

VIVEKANANDHA

COLLEGE OF ARTS AND SCIENCES FOR WOMEN

(Autonomous)

ELAYAMPALAYAM, TIRUCHENGODE (Tk.), NAMAKKAL (Dt.)

An ISO 9001: 2015 Certified Institution

(Affiliated to Periyar University, Approved by AICTE & Re-accredited with 'A'
Grade by NAAC) (Recognized under section 2(f) and 12(B) Under Act 1956)

PG AND RESEARCH DEPARTMENT OF PHYSICS

M.Sc., Physics

About the College

Vivekananda College of Arts and Sciences for Women (Autonomous) was established and hailed into Women's Educational Service in the Year 1995. Angammal Educational Trust Chaired by the great Educationalist 'VidhyaRathna Prof.Dr. M. KARUNANITHI, B.Pharm. M.S., Ph.D., D.Litt. sponsors this college and other institutions under the name of the great Saint Vivekanandha. Our institutions are situated on either side of Tiruchengode Namakkal Main Road at Elayampalayam, 6 kms away from Tiruchengode. This is biggest women's college in India with more than 7500 girl students and more than 18 departments. The strength of the college was just 65 at the time of its establishment. With the dedication, work, sacrifice and long vision of the chairman, this institution has grown into a Himalaya stage. As a result of which UGC, New Delhi, awarded 2f and 12b, extended Autonomous status for second cycle. The National Assessment and Accreditation Council reaccredited with grade 'A' for its successful performance.

As an Autonomous Institution, academic professionals of the college fram Curriculum and Syllabi in consultation with all its stakeholders to cater the needs the young women to fulfill the women empowerment and present Industrial needs the local benefits. The students are empowering with confidence and required sk to face the society.

Quality Policy

To provide professional training by establishing a high level center of learning that provides quality education at par with the international standards and Provide excellence education with well equipped infrastructure to all the rural women.

Our Vision

To be an academic institution exclusively for women, in dynamic equilibrium with the social and economic environment, strive continuously for excellence in education, research and technological service to the nation.

Our Mission

The mission of our institution is to discover, teach and apply knowledge for the intellectual, cultural, ethical, social and economic growth of women students.

M.Sc. (Physics)

SCOPE OF THE COURSE

M.Sc. (Physics), the recent developments in Physical sciences, has been included in the enriched syllabus to meet out the present day needs of academic and research, institutions and industries. The program expects serious commitment of the student to take-up challenging students' schedules and assignments. The course involves a blend of theoretical education and practical training which run concurrently for a period of two years and equips a student with knowledge, ability, skills and other qualities required for a professional accountant.

The uniqueness of the program is its content and topic coverage, the teaching methodology and the faculty. The syllabus has been designed at a level equal to that of professional courses. The teaching methodologies include classroom lectures, industrial visits, orientation, internship, case study and research work. Focus is also on developing soft skills of the students. For Core subjects, Outsource Guest Lectures by Industrialists and Professional Men will be arranged to enable the students to get wider exposure.

SALIENT FEATURES

- ✓ Course is specially designed for a higher level Career Placement.
- ✓ Special Guest lecturers from Industrialists will be arranged.
- ✓ Exclusively caters to students interested in pursuing higher studies.
- ✓ Special Industry Orientations and Training are parts of the Degree Course.
- ✓ Project work is included in the syllabus to enhance conceptual, analytical & deductive skills.

OBJECTIVES OF THE COURSE

- ✓ The new syllabus throws light on the recent and emerging areas of Physics
- ✓ Enable the students understand Physics and make them more relevant to the society.
- ✓ Develop the analytical ability in students so that they are become objective solving problems.
- ✓ Help the students learn practical skills in a better way.
- ✓ Inculcate research aptitude in students.
- ✓ Enable the students to go to higher levels of learning Physics.
- ✓ Improve the employability of the students.
- ✓ To inspire the students to apply their knowledge gained for the development of society in general.

ELIGIBILITY FOR ADMISSION

Candidates seeking admission to the first year Degree course (M.Sc Physics) shall be required to have passed an Under Graduate degree, i.e. B.Sc (Physics or Applied Sciences) of the Periyar University or an examination of some other University accepted by the syndicate as equivalent there to shall be permitted to be eligible.

DURATION OF THE COURSE

- ✓ The course shall extend over a period of two academic years consisting of four semesters. Each academic year will be divided into two semesters. The First semester will consist of the period from July to November and the Second semester from December to March.
- ✓ The subjects of the study shall be in accordance with the syllabus prescribed from time to time by the Board of Studies of Vivekanandha College of Arts and Sciences for Women with the approval of Periyar University.
- ✓ Each subject will have five hours of lecture per week apart from practical training at the end of each semester.

CONTINUOUS INTERNAL ASSESSMENT

The performance of the students will be assessed continuously and the Internal Assessment Marks will be as under:

| | |
|-------------------------|------------|
| 1. Average of two Tests | - 10 Marks |
| 2. Seminar | - 5 Marks |
| 3. Assignment | - 5 Marks |
| 4. Attendance | - 5 Marks |
| | |
| Total | = 25 Marks |

The distribution of attendance marks is given as follows,

| | |
|----------|-----------|
| 76-80 % | - 1 Mark |
| 81-85 % | - 2 Marks |
| 86-90 % | - 3 Marks |
| 91-95 % | - 4 Marks |
| 96-100 % | - 5 Marks |

QUESTION PAPER PATTERN:

Question Paper Pattern for the Examinations

Time: 3 Hours, Maximum Marks: 75

Part - A Answer all the questions (Objective Type) (20 x 1 = 20 Marks)

Part - B Answer all the following questions (Either or Type) (5 x 5 = 25 Marks)

Part - C Answer any three questions (3 x 10 = 30 Marks)

PASSING MINIMUM

In the University Examinations, the passing minimum shall be 40 % out of 75 Marks for theory (38 marks) and 40% out of 60 marks for practical (24 Marks).

ELIGIBILITY FOR EXAMINATION

A candidate will be permitted to appear for the University Examination only on earning 75 % of attendance and only when her conduct has been satisfactory. It shall be open to grant exemption to a candidate for valid reasons subject to conditions prescribed.

CLASSIFICATION OF SUCCESSFUL CANDIDATES

Successful candidates passing the examination of Core Courses (main and allied subjects) and securing marks

- a) 75 % and above shall be declared to have passed the examination in first class with Distinction provided they pass all the examinations prescribed for the course at first appearance itself.
- b) 60% and above but below 75 % shall be declared to have passed the examinations in first class without Distinction.
- c) 50% and above but below 60% shall be declared to have passed the examinations in second class.
- d) All the remaining successful candidates shall be declared to have passed the examinations in third class.
- e) Candidates who pass all the examinations prescribed for the course at the first appearance itself and within a period of three consecutive academic years from the year of admission only will be eligible for University rank.

