#### **B.Sc (INFORMATION TECHNOLOGY)**

(Candidates admitted from 2023-2024 onwards)

#### **REGULATIONS**

#### **I. SCOPE OF THE PROGRAMME**

Bachelor of Information Technology can be considered to be one of the most prominent UG level programs in our country. This program mainly deals with the development of computer applications for the purpose of updating computer programming languages. B.Sc.[IT] also aims at creating strong knowledge of theoretical Information Technology subjects who can be employed in software development and testing units of industries. The course has a time period of 3 years with 6 semesters.

#### II. SALIENT FEATURES

- Regular conduct of guest lectures and seminars
- Campus recruitment
- Provides facilities such as Internet Access and In-House Library
- Provides Career Guidance for Post Graduate Courses like M.Sc, and the Certifications in programming languages
- Conduct of Personality Development Program
- Visiting Faculties from Industries

#### **III. OBJECTIVES OF THE PROGRAMME**

The Course Objective of the B.Sc. Information Technology program is to provide advanced and in-depth knowledge of Information Technology and its applications to enable students pursue a professional career in Information and Communication Technology in related industry, business and research. The course designed to impact professional knowledge and practical skills to the students.

#### IV. ELIGIBILITY FOR ADMISSION

A Candidates seeking admission to the first year Degree course (B.Sc. Information Technology) shall be required to have passed Higher Secondary Examination with Mathematics or Business

Mathematics or Computer Science or Computer Applications or Computer Technology or Statistics (Academic Stream or Vocational Stream) as one of the subject under Higher Secondary Board of Examination, conducted by the Government of Tamilnadu or an examination accepted as equivalent thereto by the syndicate, subject to such conditions as may be prescribed thereto are permitted to appear and qualify for the B.Sc. Information Technology Degree Examination of Periyar University after a course of study of three academic years.

#### **V. DURATION OF THE PROGRAMME**

- ➤ The course shall extend over a period of three academic years consisting of six semesters. Each academic year will be divided into two semesters. The First semester will consist of the period from July to November and the Second semester from December to April.
- ➤ The subjects of the study shall be in accordance with the syllabus prescribed from time to time by the Board of Studies of Vivekanandha College of Arts and Sciences for Women with the approval of Periyar University.

#### VI. CONTINUOUS INTERNAL ASSESSMENT (CIA)

The performance of the students will be assessed continuously and the Internal

#### ASSESSMENT MARKS **FOR THEORY PAPERS** WILL BE AS UNDER:

| 1 | Average of Two Tests |    | - | 05 |
|---|----------------------|----|---|----|
| 2 | Model Exam           |    | - | 10 |
| 3 | Assignment           |    | - | 05 |
| 4 | Attendance           |    | - | 05 |
|   |                      | То | - | 25 |

#### ASSESSMENT MARKS **FOR PRACTICAL PAPERS** WILL BE AS UNDER:

| 1 | Model Exam       |    | - | 20 |
|---|------------------|----|---|----|
| 2 | Observation Note |    | - | 10 |
| 3 | Attendance       |    | - | 10 |
|   |                  | To | - | 40 |

#### PASSING MINIMUM - EXTERNAL

| THEORY       | In the End Semester Examinations, the passing minimum shall be 40% |
|--------------|--|
| ITEORY       | out of 75 Marks. (30 Marks)  |
| PRACTICAL /  | In the End Semester Examinations, the passing minimum shall be 40% |
| MINI PROJECT | out of 60 Marks. (24 Marks)  |

#### **VII. ELIGIBILITY FOR EXAMINATION**

A candidate will be permitted to appear for the University Examination only on learning 75 % of attendance and only when her conduct has been satisfactory. It shall be open to grant exemption to a candidate for valid reasons subject to conditions prescribed.

#### **DISTRIBUTION OF MARKS FOR ATTENDANCE:**

| ATTENDANCE | MARKS  |           |  |  |  |  |
|------------|--------|-----------|--|--|--|--|
| PERCENTAGE | THEORY | PRACTICAL |  |  |  |  |
| 75-80      | 1      | 2         |  |  |  |  |
| 81-85      | 2      | 4         |  |  |  |  |
| 86-90      | 3      | 6         |  |  |  |  |
| 91-95      | 4      | 8         |  |  |  |  |
| 96-100     | 5      | 10        |  |  |  |  |

#### VIII. CLASSIFICATION OF SUCCESSFUL CANDIDATES

Successful candidates passing the Examination of Core Courses (Main & Allied Subjects) & Securing Marks.

- a) 75 % and above shall be declared to have passed the examination in First Class with Distinction provided they pass all the examinations prescribed for the course at first appearance itself.
- b) 60% and above but below 75 % shall be declared to have passed the Examinations in First Class...
- c) 50% & above but below 60% shall be declared to have passed the examinations in Second Class.
- d) All the remaining successful candidates shall be declared to have passed the examinations in Third Class.
- e) Candidates who pass all the examinations prescribed for the course at the First appearance itself and within a period of three Consecutive Academic years from the year of admission only will be eligible for University Rank.

#### IX. ELIGIBILITY FOR AWARD OF THE DEGREE

A candidate shall be eligible for the award of the Degree only if she has undergone the above Degree for a period of not less than Three Academic years comprising of six semesters and passed the Examinations prescribed and fulfilled such conditions has have been prescribed therefore.

