protection is galvanizing ? | | K1 | CO-2 |
| | A | Physical protection | B | Sacrificial protection |
| | C | Both of the above | D | None of the above |
| 8 | The following factors will play vital role in corrosion processes | | K1 | CO-2 |
| | A | Temperature | B | Solute concentration |
| | C | Both | D | None |
| 9 | Which of the following is correct regarding polarization ? | | K1 | CO-3 |
| | A | It is the deviation from equilibrium potential | B | It results from the change in net current flow |
| | C | Magnitude in terms of over voltage | D | It is the deviation from equilibrium potential that occurred due to change in current flow and its magnitude is measured in terms of overvoltage |
| 10 | What is depicted in the given figure? | | K2 | CO-3 |
| | | | | |
| | A | Concentration polarization of hydrogen-hydrogen io | B | Resistance polarization of hydrogen-hydrogen io |
| | C | Activation polarization of hydrogen-hydrogen ion | D | Both activation and concentration polarization of hydrogen-hydrogen io |
| 11 | Which of the following is the controlling factor of Activation polarization? | | K1 | CO-3 |
| | A | The activation energy of a reaction | B | Diffusion of ions in the solution |

| | | | | | | |
|---|---|---|---|--|------|--|
| | C | The temperature of a solution | D | The velocity of a solution | | |
| 12 | What is the formula to calculate rate of oxidation or rate of reduction during equilibrium? | | | K1 | CO-3 | |
| | A | $r_0=r_R=i_0/nF$ | B | $r_0=r_R=i_0/nF$ | | |
| | C | $r_0=r_R=i_0n/F$ | D | $r_0=r_R=nF/i_0$ | | |
| 13 | --- is used for coating of low melting point metals such as Zn,Sn,Pb,Al on Fe,steel and Cu | | | K3 | CO-4 | |
| | A | Hot dipping | B | Anodic coating | | |
| | C | Cathodic coating | D | Galvanizing | | |
| 14 | --- is the process of coating of Fe or steel with Zinc is called | | | K1 | CO-4 | |
| | A | Tinning | B | Hot dipping | | |
| | C | Galvanizing | D | None of these | | |
| 15 | ---- Coating is non toxic in nature | | | K3 | CO-4 | |
| | A | Sn | B | Zn | | |
| | C | Fe | D | Cu | | |
| 16 | Corrosion can be prevented by | | | K2 | CO-4 | |
| | A | Applying coating that acts as a barrier | B | Materials react | | |
| | C | Forms an oxide layer | D | None of these | | |
| 17 | The oxide coating around aluminum | | | K1 | CO-5 | |
| | A | Protects the metal from further corrosion | B | Iron only will rust | | |
| | C | More reactive metal than iron | D | Iron will not rust | | |
| 18 | In galvanizing iron the Zinc reacts instead of iron and therefore be | | | K1 | CO-5 | |
| | A | Iron will not rust | B | Protect the metal from further corrosion | | |
| | C | Corrosion can be prevented | D | Corroded | | |
| 19 | --- are used as corrosion inhibitors of iron and steel in aqueous solution s | | | K1 | CO-5 | |
| | A | Phosphates | B | Chromates | | |
| | C | Sulphates | D | Bi carbonates | | |
| 20 | Identify the group which is not used as anodic inhibitor | | | K3 | CO-5 | |
| | A | Chromates | B | phosphates | | |
| | C | Sulphates | D | Tungstates | | |
| Section B | | | | | | |
| Answer All questions (5 x 5 = 25) | | | | | | |

| | | | | |
|---|---|---|----|------|
| 21 | A | Define corrosion. What are the consequences of corrosion ? | K2 | CO-1 |
| | | OR | | |
| | B | What are the differences between chemical (dry corrosion) and electrochemical (wet corrosion) | K1 | CO-1 |
| 22 | A | Explain the Thermodynamics theory of corrosion. | K2 | CO-2 |
| | | OR | | |
| | B | What is meant by polarization ?how it can be measured ? | K3 | CO-2 |
| 23 | A | Explain corrosion weight loss method in detail. | K3 | CO-3 |
| | | OR | | |
| | B | What is electrochemical impedance spectroscopy. | K1 | CO-3 |
| 24 | A | Discuss the various factors influencing rate of corrosion and their prevention methods. | K2 | CO-4 |
| | | OR | | |
| | B | Explain the following 1. Hot dipping 2.Metal cladding | K2 | CO-4 |
| 25 | A | What is vapour phase inhibitors? Give examples. | K1 | CO-5 |
| | | OR | | |
| | B | Explain the inhibition of reinforcement of concrete steel in water environment. | K2 | CO-5 |
| Section C | | | | |
| Answer ANY THREE Questions (3 x 10 = 30) | | | | |
| 26 | | What do you mean electrochemical corrosion? Explain the cathodic and anodic corrosion mechanism. | K4 | CO-1 |
| 27 | | Explain Pourbaix diagram of water, iron and aluminium in detail. What are its limitations? | K3 | CO-2 |
| 28 | | Discuss briefly about potentional dynamic and galvanodynamic polarization techniques. | K3 | CO-3 |
| 29 | | What do you mean by cathodic protection? Discuss the sacrificial anodic protection and impressed current cathodic protection methods. | K3 | CO-4 |
| 30 | | What are corrosion inhibitors? Explain anodic and cathodic inhibitors in details. | K4 | CO-5 |