COMMENCEMENT OF THESE REGULATIONS

These regulations shall take effect from the academic year 2022 - 2023 (i.e for the students who are to be admitted to the first year of the course during the academic year 2022 – 2023 and thereafter.

SCHEME OF CURRICULUM – M.Sc., PHYSICS

(For the candidates admitted during the academic year 2022 – 2023 onwards)

| SEMESTER - I | | | | | | | | |
|----------------------|----------------|--|------------|---------------|-------------|------------------|-----------------|-------------------|
| Subject Code | Course | Subject Title | Hrs | Credit | Exam | Int. mark | Ext. mar | Total Mark |
| 22P1PH01 | Core – I | Classical and Statistical Mechanics | 6 | 4 | 3 | 25 | 75 | 100 |

| COURSE OBJECTIVES | 1. The main goal of the course is to introduce students to classical mechanics and its applications in physics and studied rigorously using advanced mathematical techniques. | | | | | | | |
| POs | PROGRAMME OUTCOME | | | | | | | |
| PO 1 | Capable of demonstrating the basic concept sand comprehensive knowledge from undergraduate programme of study. | | | | | | | |
| PO 2 | Ability to express thoughts and ideas effectively Communicate with others using appropriate media and interpret the idea in clear and concise manner. | | | | | | | |
| PO 3 | To identify the relevant assumptions to formulate the arguments by following scientific approach to knowledge development. | | | | | | | |
| PO 4 | Capacity to solve different kinds of non-familiar problems and apply to real life situations. | | | | | | | |
| PO 5 | Ability to evaluate the reliability and relevance of evidence, analyze and synthesize data from a variety of sources then draw valid conclusions and support them with evidence and examples, and addressing opposing view points. | | | | | | | |
| PO 6 | To define problems, formulate hypotheses, test hypotheses, analyze, interpret and draw conclusions from data, predict cause-and-effect relationships and ability to plan, execute and report the results of an experiment. | | | | | | | |
| PO 7 | Ability to work effectively and respectfully with diverse teams, facilitate cooperative or coordinated effort on the part of a group and act together as a group. | | | | | | | |
| PO 8 | Ability to analyze, interpret and draw conclusions from quantitative/qualitative data and critically evaluate ideas, evidence and experiences from an open-minded and reasoned perspective | | | | | | | |
| PO 9 | Critical sensibility to lived experiences, with self awareness and reflexivity of both self and society. | | | | | | | |
| PO 10 | Capability to use ICT in a variety of learning situations, demonstrate ability to access, evaluate, and use a variety of relevant information sources and use appropriates of they are analysis of data. | | | | | | | |
| PO 11 | Ability to work independently, identifies appropriate resources required for a project, and manages a project through to completion. | | | | | | | |
| PO 12 | Capability to effectively engage in a multicultural society and interact respectfully with diverse groups. | | | | | | | |
| PO 13 | Capable of demonstrating the ability to identify ethical issues related to ones work, avoid unethical behavior such as fabrication, falsification or misrepresentation of data. | | | | | | | |
| PO 14 | Capability for mapping out the tasks of a team or an organization, and setting direction, formulating an inspiring vision, building at who can help achieve the vision. | | | | | | | |
| PO 15 | Ability to acquire knowledge and skills, including how to learn, that are necessary for participating in learning activities throughout life. | | | | | | | |
| COs | COURSE OUTCOME | | | | | | | |
| CO 1 | To understand the fundamental principles of Lagrange formulation. Apply linear harmonic oscillator in Lagrange formulation. | | | | | | | |

| | |
|----------------|--|
| CO 2 | To acquire knowledge of Hamiltons canonical equations. Understand the harmonic oscillator problem. |
| CO 3 | Understand the angular momentum of a rigid body. |
| CO 4 | Understand the ideas liouvliies theorem. Synthesis phase space. |
| CO 5 | To understand the equations Fermi Dirac statistics .Apply ideal Bose Einstein gas blackbody radiation. |
| Pre-requisites | To Acquire idea about statistics. |

| Content of the Syllabus | | | |
|--------------------------------|---|----------------|-----------|
| Unit-I | FUNDAMENTAL PRINCIPLES AND LAGRANGIAN FORMULATION | Periods | 12 |
| | Mechanics of a system of particles – Conservation laws - Constraints, Generalized coordinates, Cyclic Coordinates – D’Alembert’s principle – Lagrange’s equation of motion from D’Alembert’s principle - Procedure for formation of Lagrange’s equation - Application of Lagrange’s formulation: Linear Harmonic oscillator - Simple pendulum – Atwood’s machine – Particle moving on the surface of earth - Hamiltons principle - Derivation of Lagrange’s equation of motion from Hamilton’s principle. | | |
| Unit-II | HAMILTON’S FORMULATION OF MECHANICS AND SMALL OSCILLATIONS | Periods | 12 |
| | Hamilton’s Canonical equations of motion - Hamilton’s equations from variational principle – Principle of least action – Canonical transformations – Physical Significance of H – Deduction of Hamilton’s equation from modified Hamilton’s principle - Principle of least action – Canonical transformations - Poisson brackets - Hamilton - Jacobi Theory - Harmonic oscillator problem using Hamiltonian Jacobi method. Small Oscillation: Equilibrium – Normal Coordinates – Normal modes. | | |
| Unit-III | DYNAMICS OF A RIGID BODY AND SPECIAL THEORY OF RELATIVITY | Periods | 12 |
| | Generalized co-ordinates for Rigid Body Motion – Body and Space reference system – Euler’s theorem Euler Angles – Components of Angular Velocity - Angular Momentum of a rigid body: Moments and Products of Inertia – Moment of inertia of a rigid body - Eulers equation of motion - Relativistic Approach Lorentz transformation - Motion of a symmetry top – action and angle Variables - Relativistic Lagrangian and Hamiltonian Formulation. | | |
| Unit-IV | CLASSICAL STATISTICS | Periods | 12 |
| | Phase Space – Ensemble - Definition of Micro Canonical - Canonical and Grand Canonical ensembles - Liouville’s theorem - Microstates and Macrostates - Stirling’s formula, Entropy in statistical mechanics - Partition function - Doppler broadening of spectral lines - Principle of equi partition of energy – connection between Partition function and thermodynamically quantities - Maxwell - Boltzman Statistics. | | |
| Unit-V | QUANTUM STATISTICS | Periods | 12 |
| | Identical particles and Symmetry requirements - Bose - Einstein Statistics and Fermi - Dirac statistics - Ideal Bose Einstein gas and its application: Black body radiation and Planck Radiation Law - Gas degeneracy – Bose - Einstein Condensation - Random walk and Brownian motion - Ideal Fermi Dirac gas: Electron gas - Thermionic emission - Paulis theory of Paramagnetism. | | |