#### X. PROCEDURE IN THE EVENT OF FAILURE

If a candidate fails in a particular subject, she may reappear for the university examination in the concerned subject in subsequent semesters and shall pass the examination.

#### XI. COMMENCEMENT OF THESE REGULATIONS

These regulations shall take effect from the academic year 2023-2024 (i.e.,) for the students who are to be admitted to the First year of the course during the Academic year 2023-24 and thereafter.

#### XII. TRANSITORY PROVISIONS

Candidates who were admitted to the UG course of study before 2021-2022 shall be permitted to appear for the examinations under those regulations for the period of Three years ie., upto and inclusive of the Examinations of 2023-2024. Thereafter, they will be permitted to appear for the examinations only under the regulations then in force.

#### **EVALUATION OF EXTERNAL EXAMINATIONS (EE)**

| OUESTION PAPER PATTERN – Theory  |   |       |  |  |  |  |  |
|--|---|-------|--|--|--|--|--|
| Time   | Time duration: 3 Hours Max. Marks: 75   |       |  |  |  |  |  |
| PART- A:<br>(10 x 1= 10)   | Answer all the Questions Two Questions from each Unit                             |       |  |  |  |  |  |
| PART- B: (5x 7 = 35)   | Answer all the questions One Question from each Unit (Either or                   | Type) |  |  |  |  |  |
| PART- C: (3 x 10 = 30)   | Answer any <b>THREE</b> of the questions One Question from each Unit (3 Out of 5) | 5)    |  |  |  |  |  |
| IN THE END SEMESTER EXAMINATIONS, THE PASSING MINIMUM SHALL BE 40% OUT OF 75 MARKS. (30 MARKS) |   |       |  |  |  |  |  |

| <b>QUESTION PAPER PATTERN – Practical</b>                        |                      |  |  |  |
|--|----------------------|--|--|--|

#### Programme outcomes (PO) for B.Sc Information Technology

- Scientific aptitude will be developed in Students
- > Students will acquire basic Practical skills & Technical knowledge along with domain knowledge of different subjects in the science & humanities stream.
- > Students will become employable; Students will be eligible for career opportunities in education field, Industry, or will be able to opt for entrepreneurship
- > Students will possess basic subject knowledge required for higher studies, professional and applied courses
- > Students will be aware of and able to develop solution oriented approach towards various Social and Environmental issues.
- ➤ Ability to acquire in-depth knowledge of several branches of Mathematics and aligned areas .

  This Programme helps learners in building a solid foundation for higher studies in Mathematics
- ➤ The skills and knowledge gained leads to proficiency in analytical reasoning, which can be utilized in modeling and solving real life problems.
- ➤ Utilize mathematics to solve theoretical and applied problems by critical understanding, analysis and synthesis.
- To recognize patterns and to identify essential and relevant aspects of problems.
- ➤ Ability to share ideas and insights while seeking and benefitting from knowledge and insight of others.
- ➤ Mould the students into responsible citizens in a rapidly changing interdependent society.

The above expectations generally can be pooled into 6 broad categories and can be modified according to institutional requirements:

PO1: Knowledge

PO2: Problem Analysis

PO3: Design / Development of Solutions

PO4: Conduct investigations of complex problems

PO5: Modern tool usage

PO6: Applying to society

#### Programme Specific Outcomes of B.Sc Degree programme in Information Technology

- **PSO1** Demonstrate and apply basic knowledge of information technology to the scientific issues and problems being faced in society and the industry.
- **PSO2** Analyze critical problems and provide computer-based solutions by applying appropriate tools and technology.
- PSO3 Design and develop solutions to problems in the areas related to web page design, Mobile App development, cloud computing, IOT and data analytics of varying complexity.

#### 2. Highlights of the Revamped Curriculum:

- ➤ Student-centric, meeting the demands of industry & society, incorporating industrial components, hands-on training, skill enhancement modules, industrial project, project with viva-voce, exposure to entrepreneurial skills, training for competitive examinations, sustaining the quality of the core components and incorporating application oriented content wherever required.
- ➤ The Core subjects include latest developments in the education and scientific front, advanced programming packages allied with the discipline topics, practical training, for providing solutions to industry / real life situations. The curriculum also facilitates peer learning with advanced mathematical topics in the final semester, catering to the needs of stakeholders with research aptitude.
- The curriculum is designed so as to strengthen the Industry-Academia interface and provide more job opportunities for the students.
- ➤ The Internship during the second year vacation will help the students gain valuable work experience, that connects classroom knowledge to real world experience and to narrow down and focus on the career path.
- ➤ Project with viva-voce component in the fifth semester enables the student, application of conceptual knowledge to practical situations.

#### FIRST YEAR -SEMESTER- I

| Subject   | Subject Name  | ry     | L | T | P | S | S      | Marks |       | ks    |
|-----------|---------------|--------|---|---|---|---|--------|-------|-------|-------|
| Code      |               | Catego |   |   |   |   | Credit | CIA   | Exter | Total |
| 23U1ITC01 | C Programming | Core   | 5 | 0 | 0 | I | 5      | 25    | 75    | 100   |
|           |               | - III  |   |   |   |   |        |       |       |       |

#### **Learning Objectives**

- 1. To learn and understand the basics program structure of C.
- 2. To learn the programming principles of the looping and the statements.
- 3. To understand the functions used in arrays and string functions.
- 4. To recall the methods of structures and union to implement in arrays.
- 5. To study the definition of pointers and the initializing the pointers.