MODEL QUESTION PAPER

| Programme(s) | Title of the Paper | Semester |
|---------------|---|----------|
| M.Sc. PHYSICS | Elective paper: Applied Polymer Chemistry | III |

Time: 3 Hrs.

Max.Marks :75

Section A

Answer all questions (10 x 1 = 10)

| | | | | |
|---|---|--------------|----|--------------|
| 1 | Polyethylene is a example for..... | | K1 | CO-1 |
| | A | monomer | B | High polymer |
| | C | polymer | D | none |
| 2 | The degree of polymerization of $5 \text{ CH}_2=\text{CH}_2$ is | | K1 | CO-1 |
| | A | 2 | B | 3 |
| | C | 4 | D | 5 |
| 3 | The linear polymer havemelting points | | K1 | CO-1 |
| | A | low | B | high |
| | C | medium | D | none |
| 4 | In free radical mechanism initiation hemolytic dissociation to yield aof free radical | | K3 | CO-1 |
| | A | Pair | B | non-pair |
| | C | three | D | none |
| 5 | In Ziegler Natta polymerization a vanadium catalyst gives aproduct | | K2 | CO-2 |
| | A | isotactic | B | syndiotactic |
| | C | eutectic | D | none |
| 6 | R-TiCl ₄ compound used incoordination | | K2 | CO-2 |
| | A | mono | B | bimetallic |
| | C | Both a and b | D | none |
| 7 | The following one is the example for copolymerisation | | K3 | CO-2 |
| | A | PVC | B | PE |

| | | | | | | |
|----|--|------------------|---|----------------|----|------|
| | C | SBR | D | none | | |
| 8 | -A-A-A-A-B-B-B-B-A-A-A is the example for..... | | | | K2 | CO-2 |
| | A | block | B | graft | | |
| | C | copolymerisation | D | none | | |
| 9 | Reactivity ratio only depends on the | | | | K2 | CO-3 |
| | A | T,P | B | T,C | | |
| | C | P,C | D | none | | |
| 10 | The dispersity is a measure of heterogeneity ofof particles in a mixture | | | | K2 | CO-3 |
| | A | size | B | length | | |
| | C | weight | D | none | | |
| 11 | In weight average method $W_1 =$ | | | | K2 | CO-3 |
| | A | n_1M_1 | B | N_1N_2 | | |
| | C | M_1M_2 | D | none | | |
| 12 | In light scattering methodis used as a source | | | | K4 | CO-3 |
| | A | Mercury arc | B | laser | | |
| | C | a and b | D | none | | |
| 13 | The calendaring machine is a set of highly polishedrollers | | | | K1 | CO-4 |
| | A | steel | B | metal | | |
| | C | solid | D | aluminium | | |
| 14 | In rotational casting gelation takes place at°C | | | | K1 | CO-4 |
| | A | 100-150 | B | 150-200 | | |
| | C | 200-250 | D | 300 | | |
| 15 | In injection moulding the molten plastic material is injected under.....Kg/Cm ² | | | | K2 | CO-4 |
| | A | 1300 | B | 1400 | | |
| | C | 1500 | D | 1600 | | |
| 16 | Blow moulding is basically used inindustry | | | | K2 | CO-4 |
| | A | rubber | B | Plastic | | |
| | C | glass | D | steel | | |
| 17 | In PVC preparation following one is used as a catalyst | | | | K2 | CO-5 |
| | A | mercury chloride | B | metal chloride | | |
| | C | Both a and b | D | none | | |
| 18 | Polyester is prepared by the condensation of terephthalic acid andglycol | | | | K1 | CO-5 |