| | COMPLEX AND VECTOR ANALYSIS & MATRICES | Periods | 12 |
|-----------------|--|----------------|-----------|
| Unit - I | <p>Complex Analysis: Cauchy - Riemann condition, Differential equation - Cauchy integral theorem - Cauchy integral formulas - Taylors Series - Laurent's Series - Residue theorem - Evaluation of definite integrals - Contour integration.</p> <p>Vector analysis: Stokes theorem, Gauss theorem - Green's Theorem - Linear algebra - Linear vector spaces. Characteristic equation of a matrix, Eigen values and Eigen vectors, Cayley - Hamilton theorem.</p> | | |
| | PROBABILITY AND COMPUTATIONAL TECHNIQUE | Periods | 12 |

| | | | |
|----------------------|--|----------------|-----------|
| Unit - II | Probalibility: random variables, Binomial, Poisson and Normal distributions. Central limit theorem. Elements of computational Techniques: Root of functions, Newton's Interpolation Polynomials Extrapolation, Integration by Trapezoidal and Simpson's 1/3 and 3/8 rules and Solution of first order differential equation using Runge - Kutta method. Finite difference methods. | | |
| Unit -III | FOURIER AND LAPLACE TRANSFORMS | Periods | 12 |
| | <p>Fourier series: Dirichelt's condition – determination of coefficient – function having arbitrary period – Fourier series for square wave and half wave.</p> <p>Fourier Transform: Properties of Fourier transform - Fourier transform of derivative – Fourier sine and cosine transform of derivative –Application of Fourier Transformation in Interferometer.</p> <p>Laplace Transform: Properties of Laplace transform – Method of finding Inverse Laplace transform - Properties of inverse Laplace transform - Solving equations for LCR circuit.</p> | | |
| Unit-IV | SPECIAL FUNCTIONS AND DIFFERENTIAL EQUATIONS | Periods | 12 |
| | <p>Special Function: Beta function - property of beta function - Evaluation of beta function - Evaluation of gamma function - Relation between Beta and Gamma functions.</p> <p>Differential Equations: Linear ordinary differential equations of first & second order - Solution for Bessel, Legendre, Lagure and Hermite differential equations - Properties - Generating functions, Rodrigues formula, Orthogonal properties, Recurrence relation.</p> | | |
| Unit - V | GROUP THEORY, APPLICATION OF PDE AND TENSOR | Periods | 12 |
| | <p>Group Theory: Basic Definition - Multiplication Table - Sub groups - Cosets and Classes, - Character Table - C2Vas examples, SU(2).</p> <p>Application of PDE: Laplace, wave and heat equations in two and three dimensions.</p> <p>Tensor: Contravariant, Covariant and mixed tensors, Rank of tensor, Kronecker delta, Symmetric and Anti symmetric tensors.</p> | | |
| Total Periods | | | 60 |

| | ADVANCED ELECTRONICS | | 6 | 0 | 0 | 4 | 25 | 75 | 100 |
| 22P1PH03 | | | | | | | | | |
| COURSE OBJECTIVES | <p>1. The aim of the course is to introduce the students to the advanced concepts of electronics.</p> <p>2. Acquire basic knowledge of advanced electronics such as Operational Amplifier, Memory and Optoelectronic Devices etc.</p> | | | | | | | | |
| POs | PROGRAMME OUTCOME | | | | | | | | |
| PO 1 | Capable of demonstrating the basic concept sand comprehensive knowledge from undergraduate Programme of study. | | | | | | | | |
| PO 2 | Ability to express thoughts and ideas effectively Communicate with others using appropriate media and interpret the idea in clear and concise manner. | | | | | | | | |
| PO 3 | To identify the relevant assumptions to formulate the arguments by following scientific approach to knowledge development. | | | | | | | | |
| PO 4 | Capacity to solve different kinds of non-familiar problems and apply to real life Situations. | | | | | | | | |
| PO 5 | Ability to evaluate the reliability and relevance of evidence, analyze and synthesize data from a variety of sources then draw valid conclusions and support them with evidence and examples, and addressing opposing Viewpoints. | | | | | | | | |
| PO 6 | To define problems, formulate hypotheses, test hypotheses, analyze, interpret and draw conclusions from data, predict cause-and-effect Relationships and ability to plan execute and report the results of an experiment. | | | | | | | | |
| PO 7 | Ability to work effectively and respectfully with diverse teams, facilitate cooperative or coordinated effort on the part of a group and act together as a group. | | | | | | | | |
| PO 8 | Ability to analyze, interpret and draw conclusions from quantitative /qualitative data and critically evaluate ideas, evidence and experiences from an open-minded and reasoned perspective. | | | | | | | | |
| PO 9 | Critical sensibility to lived experiences, with self awareness and reflexivity of both self and society. | | | | | | | | |
| PO 10 | Capability to use ICT in a variety of learning situations, demonstrate ability to access, evaluate, and use a variety of relevant information sources and use appropriate software for analysis of data. | | | | | | | | |
| PO 11 | Ability to work independently, identifies appropriate resources required for a project, and manages a project through to completion. | | | | | | | | |
| PO 12 | Capability to effectively engage in a multicultural society and interact respectfully with diverse groups. | | | | | | | | |
| PO 13 | Capable of demonstrating the ability to identify ethical issues related to ones work, avoid unethical behavior such as fabrication, falsification or Misrepresentation of data. | | | | | | | | |

| | |
|----------------|---|
| PO 14 | Capability for mapping out the tasks of a team or an organization, and setting direction, formulating an inspiring vision, building a team who can help achieve the vision. |
| PO 15 | Ability to acquire knowledge and skills, including how to learn, that are necessary for participating in learning activities throughout life. |
| COs | COURSE OUTCOME |
| CO 1 | To get knowledge about the basics information of ideal Op-amp. |
| CO 2 | Apply the sample and hold circuit in simultaneous equations and differential Equations. |
| CO 3 | Understand the filters, basic DAC and ADC techniques. |
| CO 4 | Synthesis the basic monolithic IC. |
| CO 5 | To acquire Knowledge the memory devices and apply in optoelectronic devices. |
| Pre-requisites | To Acquire idea about Advanced Electronics. |