To analyze the file to accessing different methods.

| 10 anaryze the  | Course Outcome  |
|-----------------|---|
|                 | On completion of this course, students will   |
|                 | Remember the program structure of C with its syntax and semantics   |
| CO1[K1]         |   |
|                 | Understand the programming principles in C (data types, operators, branching and looping, arrays, functions,      |
| CO2[K2]         | structures, pointers and files)   |
|                 | Apply the programming principles learnt in real-time problems   |
| CO3[K3]         |   |
|                 | Analyze the various methods of solving a problem and choose the best method                                       |
| CO4[K4]         |   |
| CO5[V5]         | Code, debug and test the programs with appropriate test cases   |
| CO5[K5]<br>UNIT | Contents  |
| 01,122          |   |
|                 | Overview of C: Importance of C, sample C program, C program structure, executing C program.                       |
| I               | Constants, Variables, and Data Types: Character set, C tokens, keywords and identifiers, constants, variables,    |
|                 | data types, declaration of variables, Assigning values to variables-Assignment statement, declaring a variable    |
|                 | as constant, as volatile. Operators and Expressions - Managing Input and Output Operations.                       |
|                 | Decision Making and Branching: Decision making with If, simple IF, IF ELSE, nested IF ELSE, ELSE IF               |
| II              | ladder, switch, GOTO statement. Decision Making and Looping: While, Do-While, For, Jumps in loops.                |
|                 | Arrays: Declaration and accessing of one & two-dimensional arrays, initializing two-dimensional arrays,           |
|                 | multidimensional arrays. Functions: The form of C functions, Return values and types, calling a function,         |
| III             | categories of functions, Nested functions, Recursion, functions with arrays, call by value, call by reference,    |
|                 | storage classes-character arrays and string functions.  |
|                 | Structures and Unions: Defining, giving values to members, initialization and comparison of structure             |
| IV              | variables, arrays of structure, arrays within structures, structures within structures, structures and functions, |
|                 | unions. Preprocessors: Macro substitution, file inclusion.  |
|                 | File Management in C: Pointers: definition, declaring and initializing pointers, accessing a variable             |
| V               | through address and through pointer, pointer expressions, pointer increments and scale factor, pointers and       |
| •               | arrays, pointers and functions, pointers and structures.  |
| ĺ               | 1   |

#### **Course Objectives:**

- 1. To understand the basic syntax, data types and operators in C.
- 2. To learn the concepts of decision making statements.
- 3. Analyze the concepts of Arrays, Functions and Strings.
- 4. Describing the structure of pointers using different fields.
- 5. To evaluate the program for the pointers and files used in the list.

|         | Course Outcomes   |  |  |  |  |  |  |  |
|---------|---|--|--|--|--|--|--|--|
|         | On completion of this course, students will   |  |  |  |  |  |  |  |
|         | Remember and understand how to write programs using the basic syntax and semantics in       |  |  |  |  |  |  |  |
| CO1[K2] | C   |  |  |  |  |  |  |  |

| CO2[K3] | to solve problems   |  |  |  |  |  |  |  |
|         | Analyze and understand programs written in C language                                       |  |  |  |  |  |  |  |
| CO3[K3] |   |  |  |  |  |  |  |  |
|         | Evaluate the program execution flow with test cases and apply debugging                     |  |  |  |  |  |  |  |
| CO4[K4] |   |  |  |  |  |  |  |  |
|         | Design algorithms and write programs in C language for the given problems.                  |  |  |  |  |  |  |  |
| CO5[K5] |   |  |  |  |  |  |  |  |

#### LAB EXERCISES:

#### **UNIT I: Variables, Data types, Constants and Operators**

- 1. Evaluation of expression ex:  $((x+y)^2 * (x+z))/w$
- 2. Temperature conversion problem (Fahrenheit to Celsius)
- 3. Program to convert days to months and days (Ex: 364 days = 12 months and 4 days)
- 4. Solution of quadratic equation
- 5. Salesman salary (Given: Basic Salary, Bonus for every item sold, commission on the total monthly sales)

#### **UNIT II: Decision making Statements**

- 6. Maximum of three numbers
- 7. Calculate Square root of five numbers (using goto statement)
- 8. Pay-Bill Calculation for different levels of employee (Switch statement)
- 9. Fibonacci series
- 10. Floyds Triangle
- 11. Pascal's Triangle

#### Unit III: Arrays, Functions and Strings

- 12. Prime numbers in an array
- 13. Sorting data (Ascending and Descending)
- 14. Matrix Addition and Subtraction
- 15. Matrix Multiplication
- 16. Function with no arguments and no return values
- 17. Function that convert lower case letters to upper case
- 18. Factorial using recursion.
- 19. Perform String Operations using Switch Case.