| | | | | | | |
|---|--|--|---|------------------------|----|------|
| | A | methylene | B | ethylene | | |
| | C | propylene | D | acetylene | | |
| 19 | Silicone polymers are prepared by the hydrolysis of alkyl substitutedsilane | | | | K2 | CO-5 |
| | A | chloro | B | Bromo | | |
| | C | iodo | D | flouro | | |
| 20 | The following one polymer is mainly used in contact lenses and dental restorations | | | | K3 | CO-5 |
| | A | Polymethyl methacrylate | B | Polyethyl methacrylate | | |
| | C | Both a and b | D | none | | |
| Section B | | | | | | |
| Answer All questions (5 x 5 = 25) | | | | | | |
| 21 | A | Explain the mechanism of cationic polymerisation | | | K4 | CO-1 |
| | | OR | | | | |
| | B | Explain the following polymers a) linear b) branched c) network | | | K3 | CO-1 |
| 22 | A | Give an account of Ziegler Natta catalyst | | | K2 | CO-2 |
| | | OR | | | | |
| | B | Write short notes on cross linked polymers and their applications | | | K4 | CO-2 |
| 23 | A | How to determine the molecular weight by number average method | | | K1 | CO-3 |
| | | OR | | | | |
| | B | How will determine the molecular weight by viscosity method | | | K4 | CO-3 |
| 24 | A | Write notes on die casting method | | | K3 | CO-4 |
| | | OR | | | | |
| | B | Explain the rotational casting method | | | K2 | CO-4 |
| 25 | A | Explain the following a)polyamide b)polyester | | | K1 | CO-5 |
| | | OR | | | | |
| | B | Briefly explain the electrically conducting polymers | | | K1 | CO-5 |
| Section C | | | | | | |
| Answer ANY THREE Questions (3 x 10 = 30) | | | | | | |
| 26 | | Explain in detail about free radical mechanism | | | K3 | CO-1 |
| 27 | | Briefly discuss the kinetics of copolymerisation | | | K1 | CO-2 |
| 28 | | How the molecular weight of the polymer is measured by light scattering method | | | K3 | CO-3 |
| 29 | | Explain the following a) Injection moulding b) Extrusion moulding | | | K1 | CO-4 |
| 30 | | Write short notes on applications of bio medical polymers | | | K2 | CO-5 |

MODEL QUESTION PAPER

| Programme(s) | Title of the Paper | Semester |
|---------------|--------------------------------------|----------|
| M.Sc. PHYSICS | Elective paper: Industrial Chemistry | III |

Time: 3 Hrs.

Max.Marks : 75

Section A

Answer all questions (20 x 1 = 20)

| | | | | |
|---|---|---|----|---|
| 1 | Which of the following is the correct pairing between the initial reactant and major product of a type of fermentation? | | K1 | CO-1 |
| | A | Lactate; glucose | B | Acetate; ethylene glycol |
| | C | Ethanol; lactate | D | Glucose; lactate |
| 2 | What is the primary function of fermentation? | | K1 | CO-1 |
| | A | Production of ethanol to be used as a fuel source | B | Regeneration of NAD ⁺ |
| | C | Regeneration of NADH | C | Production of lactic acid to be used as a fuel source |
| 3 | During lactic acid fermentation, what is the final electron acceptor? | | K1 | CO-1 |
| | A | Oxygen | B | Ethanol |
| | C | Carbon dioxide | D | Pyruvate |
| 4 | The type of fermentation observed in yeasts is | | K1 | CO-1 |
| | A | acrylic fermentation | B | lactic acid fermentation |
| | C | pyruvic fermentation | D | alcoholic fermentation |
| 5 | Correct melting point of the drug Aspirin is? | | K3 | CO-2 |
| | A | 124°C | B | 321°C |
| | C | 140°C | D | 26°C |
| 6 | Which of the following fermentation processes is used in the production of penicillin? | | K1 | CO-2 |
| | A | Aerobic fermentation followed by anaerobic fermentation | B | Anaerobic fermentation |
| | C | (c) Aerobic fermentation | D | Anaerobic fermentation followed by aerobic fermentation |