| Knowledge Levels | | | | | | | | | | | | | | | | |

| CONTENT OF THE SYLLABUS | | | |
|--------------------------------|---|----------------|-----------|
| Unit - I | OPERATIONAL AMPLIFIER | Periods | 12 |
| | Operational amplifiers: Basic information - Ideal op-amp - Open loop operation - Feedback in ideal op-amp - Inverting and Non - inverting amplifier, Voltage Follower, Differential amplifier, CMRR. DC Characteristics - Input bias current, Input offset current, Input offset voltage, Total output offset voltage, Thermal drift. AC Characteristics - Frequency Response, Stability of an Op - amp, Frequency Compensation, Slew rate. | | |
| Unit - II | ANALOG COMPUTATION AND WAVEFORM GENERATORS | Periods | 12 |
| | Basic Op-amp Applications - Logarithmic amplifiers, Antilogarithmic amplifiers. Adder - subtractor- Analog multiplier- Analog divider - Differentiator - Integrator - Squarer - comparator - Analog Computation - Solving Simultaneous equation and Differential equation - Sine wave oscillator - RC Phase shift oscillator - Wein - Bridge oscillator, method - Harmonic oscillator problem using Hamiltonian Comparator, Schmitt trigger, Astable and Monostable multivibrators - Triangular wave generator. | | |
| Unit - III | FILTERS AND DATA CONVERTERS | Periods | 12 |
| | <p>FILTERS: RC Active filters - First order low pass filter, Second order active filter, Higher order low pass filter, High pass active filter, Band pass filters and Band reject filters.</p> <p>DATA CONVERTERS: Basic DAC techniques: Weighted resistor DAC, R-2R Ladder DAC. Basic ADC techniques - Successive approximation A/D convertor, Dual - Slope ADC, DAC/ADC Specifications.</p> | | |
| Unit - IV | IC 555 TIMER AND APPLICATIONS | Periods | 12 |
| | IC 555 Timer - Internal architecture - Monostable- Multivibrator - - Linear ramp generator - Frequency divider - Bistable multivibrator - Astable Multivibrator - Applications in astable mode-phase locked loops - Monolithic phase locked loops. | | |
| Unit - V | MEMORY AND OPTOELECTRONIC DEVICES | Periods | 12 |
| | Architecture of ROM - PROM, EPROM, EEPROM, EAROM. RAM - Static RAM - Dynamic RAM and Integrated RAM - Compact Disk. Solar cells - LED - Photodiode - Pin Diode - LCD - LDR. | | |
| Total Periods | | | 60 |

| CONTENT OF THE SYLLABUS |

| | | | |
|----------------------|--|----------------|-----------|
| Unit - I | CONCEPT OF NANOSCIENCE | Periods | 12 |
| | Introduction of nanoscale science: surface to volume ratio Quantum Size effect - Particle Size - Particles shape; Nanostructures: Zero, One, Two and Three dimensional structure Physical properties of nanoparticles: Particle density; Melting point ; Surface tension; wettability and Composite structure - Surface characteristics of nanoparticles - Specific surface area and pore - Mechanical properties - Crystalline properties - Optical properties - Electrical properties - Magnetic properties. | | |
| Unit - II | NANOFABRICATION | Periods | 8 |
| | Top down and bottom up ideas – Top down approach Ball Milling method – Sputtering Technique – Sol – gel – Hydrothermal – CVD method- and electron beam Lithography - Bottom up approach - PVD method - thermal Evaporation – Microwave techniques. | | |
| Unit - III | CHARACTERIZATION TECHNIQUES | Periods | 11 |
| | Surface Analysis: Scanning Electron Microscope (SEM); Transmission Electron Microscope (TEM); Atomic Force Microscope (AFM); Working Principle, Instrumentation and applications - Structural analysis: XRD, XRF – Optical analysis: Photoluminescence (PL) Spectroscopy – UV-Vis-NIR Spectroscopy analysis. FTIR - Thermal analysis: Differential Scanning Calorimeter (DSC), Differential Thermal Analyzer (DTA), Thermogravimetric Analysis (TGA). Working Principle, Instrumentation and applications. | | |
| Unit - IV | NANO SYSTEMS | Periods | 8 |
| | Quantum Hall effect – Carbon nanostructures: C ₆₀ ; Basics of fullerenes derivatives; CNT: SWNT – MWNT; applications - Graphene nanomaterials: Polymer nanocomposites – nanoermics. | | |
| Unit - V | APPLICATIONS OF NANOMATERIAL | Periods | 9 |
| | Optoelectronic properties of molecular materials - Nanotechnology devices: OLEDs, TFT, OTFTs - Biological application of nano particles - Drug delivery system. | | |
| Total Periods | | | 48 |

| CONTENT OF THE SYLLABUS | | | |
|--------------------------------|--|----------------|-----------|
| Unit-I | GENERAL FORMALISM OF QUANTUM MECHANICS | Periods | 12 |
| | Linear vector space – Linear operator – Adjoint and Self adjoint operators – Eigen function and Eigen value – Hermitian operator for dynamical variables – Postulates of Quantum Mechanics the Time dependent and Time independent Schroedinger equations – Expectation values of dynamical quantities - Probability of current density – Ehrenfest theorem – Orthonormality – Heisenberg Uncertainty principle – Relations - Simultaneous measurability of observables - Diracs notation – Momentum representation. | | |
| Unit-II | ANGULAR MOMENTUM | Periods | 12 |
| | Orbital angular momentum and their properties – Spin angular momentum – Total angular momentum operators – Commutation relation of total angular momentum with components – ladder operators – commutation relation of J_z with J_+ and J_- , - Eigen values spectrum of J^2 , J_x , J_y and J_z – Matrix representation of J^2 , J_z , J_+ and J_- , Addition of angular momenta: Clebsch Gordon Coefficients – selection rules – Properties and its evaluation. | | |
| Unit-III | MATRIX AND OPERATOR FORMULATION | Periods | 12 |
| | Eigen values, Eigen vectors: Characteristic equation of a matrix Schrodinger, Heisenberg and Interaction Pictures matrix representation- Unitary transformations associated with translations and rotations. Diracs Bra and Ket Vectors: Notation and Dual Space, Hibert Space, Projection Operator, Unitary Operator and Matrix Theory of Harmonic Oscillator. | | |
| Unit-IV | APPROXIMATION METHODS | Periods | 12 |
| | First and second orders of Time Dependent Perturbation theory –Non – degenerate case: the First order and the second order –Selection rule – The degenerate case: Removal of Degeneracy-Ground State of Helium Atom - Application to ground state of an harmonic oscillator and Stark Effect in Hydrogen – Spin – Orbit interaction -Variation Method & its application to Hydrogen Molecule – WKB approximation. | | |
| Unit-V | TIME DEPENDENT PERTURBATION THEORY | Periods | 12 |
| | Time Dependent Perturbation Theory –First and Second Order Transitions – Transition to Continuum of States: Fermi Golden Rule – Constant and Harmonic Perturbation – Transition Probabilities –Selection Rules for Dipole Radiation-Adiabatic and Sudden Approximation – Charged Particle in an Electromagnetic Field. | | |
| Total Periods | | | 60 |