#### **Unit IV: Structures and Macros**

- 20. Structure that describes a Hotel (name, address, grade, avg room rent, number of rooms) Perform some operations (list of hotels of a given grade etc.)
- 21. Using Pointers in Structures.
- 22. Cricket team details using Union.
- 23. Write a macro that calculates the max and min of two numbers
- 24. Nested macro to calculate Cube of a number.

#### Unit V: Pointers and Files

- 25. Evaluation of Pointer expressions
- 26. Function to exchange two pointer values
- 27. Creation, insertion and deletion in a linked list
- 28. Program to read a file and print the data.
- 29. Program to receive a file name and a line of text as command line arguments and write the text to the file
- 30. Program to copy the content of one file to another file.

#### PRESCRIBED TEXT BOOKS:

- 1. E. Balagurusamy, Programming in ANSI C, Fifth Edition, Tata McGraw-Hill, 2010.
- 2. RemmaThareja, Programming in C, second edition, Oxford university press

#### **BOOKS FOR REFERENCE:**

- 1. Byron Gottfried, Schaum's Outline Programming with C, Fourth Edition, Tata McGraw-Hill, 2018.
- 2. Kernighan and Ritchie, The C Programming Language, Second Edition, Prentice Hall, 1998.
- 3. Yashavant Kanetkar, Let Us C, Eighteenth Edition, BPB Publications, 2021

#### **Learning Objectives**

- 1. Knowledge of basic SW engineering methods and practices, and their appropriate application, describes.
- 2. A basic understanding of software engineering layered technology and process framework, including waterfall and evolutionary models.
- 3. Understanding of software requirements and the SRS documents, data models, object models, context models, and behavioral models.
- 4. Understanding implementation difficulties including modularity, coding standards, static analysis, and reviews.
- 5. Understanding software evolution, version management, quality control, and software quality.

| changes in software development practices, computer systems engineering.  Software Life Cycle Models: Why use a life cycle model, Classical waterfall model iterative waterfall model, prototyping model, evolutionary model, spiral model comparison of different life cycle models.  Requirements Analysis and Specification: Requirements gathering and analysis Software requirements specification (SRS)  Software Design: Good software design, cohesion, and coupling, neat arrangements.   |         |  |
|--|---------|--|
| CO1[K1] Gain basic knowledge of analysis and design of systems.  CO2[K2] Ability to apply software engineering principles and techniques.  Model a reliable and cost-effective software system.  CO3[K3] Ability to design an effective model of the system.  CO4[K5] Perform Testing at various levels and produce an efficient system.  CO5[K6] UNIT Contents  Introduction: The software engineering discipline, programs vs. software product why study software engineering, the emergence of software engineering. Notal changes in software development practices, computer systems engineering. #### **Objectives**

- To gain practical expertise in coding Core Java programs
- To become proficient in the use of AWT, Event Handling and Swing.

|         | Course Outcomes   |
|---------|---|
| CO      | On completion of this course, students will                           |
|         | Code, debug and execute the Java problems                             |
| CO1[K3] |   |
|         | Implement multi-threading and exception-handling.                     |
| CO2[K3] |   |
|         | Implement File Handling.  |
| CO3[K4] |   |
|         | Demonstrate Event Handling and Implement Synchronous and Asynchronous |
| CO4[K5] | programming.  |
| CO5[K6] | Create GUI using Swing and AWT and apply event handling.              |

#### LIST OF PROGRAMS

- 1. Write a Java program that prompts the user for an integer and then prints out all the prime numbers up to that Integer?
- 2. Write a Java program to multiply two given matrices.
- 3. Write a Java program that displays the number of characters, lines and words in a text?
- 4. Write a program to do String Manipulation using Character Array and perform the following string operations:
  - a. String length
  - b. Concatenating two strings
- 5. Write a program to perform the following string operations using String class:
  - a. String Concatenation
  - b. Search a substring
- 6. Write a program to perform string operations using String Bufferclass:
  - a. Length of a string
  - b. Reverse a string
- 7. Write a java program that implements a multi-thread application that has three threads. First thread generates random integer every 1 second and if the value is even, second thread computes the square of the number and prints. If the value is odd, the third thread will print the value of cube of the number.
- 8. Write a program to demonstrate the use following exceptions.
  - a. Arithmetic Exception
  - b. Array Index Out of Bound Exception

- 9. Write a Java program that reads on file name from the user, then displays information about whether the file exists, whether the file is readable, whether the file is writable, the type of file and the length of the file in bytes?
- 10. Write a program to accept a text and change its size and font. Include bold italic options. Use frames and controls.
- 11. Write a Java program that handles all mouse events and shows the event name at the centre of the window when a mouse event is fired. (Use adapter classes).
- 12. Write a Java program that works as a simple calculator. Use a grid layout to arrange buttons for the digits and for the +, -,\*, % operations. Add a text field to display the result. Handle any possible exceptions like divide by zero.

**Learning Objectives** 

1. To learn the basic web concepts and to create rich internet applications that use the most recent client-side

Programming technologies.