| | | | | |
|----|---|---|----|--|
| 7 | Which of the following species is used for producing streptomycin? | | K1 | CO-2 |
| | A | Vitamin A | B | Vitamin D |
| | C | Vitamin E | D | Vitamin K |
| 8 | Which of the following events occurs during the third phase of growth of <i>Penicillium chrysogenum</i> ? | | K1 | CO-2 |
| | A | Autolysis of the medium starts | B | Slight rise in pH due to liberation of ammonia |
| | C | The concentration of antibiotic increases in the medium | D | All of the above |
| 9 | Photosynthetic pigments absorb | | K4 | CO-3 |
| | A | UV radiation | B | IR radiation |
| | C | Visible radiation | D | Gamma radiation |
| 10 | Which one among the following is used as red pigment | | K1 | CO-3 |
| | A | Titanium dioxide | B | Iron oxide |
| | C | Zinc oxide | D | Carbon black |
| 11 | Pigment incorporation | | K4 | CO-3 |
| | A | Increases hardness of the film | B | Reduces gloss |
| | C | Improve masking ability | D | All of the above |
| 12 | Zinc oxide is a metal oxide. Which of the following term best describes the nature of zinc oxide: | | K1 | CO-3 |
| | A | an acidic oxide | B | a neutral oxide |
| | C | an amphoteric oxide | D | a basic oxide |
| 13 | Adhesives were | | K3 | CO-4 |
| | A | Can't be used in the form of pressure sensitive tapes | B | Can't join two dissimilar metals |
| | C | Cure instantaneously after application on a surface | D | None of these |
| 14 | Enamel can act in a sense like a | | K4 | CO-4 |
| | A | Permeable membrane | B | Impermeable membrane |
| | C | Semipermeable membrane | D | Infrapermeable membrane |
| 15 | A fifty percent straight dynamite contains | | K4 | CO-4 |
| | A | 5 percent of nitroglycerin | B | 5 percent of trinitrotoluene (TNT) |
| | C | 50 percent of trinitrotoluene (TNT) | D | 50 percent of nitroglycerin |
| 16 | In recent years, dynamite has been replaced commercially by | | K3 | CO-4 |
| | A | PETN | B | Nitroglycerin |

| | | | | | | |
|---|---|--|---|--|------|--|
| | C | TATP | D | Ammonium nitrate-based explosive | | |
| 17 | Melting point of fat is _____ and melting point of oil is _____ | | | K2 | CO-5 | |
| | A | Higher, higher | B | Lower, lower | | |
| | C | Lower, higher | D | Higher, lower | | |
| 18 | Which of the following is an example of fats? | | | K1 | CO-5 | |
| | A | Glyceryltriolate | B | Vegetable ghee | | |
| | C | Coconut oil | D | Groundnut oil | | |
| 19 | Select the incorrect statement from the following option. | | | K1 | CO-5 | |
| | A | Oils are saturated triglyceride | B | Examples of oils are glyceryltriolate, coconut oil, olive oil, etc | | |
| | C | Oils are liquid at room temperature | D | Oils have lower melting points | | |
| 20 | Hydrogenolysis is a reaction which leads to the reduction products of _____ | | | K1 | CO-5 | |
| | A | Aldehyde | B | Ketone | | |
| | C | Alcohol | D | Ester | | |
| Section B | | | | | | |
| Answer All questions (5 x 5 = 25) | | | | | | |
| 21 | A | Why is fermentation important in cocoa processing? What is the role of microorganisms in the fermentation process? | | K1 | CO-1 | |
| | OR | | | | | |
| | B | What are the health benefits and harmful effects of beer and wine? | | K1 | CO-1 | |
| 22 | A | What are the different uses for aspirin? | | K1 | CO-2 | |
| | OR | | | | | |
| | B | Explain then properties and uses of methylene blue. | | K6 | CO-2 | |
| 23 | A | Write the Synthesis and uses of chromium oxide | | K1 | CO-3 | |
| | OR | | | | | |
| | B | Describe the preparation and characteristics of cobalt blue | | K5 | CO-3 | |
| 24 | A | Write a classification of adhesives? | | K1 | CO-4 | |
| | OR | | | | | |
| | B | Explain the properties and uses of Nitro cellulose | | K6 | CO-4 | |
| 25 | A | State Saponification value? | | K3 | CO-5 | |
| | OR | | | | | |
| | B | Write a properties and uses of castor oil. | | K1 | CO-5 | |

| Section C | | | | |
|---|--|---|----|------|
| Answer ANY THREE Questions (3 x 10 = 30) | | | | |
| 26 | | Explain the preparation of ethyl alcohol from molasses. | K6 | CO-1 |
| 27 | | Discuss the preparation, properties and uses of paracetamol & chlormycetin. | K5 | CO-2 |
| 28 | | Explain the synthesis, properties and applications of Zinc oxide. | K6 | CO-3 |
| 29 | | Explain the preparation and uses of Gun Powder and Dynamite. | K6 | CO-4 |
| 30 | | Describe the Manufacture of cotton seed oil and soybean oil. | K5 | CO-5 |