| 22P2PH06 | SPECTROSCOPY – PRINCIPLES AND TECHNIQUES | 6 | 0 | 0 | 4 | 25 | 75 | 100 |
| COURSE OBJECTIVES | 1. To know the Basic ideas about different types of spectroscopic theories and to know the principle and functions of spectroscopic instrumentations. | | | | | | | |
| POs | PROGRAMME OUTCOME | | | | | | | |
| PO 1 | Capable of demonstrating the basic concepts and comprehensive knowledge from undergraduate programme of study. | | | | | | | |
| PO 2 | Ability to express thoughts and ideas effectively Communicate with others using appropriate media. | | | | | | | |
| PO 3 | To identify the relevant assumptions to formulate the arguments by following scientific approach to knowledge development. | | | | | | | |
| PO 4 | Capacity to solve different kinds of non-familiar problems and apply to real life situations | | | | | | | |
| PO 5 | Ability to evaluate the reliability and relevance of evidence, analyze and synthesize data from a variety of sources. | | | | | | | |
| PO 6 | To define problems, formulate hypotheses, test hypotheses, analyze, interpret and draw conclusions from data. | | | | | | | |
| PO 7 | Ability to work effectively and respectfully with diverse teams, facilitate cooperative or coordinated effort on the part of a group. | | | | | | | |
| PO 8 | Ability to analyze, interpret and draw conclusions from quantitative / qualitative data and critically evaluate ideas, evidence and experiences from an open-minded and reasoned perspective. | | | | | | | |
| PO 9 | Critical sensibility to lived experiences, with self awareness and reflexivity of both self and society | | | | | | | |
| PO 10 | Capability to use ICT in a variety of learning situations, demonstrate ability to access, evaluate, and use a variety of relevant information sources. | | | | | | | |
| PO 11 | Ability to work independently, identifies appropriate resources required for a project, and manages a project through to completion. | | | | | | | |
| PO 12 | Capability to effectively engage in a multicultural society and interact respectfully with diverse groups. | | | | | | | |
| PO 13 | Capable of demonstrating the ability to identify ethical issues related to ones work, avoid unethical behavior such as fabrication. | | | | | | | |
| PO 14 | Capability for mapping out the tasks of a team or an organization, and setting direction, formulating an inspiring vision, building a team who can help achieve the vision, motivating and inspiring team members to engage with that vision. | | | | | | | |
| PO 15 | Ability to acquire knowledge and skills, including how to learn, that are necessary for participating in learning activities throughout life, through self-paced and self - directed learning. | | | | | | | |
| COs | COURSE OUTCOME | | | | | | | |
| CO 1 | Understand the techniques of atomic spectroscopy and rotation of molecules and their spectra. Analyze the microwave spectrometer. | | | | | | | |

| | |
|----------------|--|
| CO 2 | Analyze IR and Raman spectroscopy. Evaluate the Born Oppenheimer approximation. |
| CO 3 | Understand the instrumentation of UV Photo electron spectroscopy. Analyze the frank Condon principle. |
| CO 4 | Understand the Quantum Mechanical and Classical Description. Apply NMR spectroscopy for determining the content and purity of samples. |
| CO 5 | Understand the principles of ESR spectrometer and analyze the experimental techniques in hyperfine interaction. |
| Pre-requisites | GET KNOWLEDGE ABOUT SPECTROSCOPY |

Knowledge Levels

1.Remembering, 2.Understanding, 3.Applying, 4.Analyzing, 5.Evaluating, 6.Synthesizing

Course Assessment Methods

Direct

1. Continuous Assessment Test I, II & Model
2. Assignment
3. End Semester Examinations

| | | | |
|--------------------------------|--|----------------|-----------|
| Indirect | | | |
| 1. Course End Delivery | | | |
| CONTENT OF THE SYLLABUS | | | |
| Unit - I | ATOMIC SPECTROSCOPY AND MICROWAVE SPECTROSCOPY | Periods | 12 |
| | <p>Atomic Spectroscopy: Quantum states of electron in atoms – Hydrogenatom spectrum – Basics Principles - Atomic absorption spectrum and Emission spectrum – atomic Absorption Spectrometer - Electron spin – Stern - Gerlach experiment.</p> <p>Microwave Spectroscopy: Rotation of molecules and their Spectra, Diatomic molecules, Intensity of line spectra, The effect of isotropic substitution, Non - rigid rotator and their spectra, Polyatomic molecules (Linear and Symmetric top molecules) – Microwave Spectrometer.</p> | | |
| Unit - II | INFRARED AND RAMAN SPECTROSCOPY | Periods | 12 |
| | <p>Infrared Spectroscopy: Vibrational energy of diatomic molecules, Simple Harmonic Oscillator, Anharmonic oscillator, Diatomic vibrating rotator, Vibration - Rotation spectrum of carbon monoxide, Influence of rotation on the spectra of polyatomic molecules (Linear and Symmetric top Molecules).</p> <p>Raman Spectroscopy: Raman Effect, Quantum Theory of Raman Effect, Pure Rotational Raman Spectra (Linear and Symmetric top molecules), Selection Rules - Degree of depolarization - Rotational Raman Spectrum - Vibrational Raman Spectrum - Structure determination using IR and Raman spectroscopy - Principles and Working of Raman Spectrometer.</p> | | |
| Unit - III | ELECTRONIC SPECTROSCOPY | Periods | 12 |
| | <p>Born-Oppenheimer Approximation, Vibrational Coarse and their progressions - Franck- Condon Principle-Dissociation energy and their products - Rotational fine structure of electronic - Vibration Transition - Molecular Orbital theory - Spectrum of molecular hydrogen-Change of shape on excitation - Chemical analysis by electronic spectroscopy-Re-emission of energy by excited molecule-Instrumentation of UV Photoelectron Spectroscopy.</p> | | |
| Unit - IV | NMR AND NQR SPECTROSCOPY | Periods | 12 |
| | <p>NMR Spectroscopy: Quantum Mechanical and Classical Description - Bloch Equations - Relaxation Processes - Principle and Working of High Resolution - NMR Spectrometer -Chemical Shift - Applications of NMR Spectroscopy: MRI.</p> <p>NQR Spectroscopy: Basic principles - Fundamental requirements - General Principle - Experimental detection of NQR frequencies - Interpretation and Chemical explanation of NQR Spectroscopy.</p> | | |
| Unit - V | ESR AND MOSSBAUER SPECTROSCOPY | Periods | 12 |
| | <p>ESR Spectroscopy: Basic Principles, ESR Spectrometer - Reflection Cavity and Microwave bridge - ESR Spectrum - Hyperfine Structure.</p> <p>Mossbauer Spectroscopy: Mossbauer Effect, Recoilless emission and absorption - Mossbauer Spectrum: Experimental techniques - Hyperfine interaction - Chemical isomer Shift – Doppler velocity shift – Magnetic hyperfine interaction - electric quadrupole interaction.</p> | | |
| Total Periods | | | 60 |