 $2. To \ learn \ the \ basics \ of \ HTML, \ DHTML, \ XML, \ CSS, \ JavaScript \ AJAX.$ 

|         | Course Outcomes   |
|---------|---|
| CO      | On completion of this course, students will   |
| CO1[K2] | Develop and publish Web pages using Hypertext Markup Language(HTML).  |
| CO2[K3] | Optimize page styles and layout with Cascading Style Sheets(CSS).   |
| CO3[K4] | Analyze and apply the role of languages to create a capstone  |
| CO4[K4] | Develop websites using client-side web programmings languages like HTML, DHTML, CSS, XML, JavaScript, and AJAX.   |
| CO5[K6] | Create web applications using forms and validation of form fields   |
| UNIT    | Contents  |
| I       | HTML-Introduction-tag basics- page structure-adding comments working with texts, paragraphs and line breaks. Emphasizing test- heading and horizontal rules-list-font size, face and color-alignment- links-tables-frames   |
| II      | Graphics: Introduction-How to work efficiently with images in web pages, image maps, GIF animation, adding multimedia, data collection with HTML forms textbox, password, list box, combo box, text area, tools for building web page front page.   |
| III     | Cascading style sheet (CSS)-what is CSS-Why we use CSS-adding CSS to your web pages-Grouping styles-extensible markup language (XML). Dynamic HTML: Document object model (DCOM)-Accessing HTML & CSS through DCOM Dynamic content styles & positioning-Event bubbling-data binding.                |
| IV      | Client-side scripting, What is JavaScript, How to develop JavaScript, simple JavaScript, variables, functions, conditions, loops and repetition, Advance script, JavaScript and objects, JavaScript own objects, the DOM and web browser environments, forms and validations                        |
| V       | Ajax: Introduction, advantages &disadvantages, Purpose of it, ajax based web application, alternatives of ajax. Java Script & AJAX: Introduction to array operators, making statements-date & time-mathematics- strings-Event handling-form properties. AJAX. Introduction to jQuery and AngularJS. |

#### **Learning Objectives**

- 1. Learn web page implementation using basic and advanced HTML.
- 2. Understand the difference between Basic CSS and Advanced CSS
- 3. Learn Scripting languages to interact with the server.
- 4. Learn Forms on the web page and form validation using client-side scripting.
- 5. Learn web page development using XML and AJAX

|         | Course Outcomes   |  |  |  |  |  |  |  |  |  |
|---------|---|--|--|--|--|--|--|--|--|--|
| CO      | On completion of this course, students will                         |  |  |  |  |  |  |  |  |  |
|         | Study and Implement Web Pages using Basic and Advanced HTML.        |  |  |  |  |  |  |  |  |  |
| CO1[K1] |   |  |  |  |  |  |  |  |  |  |
|         | Differentiate between functionalities of Basic CSS and Advanced CSS |  |  |  |  |  |  |  |  |  |
| CO2[K1] |   |  |  |  |  |  |  |  |  |  |
|         | Implement basic JavaScript.   |  |  |  |  |  |  |  |  |  |
| CO3[K2] |   |  |  |  |  |  |  |  |  |  |
|         | Develop program using basic functions in Javascript and XHTML       |  |  |  |  |  |  |  |  |  |
| CO4[K3] |   |  |  |  |  |  |  |  |  |  |
|         | Create web applications using forms and validation of form fields   |  |  |  |  |  |  |  |  |  |
| CO5[K4] |   |  |  |  |  |  |  |  |  |  |

#### LIST OF PROGRAMS

- 1. Write a JavaScript to design a simple calculator to perform the following operations: sum, product, difference and quotient.
- 2. Write a JavaScript that calculates the squares and cubes of the numbers from 0 to 10 and outputs HTML text that displays the resulting values in an HTML table format.
- 3. Write a JavaScript code that displays text "TEXT-GROWING" with increasing font size in the interval of 100ms in RED COLOR, when the font size reaches 50pt it displays "TEXT-SHRINKING" in BLUE color. Then the font size decreases to 5pt.
- 4. Develop and demonstrate an HTML5 file that includes JavaScript script that uses functions for the following problems: a. Parameter: A string b. Output: The position in the string of the leftmost vowel c. Parameter: A number d. Output: The number with its digits in the reverse order
- 5. Design an XML document to store information about a student in an engineering college affiliated with VTU. The information must include USN, Name, and Name of the College, Branch, Year of Joining, and email id. Makeup sample data for 3 students. Create a CSS style sheet and use it to display the document.
- 6. Change the Content of the webpage using AJAX. Perform Different Operations using JQUERY Selectors.
- 7. Create an XHTML form with Name, Address Line 1, Address Line 2, and E-mail text fields. On submitting, store the values in the MySQL table. Retrieve and display the data based on Name.