| CONTENT OF THE SYLLABUS | | | |
|--------------------------------|--|----------------|-----------|
| Unit - I | BONDS | Periods | 8 |
| | Ionization energy electron affinity - chemical bonding - electro negativity -strong bonds secondary bonds. Energies-forces-bonds: Interatomic potentials for strong and weak bonds - bond energies. Rates of reaction: reaction kinetics- water, acids, bases and aqueous reactions. Transport process: Diffusion - viscosity-thermal conduction | | |
| Unit - II | RADIOACTIVITY | Periods | 8 |
| | Radiation Biology: Radio activity- Natural radiation (Cosmic rays) - Artificial (or) Induced radioactivity - Radioactive disintegration - Geiger-Muller counter - Crystal counter: Method of detection of disintegration frequency - Biological effects of radiation. | | |
| Unit - III | BIOLOGICAL STRUCTURE | Periods | 8 |
| | Bio - molecules and biological energy Biological polymers: Nucleic acids – DNA – RNA – conformation - proteins protein folding. Biological Membranes: Historical background – membrane chemistry and structure - membrane physics. Biological energy: Energy consumption respiration – photosynthesis – ATP synthesis. | | |
| Unit - IV | NATURE OF ORGANISMS | Periods | 8 |
| | Movement of organisms Bacterial motion - chemical memory in primitive organisms - muscular movement - human performance, nerve signals and memory Excitable membranes: Diffusion and mobility of Ions - resting potential Nerve signals: Passive response - Nerve impulses (action potentials) - nervous system. | | |
| Unit - V | INSTRUMENTATION | Periods | 12 |
| | Control of movement Primary of movement - Ballistic control in a simplified visual system - more sophisticated - mode of control - structure of muscle fibers - central pattern generators - conditioned reflexes – volition - and Free will - consciousness Passive verses active in mental processing. | | |
| Total Periods | | | 40 |

| PO 4 | Capacity to solve different kinds of non-familiar problems and apply to real life situations. | | | | | | | | |
| PO 5 | Ability to evaluate the reliability and relevance of evidence, analyze and synthesize data from a variety of sources then draw valid conclusions and support them with evidence and examples, and addressing opposing viewpoints. | | | | | | | | |
| PO 6 | To define problems, formulate hypotheses, test hypotheses, analyze, interpret and draw conclusions from data, predict cause-and-effect relationships and ability to plan, execute and report the results of an experiment. | | | | | | | | |
| PO 7 | Ability to work effectively and respectfully with diverse teams, facilitate cooperative or coordinated effort on the part of a group and act together as a group. | | | | | | | | |
| PO 8 | Ability to analyse, interpret and draw conclusions from quantitative / qualitative data and critically evaluate ideas, evidence and experiences from an open-minded and reasoned perspective. | | | | | | | | |
| PO 9 | Critical sensibility to lived experiences, with self awareness and reflexivity of both self and society. | | | | | | | | |
| PO 10 | Capability to use ICT in a variety of learning situations, demonstrate ability to access, evaluate, and use a variety of relevant information sources and use appropriate software for analysis of data. | | | | | | | | |
| PO 11 | Ability to work independently, identifies appropriate resources required for a project, and manage a project through to completion. | | | | | | | | |
| PO 12 | Capability to effectively engage in a multicultural society and interact respectfully with diverse groups. | | | | | | | | |
| PO 13 | Capable of demonstrating the ability to identify ethical issues related to ones work, avoid unethical behavior such as fabrication. | | | | | | | | |
| PO 14 | Capability for mapping out the tasks of a team or an organization, and setting direction, formulating an inspiring vision. | | | | | | | | |
| PO 15 | Ability to acquire knowledge and skills, including how to learn, that are necessary for participating in learning activities throughout life. | | | | | | | | |

| COs | COURSE OUTCOME |
|----------------|---|
| CO 1 | To understand the concept of electrostatics. Acquire conceptual knowledge molecular polarisability. Analyze the Laplace equation. |
| CO 2 | Understand the techniques biot - savarts and amperes circuital law. |
| CO 3 | Understand the faraday laws of induction and evaluate the Maxwells equation. |
| CO 4 | Understand the propagation of waves in rectangular wave guides. Apply the concept of wave guides in homogeneous wave equation. |
| CO 5 | Acquire the knowledge about Plasma physics. Apply the Plasma or welding techniques. |
| Pre-requisites | To Acquire idea about Electrodynamics. |

| Knowledge Levels | | | | | | | | | | | | | | | | |

| CONTENT OF THE SYLLABUS | | | |
|--------------------------------|--|----------------------|-----------|
| Unit - I | ELECTROSTATICS | Periods | 14 |
| | Coulombs law - Field due to point and continuous charges - Gauss Law and its application - Laplace and Poissons equations - Solution of Laplace equation in spherical Coordinates - Point charge in front of a conducting sphere - Multipole expansion - Electrostatic energy - Dielectrics - Polarization and Displacement vectors, Boundary conditions - Dielectric sphere in a uniform field - Molecular polarizability and Electrical susceptibility - Clausis- Mossotti equation. | | |
| Unit - II | MAGNETOSTATICS | Periods | 10 |
| | Biot-Savarts law - Divergence and curl of magnetic induction - Magnetic vector potential - Amperes circuital law - Magnetic field of a localized current distribution - Magnetic moment and force on a current distribution in an electric field - Magneto static energy - Magnetic induction and Magnetic field in a macroscopic media - Concept of magnetic dipole - Boundary conditions - Uniformly magnetized sphere - Magnetic Scalar & Vector Potential - Characteristics. | | |
| Unit - III | ELECTROMAGNETICS | Periods | 10 |
| | Faradays law of induction - Maxwell's equation in free space and isotropic media - Maxwell's displacements current - Vector and Scalar potential - Boundary conditions on the field at interfaces - Relation between field theory and circuit theory - Gauge transformation, Lorentz Gauge - Coulomb gauge - Conservation laws fora system of charges - Poynting theorem. | | |
| Unit - IV | WAVE PROPAGATION | Periods | 14 |
| | Propagation of an electromagnetic wave in free space - Conducting and Non conducting medium - Skin depth, Reflection and Transmission at dielectric boundaries - Polarization - Fresnels Law - Interference, Coherence and Diffraction - Guided waves - Wave guides - Propagation of waves in rectangular wave guide. | | |
| Unit - V | PLASMA PHYSICS | Periods | 12 |
| | Plasma - Debye length - Plasma oscillations - Plasma behavior in a magnetic field - Boltzmann equation - Magneto hydrodynamic equations - Electron plasma oscillations - Debye shielding problem - Plasma confinement in a magnetic field - Pinch effect - Magneto hydrodynamic waves - Alfven waves - Dynamics of charged particle in uniform electromagnetic fields - Plasma arc welding technique. | | |
| | | Total Periods | 60 |

| | | | | | | | | | |
| COURSE OBJECTIVES | 1. This subject provides an advanced introduction to condensed matter physics. 2. To challenge the students provide a foundation for further advanced studies. | | | | | | | | |
| POs | PROGRAMME OUTCOME | | | | | | | | |
| PO 1 | Capable of demonstrating the basic concepts and comprehensive knowledge from undergraduate programme of study. | | | | | | | | |
| PO 2 | Ability to express thoughts and ideas effectively Communicate with others using appropriate media and interpret the idea in clear and concise manner. | | | | | | | | |
| PO 3 | To identify the relevant assumptions to formulate the arguments by following scientific approach to knowledge development. | | | | | | | | |
| PO 4 | Capacity to solve different kinds of non-familiar problems and apply to real life situations. | | | | | | | | |
| PO 5 | Ability to evaluate the reliability and relevance of evidence, analyse and synthesize data from a variety of sources then draw valid conclusions. | | | | | | | | |
| PO 6 | To define problems, formulate hypotheses, test hypotheses, analyse, interpret and draw conclusions from data, predict cause-and-effect relationships and ability to plan, execute and report the results of an experiment. | | | | | | | | |
| PO 7 | Ability to work effectively and respectfully with diverse teams, facilitate cooperative or coordinated effort on the part of a group and act together as a group or a team in the interests of a common cause and work efficiently as a member of a team. | | | | | | | | |
| PO 8 | Ability to analyze, interpret and draw conclusions from quantitative / qualitative data and critically evaluate ideas, evidence and experiences from an open-minded and reasoned perspective. | | | | | | | | |
| PO 9 | Critical sensibility to lived experiences, with self-awareness and reflexivity of both self and society. | | | | | | | | |
| PO 10 | Capability to use ICT in a variety of learning situations, demonstrate ability to access, evaluate, and use a variety of relevant information sources and use appropriate software for analysis of data. | | | | | | | | |
| PO 11 | Ability to work independently, identifies appropriate resources required for a project, and manages a project through to completion. | | | | | | | | |
| PO 12 | Capability to effectively engage in a multicultural society and interact respectfully with diverse groups. | | | | | | | | |
| PO 13 | Capable of demonstrating the ability to identify ethical issues related to ones work, avoid unethical behavior such as fabrication, falsification or misrepresentation of data or committing plagiarism, not adhering to intellectual proper tyrights. | | | | | | | | |

| | |
|-------|---|
| PO 14 | Capability for mapping out the tasks of a team or an organization, and setting direction, formulating an inspiring vision, building a team who can help achieve the vision, motivating and inspiring team members to engage with that vision. |
| PO 15 | Ability to acquire knowledge and skills, including how to learn, that are necessary for participating in learning activities throughout life. |

| COs | COURSE OUTCOME |
|----------------|--|
| CO 1 | Acquire the knowledge about the energy bands. To understand the Kronig penny model. |
| CO 2 | To Understand Drudes Lorentz Free electron theory. Analyze Thermionic Emission. |
| CO 3 | To Understand the Langevin classical theory of diamagnetism. Apply the Guoys method in diamagnetism. |
| CO 4 | Understand the concept of London equation. Apply the super conductors for commercial applications. |
| CO 5 | To Understand and Apply the qualitative ideas of MEMs spintronics. |
| Pre-requisites | To Acquire idea about materials science |

| CONTENT OF THE SYLLABUS | | | |
|--------------------------------|--|----------------|-----------|
| Unit - I | ELECTRON ENERGY BANDS | Periods | 12 |
| | Fundamentals of crystalline states - Bravais lattice - Miller indices - Simple crystal structure (SC, BCC, FCC) - Basic concepts of energy bands - Fermi surface - Density of states - The Bloch's Theorem - Kronig Penney model - Brillouin zones - reciprocal lattice - Energy bands in a general periodic potential - Motion of an electron in one dimensional lattice - Effective mass of an electron - Effective band gap and band overlapping - Anomalous skin effect - De Haas van Alphen effect. | | |
| Unit - II | FREE ELECTRON THEORY OF METALS | Periods | 12 |
| | Free electron in metals - Drude Lorentz free electron theory - Electrical conductivity - Thermal conductivity - Weidemann Franz law - Sommerfeld free electron theory - Mattiessens Rule - Thermionic emission - Relaxation time - Collision time - Mean free path - Quantum theory of free electrons - Escape of electrons from metal - Potential energy of an electron outside the metal - Dulong and Petit law - Debye theory - Einstein theory of specific heat | | |
| Unit - III | BAND THEORY OF SEMICONDUCTORS | Periods | 12 |
| | Introduction Band structure of semiconductors Fermi - Dirac Distribution law - intrinsic semiconductor: carrier concentration - electrical Conductivity - Extrinsic semiconductor: Bandgap determination - derivation of carrier concentration for P-type and n-type semiconductor - the variation of Fermi level with temperature - hall effect - determination of Hall coefficient and its applications. | | |
| Unit - IV | DIAMAGNETISM, PARAMAGNETISM AND FERROMAGNETISM | Periods | 12 |
| | Diamagnetism - Langevin classical theory of Diamagnetism - Paramagnetism - Weiss theory of paramagnetism - Quantum theory of Paramagnetism - Demagnetization of a paramagnetic salt - Determination of susceptibility of para and diamagnetism using Guoy's method - Ferromagnetism - Quantum theory of ferromagnetism - Curie - Weiss law - Weiss molecular field - Domain theory - Ferromagnetic domains - Antiferromagnetism - Ferrimagnetism. | | |

| | | | |
|----------|--|----------------|-----------|
| | SUPERCONDUCTIVITY AND SPINTRONICS | Periods | 12 |
| Unit – V | <p>Superconductivity and its historical perspective - Critical Temperature - Persistent current - Energy gap and its Temperature dependence - Type I and Type II superconductors - BCS theory - Flux quantization – London equation - DC and AC Josephson effect High temperature Superconductors – Ceramic Super Conductors - Applications: SQUID - High temperature.</p> <p>Spintronics : Electron spin in Solid - Spin relaxation and spin de-spacing – Spintronic devices</p> | | |
| | Total Periods | | 60 |

| CONTENT OF THE SYLLABUS | | | |
| Unit - I | THEORY OF RADIATION | Periods | 12 |
| | Emission & Absorption of radiation -- Electric dipole approximation – Einstein's Transition probabilities and A & B Coefficients – Selection rules – Interaction with matter - Spontaneous & Stimulated emissions – forbidden transitions. Quantum theory of Valence Bond: VB method – Hitler - London theory of Hydrogen molecule in VB method - Refinements of Simple MO and VB approximations. | | |
| Unit - II | SCATTERING THEORY | Periods | 12 |
| | Scattering cross section - differential and total cross sections - Scattering amplitude – Kinematics of scattering process - Green's function - Partial wave analysis - Phase shifts - Scattering by Coulomb potential - Low energy scattering: Scattering length and effective range - Scattering by a perfectly rigid sphere. | | |
| Unit - III | MANY ELECTRON ATOMS | Periods | 12 |
| | Indistinguishable particles - Symmetrical and Anti symmetrical wave functions - Paulis Exclusion principle - Inclusion of spin - Spin functions for two electrons - three electrons - Helium atom - Central field approximation - Thomas Fermi model of the atom - Hatree Equation - Hatree - Fock Equation - Kohn-Sham. | | |
| Unit - IV | RELATIVISTIC WAVE EQUATION | Periods | 12 |
| | Klein - Gordan Equation – Dirac's equation for a free particle - Dirac Matrices - Covariant form of dirac equation - Probability density and current density - Plane wave solution - significance of negative eigen states - Hydrogen atom. | | |
| Unit - V | QUANTUM FIELD THEORY | Periods | 12 |
| | Quantization of the wave fields - Classical Lagrangian equation– Classical Hamiltonian equation - Field Quantization of the non relativistic Schrodinger equation - Creation, Destruction and Number Operators – Photons - Anti Commutation Relations - Quantization of Electromagnetic Field – Quantum Entanglement. | | |
| Total Periods | | | 60 |