## **Learning Objectives**

- 1. Enumerate the purpose of usage of data structures and algorithms
- 2. describe usage of both linear and non linear data structures organization
- 3. Learn the data structures and algorithm implementation
- 4. Conceptualize the representation of data structures
- 5. Conceive and critically assess the given algorithm methodologies.

|         | Course Outcomes   |
|---------|---|
| CO      | On completion of this course, students will   |
| CO1[K2] | Understand the concepts of Data structures and simple linear data structures.                 |
| CO2[K2] | Acquire the skills on the stack data structure, its implementation and application.           |
| CO3[K3] | Use the appropriate data structure in context of solution of given problem and                |
|         | demonstrate a familiarity with major data structures.   |
| CO4[K5] | Explore the basic concepts of algorithms.   |
| CO5[K6] | Analyze the various algorithmic design paradigms like Dynamic Programming,                    |
|         | Backtracking, Branch and Bound.   |
|         |   |
| UNIT    | Contents  |
| I       | INTRODUCTION TO DATA STRUCTURES:  |
|         | Data Structures: Definition- Time & Space Complexity, Arrays: Representation of arrays,       |
|         | Applications of arrays, sparse matrix and its representation, Linear list: Singly linked list |
|         | implementation, insertion, deletion and searching operations on linear list Circular linked   |
|         | list: implementation, Double linked list implementation, insertion, deletion and searching    |
|         | operations. Applications of linked lists- Dynamic Storage management.                         |
| II      | STACKS: Operations, array and linked representations of stack, stack applications, infix      |
|         | to postfix conversion, postfix expression evaluation, recursion implementation.               |
| III     | QUEUES, TREES & GRAPHS: Queues: operations on queues, array and linked                        |
|         | representations. Circular Queue: operations,, applications of queues. Trees: Definitions      |
|         | and Concepts- Representation of binary tree, Binary tree traversals (Inorder, Postorder,      |
|         | preorder), Binary search trees . Graphs : Representation of Graphs- Types of graphs -         |
|         | Breadth first traversal – Depth first traversal. Applications of graphs .                     |
| IV      | INTRODUCTION TO ALGORITHMS: INTRODUCTION: Definition of Algorithms-                           |
|         | Overview and importance of algorithms- pseudocode conventions, Asymptotic notations,          |
|         | practical complexities. Divide-and-Conquer: General Method – Binary Search- Quick             |
|         | Sort- Merge Sort. Greedy Method: General method- Knapsack problem- Tree vertex                |
|         | splitting- Job sequencing with deadlines.   |
|         |   |

|    | V               | DYNAMIC PROGRAMMING, BACKTRACKING & BRANCH & BOUND  |  |  |  |  |  |  |  |  |  |
|----|-----------------|---|--|--|--|--|--|--|--|--|--|
|    |                 | namic programming: General method, Multistage Graphs, All pairs shortest path, Single                   |  |  |  |  |  |  |  |  |  |
|    |                 | source shortest path. Backtracking: General method, 8 Queens, Graph coloring,                           |  |  |  |  |  |  |  |  |  |
|    |                 | Hamiltonian cycle. Branch & Bound: General method, Travelling salesperson problem.                      |  |  |  |  |  |  |  |  |  |
|    | Textbooks       |   |  |  |  |  |  |  |  |  |  |

#### **Course Objectives:**

Acquire programming skills in core R Programming
Acquire Object-oriented programming skills in R Programming.

Develop the skill of designing graphical-user interfaces (GUI) in R Programming
Acquire R Programming skills to move into specific branches

|         | Course Outcomes   |
|---------|---|
| CO      | On completion of this course, students will                       |
| CO1[K1] | Familiarize with the constructs and running of R programs         |
|         |   |
| CO2[K2] | Apply control structures of R for several suitable problems       |
|         |   |
| CO3[K3] | Demonstrate the working of various data structures supported by R |
|         |   |
| CO4[K4] | Understand the role of R in data handling and visualization       |
|         |   |
| CO5[K5] | Recognize the type of problem and solve it using R                |
|         |   |

#### Lab Exercises:

- 1. Program to convert the given temperature from Fahrenheit to Celsius and vice versa depending upon user's choice.
- 2. Program, to find the area of rectangle, square, circle and triangle by accepting suitable input parameters from user.
- 3. Write a program to find list of even numbers from 1 to n using R-Loops.
- 4. Create a function to print squares of numbers in sequence.
- 5. Write a program to join columns and rows in a data frame using cbind() and rbind() in R.
- 6. Implement different String Manipulation functions in R.
- 7. Implement different data structures in R (Vectors, Lists, DataFrames)
- 8. Write a program to read a csv file and analyze the data in the file in R.
- 9. Create pie chart and bar chart using R.
- 10. Create a data set and do statistical analysis on the data using R.
- 11. Program to find factorial of the given number using recursive function
- 12. Write a R program to count the number of even and odd numbers from array of N numbers.

#### **PRESCRIBED TEXT:**

#### **Learning Objectives**

- To impart fundamental concepts of Cloud Computing.
- To impart a working knowledge of the various cloud service types and their uses and pitfalls.
- To enable the students to know the common features and differences in the service offerings of the three major Cloud Computing service providers, namely Amazon, Microsoft and Google.
- To provide know-how of the various aspects of application design, benchmarking and security on the Cloud.

|         | Course Outcome   |
|---------|--|
|         | On completion of this course, students will  |
| CO1[K1] | To understand the fundamental concepts, various models and services involved in Cloud  |
|         | Computing. and have knowledge on Virtualization.   |
| CO2[K2] | To understand the concepts of various cloud services and their implementation in the   |
|         | Amazon, Microsoft and Google cloud computing platforms.  |
| CO3[K3] | To gain knowledge about designing cloud applications, deployment and data storage services in the cloud.   |
| CO4[K4] | To understand the concepts involved in benchmarking and security on the Cloud.   |
| CO5[K5] | To understand the use case in which the cloud is used in multidisciplinary domains.  |
| UNIT    | Contents   |
| I       | <b>Introduction to Cloud Computing:</b> Definition of Cloud Computing – Characteristics of Cloud Computing – Cloud Models – Cloud Service Examples – Cloud-based Services and Applications.  |
|         | Cloud Concepts and Technologies: Virtualization – Load balancing – Scalability and Elasticity – Deployment – Replication – Monitoring – Software Defined Networking – Network Function Virtualization – MapReduce – Identity and Access Management – Service Level Agreements – Billing. |
| II      | Cloud Services   |
|         | <b>Compute Services:</b> Amazon Elastic Computer Cloud - Google Compute Engine - Windows Azure Virtual Machines  |
|         | <b>Storage Services:</b> Amazon Simple Storage Service - Google Cloud Storage - Windows Azure Storage  |
|         | <b>Database Services:</b> Amazon Relational Data Store - Amazon Dynamo DB - Google Cloud SQL - Google Cloud Data Store - Windows Azure SQL Database - Windows Azure Table Service  |
|         | <b>Application Services:</b> Application Runtimes and Frameworks - Queuing Services - Email Services - Notifiction Services - Media Services   |
|         | Content Delivery Services: Amazon CloudFront - Windows Azure Content Delivery Network  |
|         | Analytics Services: Amazon Elastic MapReduce - Google MapReduce Service - Google BigQuery - Windows Azure HDInsight  |
|         | <b>Deployment and Management Services:</b> Amazon Elastic Beanstack - Amazon CloudFormation  |
|         | Identity and Access Management Services: Amazon Identity and Access Management - Windows Azure Active Directory  |
|         | Open Source Private Cloud Software: CloudStack – Eucalyptus – OpenStack.   |
|         |  |

| III | Cloud Application Design: Introduction — Design Consideration for Cloud Applications — Scalability — Reliability and Availability — Security — Maintenance and Upgradation — Performance — Reference Architectures for Cloud Applications — Cloud Application Design Methodologies: Service Oriented Architecture (SOA), Cloud Component Model, IaaS, PaaS and SaaS Services for Cloud Applications, Model View Controller (MVC), RESTful Web Services — Data Storage Approaches: Relational Approach (SQL), Non-Relational Approach (NoSQL). |
|-----|---|
| IV  | Cloud Application Benchmarking and Tuning: Introduction to Benchmarking – Steps in Benchmarking – Workload Characteristics – Application Performance Metrics – Design Consideration for Benchmarking Methodology – Benchmarking Tools and Types of Tests – Deployment Prototyping. Cloud Security: Introduction – CSA Cloud Security Architecture – Authentication (SSO) – Authorization – Identity and Access Management – Data Security: Securing data at rest, securing data in motion – Key Management – Auditing.                        |
| V   | Case Studies: Cloud Computing for Healthcare – Cloud Computing for Energy Systems - Cloud Computing for Transportation Systems - Cloud Computing for Manufacturing Industry - Cloud Computing for Education.  |

#### **Learning Objectives**

- To know the objectives of information security
- Understand the importance and application of each of confidentiality, integrity, authentication and availability
- Understand various cryptographic algorithms
  Understand the basic categories of threats to computers and network

|              | Course Outcome  |
|--------------|---|
|              | On completion of this course, students will   |
| CO1[K1]      | Understand network security threats, security services, and countermeasures   |
| CO2[K2]      | Understand vulnerability analysis of network security   |
| CO3[K3]      | Acquire background on hash functions; authentication; firewalls; intrusion detection techniques.  |
| CO4[K4]      | Gain hands-on experience with programming and simulation techniques for security protocols.   |
|              | Apply methods for authentication, access control, intrusion detection and prevention.   |
| CO5[K5] UNIT | Contents  |
| I            | Introduction to Information Security : Security mindset, Computer Security Concepts (CIA), Attacks, Vulnerabilities and protections, Security Goals, Security Services, Threats, Attacks, Assets, malware, program analysis and mechanisms.   |
| II           | The Security Problem in Computing: The meaning of computer Security, Computer Criminals, Methods of Defense. Cryptography: Concepts and Techniques: Introduction, plain text and cipher text, substitution techniques, transposition techniques, encryption and decryption  |
| III          | Symmetric and Asymmetric Cryptographic Techniques: DES, AES, RSA algorithms .Authentication and Digital Signatures: Use of Cryptography for authentication, Secure Hash function, Key management – Kerberos.  |
| IV           | Program Security: Non malicious Program errors – Buffer overflow, Incomplete mediation, Time-of-check to Time-of- use Errors, Viruses, Trapdoors, Salami attack, Man-in-the- middle attacks, Covert channels. File protection Mechanisms, User Authentication Designing Trusted O.S: Security polices, models of security, trusted O.S design, Assurance in trusted O.S. Implementation examples. |
| V            | Security in Networks: Threats in networks, Network Security Controls – Architecture, Encryption, Content Integrity, Strong Authentication, Access Controls, Wireless Security, Honeypots, Traffic flow security. Web Security: Web security considerations, Secure Socket Layer and Transport Layer Security, Secure electronic transaction.  |
|              | Textbooks   |
| 1            | Security in Computing, Fourth Edition, by Charles P. Pfleeger, Pearson Education.   |
| 2            | Cryptography And Network Security Principles And Practice, Fourth or Fifth Edition, William Stallings, Pearson.   |
| 3            | Cryptography and Network Security: C K Shyamala, N Harini, Dr T R Padmanabhan, Wiley India, lst Edition.  |

#### **Learning Objectives**

**Learning Objectives:** (for teachers: what they have to do in the class/lab/field)

- To provide the knowledge on Data Mining and Warehousing concepts and techniques.
- To study the basic concepts of cluster analysis.
- To study a set of typical clustering methodologies, algorithms, and applications.

| applicat |   |
|----------|---|
|          | Course Outcome  |
|          | On completion of this course, students will   |
| COTINT   | To understand the basic concepts and the functionality of the various data mining and data  |
| CO1[K1]  | warehousing component   |
| CO2[K2]  | To know the concepts of Data mining system architectures  |
| CO3[K3]  | To analyze the principles of association rules  |
| CO4[K4]  | To get analytical idea on Classification and prediction methods.  |
| CO5[K5]  | To Gain knowledge on Cluster analysis and its methods.  |
| UNIT     | Contents  |
| I        | Introduction: Data mining – Functionalities – Classification – Introduction to Data Warehousing – Data Preprocessing: Preprocessing the Data – Data cleaning – Data Integration and Transformation – Data Reduction.  |
| II       | Data Mining, Primitives, Languages and System Architecture: Data Mining — Primitives — Data Mining Query Language, Architecture of Data mining Systems. Concept Description, Characterization and Comparison: Concept Description, Data Generalization and Summarization, Analytical Characterization, Mining Class Comparison — Statistical Measures |
| III      | Mining Association Rules: Basic Concepts – Single Dimensional Boolean Association Rules From Transaction Databases, Multilevel Association Rules from transaction databases – Multi dimension Association Rules from Relational Database and Data Warehouses  |
| IV       | Classification and Prediction: Introduction — Issues — Decision Tree Induction — Bayesian Classification — Classification of Back Propagation. Classification based on Concepts from Association Rule Mining — Other Methods. Prediction — Introduction — Classifier Accuracy.  |
| V        | Cluster Analysis: Introduction – Types of Data in Cluster Analysis, Petitioning Methods – Hierarchical Methods-Density Based Methods – GRID Based Method – Model based Clustering Method.   |

#### **Project Work Pattern**

FIRST REVIEW: (20 Marks)

- 1. Project Title
- 2. Project Platform (Language / Package Selected )
- 3. Confirmation Letter (from Company / Industry)
- 4. Details of Internal Guide with Designation & Qualification (in the company / Industry)
- 5. Presentation

SECOND REVIEW: (20 Marks)

- 1. Work Observation
- 2. Modules in Project (Design Screens Sample)
- 3. DFD / ERD / System Flow Diagram (Whichever Applicable)
- 4. Estimated Time of Completion
- 5. Completed Work in the form of Percentage Analysis
- 6. PowerPoint Presentation.

FINAL REVIEW: (60 Marks)

- 1. Documentation
- 2. Screens Shots
- 3. DFD / ERD / System Flow Diagram (Whichever Applicable)
- 4. Final Project Report ( with executable format including complete source code)

The Passing minimum shall be 40% out of 60 marks (24 Marks)

#### **Learning Objectives**

Students can understand and Design and develop the useful Android application by using button, fragments, Intents, Menus and can design application with database.

|              | Course Outcome   |  |  |  |  |  |  |  |  |  |  |
|--------------|--|--|--|--|--|--|--|--|--|--|--|
|              | On completion of this course, students will  |  |  |  |  |  |  |  |  |  |  |
| CO1[K1]      | Build an application using Android development environment.  |  |  |  |  |  |  |  |  |  |  |
| CO2[K2]      | Write simple programs and develop small applications using the concepts of UI design, layouts and preferences. |  |  |  |  |  |  |  |  |  |  |
| CO3[K3]      | Implementing the Animation concept.  |  |  |  |  |  |  |  |  |  |  |
| CO4[K4]      | Develop applications with multiple activities using Intents, Fragments, Buttons and options menu.              |  |  |  |  |  |  |  |  |  |  |
| CO5[K5]      | Develop Android applications using SQLite.   |  |  |  |  |  |  |  |  |  |  |
| Lab Programs | List of Exercises:   |  |  |  |  |  |  |  |  |  |  |

- 1. Development of Hello World Application.
- 2. Create an application that takes the name from a text box and shows hello message along with the name entered in text box, when the user clicks the OK button.
- 3. Create a screen that has input boxes for User Name, Password, Address, Gender(radio buttons for male and female), Age (numeric), Date of Birth (Date Picket), State (Spinner) and a Submit button. On clicking the submit button, print all the data below the Submit Button (use any layout).
- 4. Android Program to Animate a Bitmap.
- 5. Design an android application to create page using Intent and one Button and pass the Values from one Activity to second Activity.
- 6. Design an android application Send SMS using Intent.
- 7. Create an android application using Fragments.
- 8. Design an android application Using Radiobuttons.
- 9. Design an android application for menu.
- 10. Create a user registration application that stores the user details in a database table.