| 22P3PH09 | MICROPROCESSOR AND MICROCONTROLLER | 4 | 0 | 0 | 4 | 25 | 75 | 100 | |
| COURSE OBJECTIVES | 1. The Basic knowledge and buildings blocks of computers and its processors. 2. To operate the processors and controllers with basic idea. | | | | | | | | |
| POs | PROGRAMME OUTCOME | | | | | | | | |
| PO 1 | Capable of demonstrating the basic concepts and comprehensive knowledge from undergraduate programme of study. | | | | | | | | |
| PO 2 | Ability to express thoughts and ideas effectively Communicate with others using appropriate media and interpret the idea in clear and concise manner. | | | | | | | | |
| PO 3 | To identify the relevant assumptions to formulate the arguments by following scientific approach to knowledge development. | | | | | | | | |
| PO 4 | Capacity to solve different kinds of non-familiar problems and apply to real life situations. | | | | | | | | |
| PO 5 | Ability to evaluate the reliability and relevance of evidence, analyze and synthesize data from a variety of sources then draw valid conclusions. | | | | | | | | |
| PO 6 | To define problems, formulate hypotheses, test hypotheses, analyze, interpret and draw conclusions from data, predict cause-and-effect relationships. | | | | | | | | |
| PO 7 | Ability to work effectively and respectfully with diverse teams, facilitate cooperative or coordinated effort on the part of a group. | | | | | | | | |
| PO 8 | Ability to analyze, interpret and draw conclusions from quantitative/qualitative data and critically evaluate ideas, evidence and experiences from an open-minded and reasoned perspective. | | | | | | | | |
| PO 9 | Critical sensibility to lived experiences, with self-awareness and reflexivity of both self and society. | | | | | | | | |
| PO 10 | Capability to use ICT in a variety of learning situations, demonstrate ability to access, evaluate, and use a variety of relevant information sources and use appropriate software for analysis of data. | | | | | | | | |
| PO 11 | Ability to work independently, identifies appropriate resources required for a project, and manages a project through to completion. | | | | | | | | |
| PO 12 | Capability to effectively engage in a multicultural society and interact respectfully with diverse groups. | | | | | | | | |
| PO 13 | Capable of demonstrating the ability to identify ethical issues related to ones work, avoid unethical behavior as fabrication. | | | | | | | | |
| PO 14 | Capability for mapping out the tasks of a team or an organization, and setting direction, formulating an inspiring vision. | | | | | | | | |
| PO 15 | Ability to acquire knowledge and skills, including how to learn, that are necessary for participating in learning activities throughout life. | | | | | | | | |

| COs | COURSE OUTCOME |
|----------------|--|
| CO 1 | To acquire the knowledge of evolution of microprocessor. Understand the hardware and software interrupts. |
| CO 2 | To get the knowledge about Assembly language. Understand the instruction set of 8085. Apply the 8bit addition in 8085. |
| CO 3 | To acquire the knowledge of INTEL 8257. Apply the direct memory access in Data transfer. |
| CO 4 | To get the knowledge about applications of microprocessor architecture of 8051. Understand the counters and timers. |
| CO 5 | To get the knowledge about architecture of 8051 and instruction set of 8051. Apply the ascending and descending order program in 8051. |
| Pre-requisites | To Acquire idea about microprocessor programming |

| Knowledge Levels |
|---|
| 1.Remembering, 2.Understanding, 3.Applying, 4.Analyzing, 5.Evaluating, 6.Synthesizing |

| CONTENT OF THE SYLLABUS | | | |
|--------------------------------|---|----------------|-----------|
| Unit - I | EVOLUTION AND ARCHITECTURE OF MICROPROCESSORS 8085 | Periods | 12 |
| | <p>Evolution of Microprocessors - INTEL 8085 microprocessor - Pin configuration - Pins and their functions - Bus system - Control and status signals - Externally initiated signals including interrupts - Architecture - ALU - Flags - Registers. Timing and Sequencing: Instruction cycle, Machine cycle -Halt state and Wait state.</p> <p>Interrupts: Types of interrupts - Hardware and Software interrupts - masking and unmasking interrupts.</p> | | |
| Unit - II | INSTRUCTION SETS & PROGRAMMING OF MICROPROCESSOR 8085 | Periods | 12 |
| | <p>Assembly language - Instruction sets of 8085 - Stacks - Counters - Subroutines - MACRO - Delay Subroutine - Examples of Assembly language Programming - 16 bit Addition - 16 bit Subtraction - 16 bit Multiplication - 16 bit Division - The Largest and Smallest number in a data array - Ascending and Descending orders of a set of arrays -Sum of a series in arrays- Factorial of a given number.</p> | | |
| Unit - III | PERIPHERAL DEVICES AND THEIR INTERFACING | Periods | 12 |
| | <p>Address space - Partitioning - interfacing - Memory and I/O interfacing -I/O ports: Non programmable I/O port INTEL 8212 - Programmable Peripheral Interface (PPI) INTEL 8255 - Programmable Interval (Counter) Timer (PIT) INTEL 8253. Data Transfers: Types of parallel and serial data transfer schemes - Direct Memory Access (DMA) controller INTEL 8257.</p> <p>Interfacing: Working and Programming of PIC 8259 with 8085.</p> | | |
| Unit - IV | INTERFACING DEVICES AND THEIR APPLICATIONS | Periods | 12 |
| | <p>Introduction - Water level indicator - Stepper motor - Traffic control - Analog to digital converter (ADC 0800) - Digital to analog converter (DAC 0800) - Seven segment display interfacing - Temperature measurement and control - stepper motor and its application</p> | | |
| Unit - V | ARCHITECTURE AND MICROCONTROLLER 8051 PROGRAMMING | Periods | 12 |
| | <p>Introduction-Comparison between microcontroller and microprocessors - Key features of 8051 - Architecture of 8051 - Instruction set of 8051 - Assembly language programming - Sum of 'n' numbers - biggest and smallest in an array - Ascending and descending order program in an array - Software time delay.</p> | | |
| Total Periods | | | 60 |

| CONTENT OF THE SYLLABUS | | | |
|--------------------------------|--|----------------|-----------|
| Unit - I | INTRODUCTION TO ENERGY SOURCES | Periods | 9 |
| | Classification of Energy sources - Worlds reserve of commercial energy sources and their availability - Geothermal energy - wind energy - Ocean thermal energy conversion - Energy from waves and tides (basic ideas) - Merits and Demerits. | | |
| Unit - II | SOLAR THERMAL ENERGY | Periods | 9 |
| | Introduction about thermal properties - Renewable energy sources - Solar energy - Solar water heater - Solar Pumping - Solar furnace - Solar space heating and cooling - Solar thermal technologies - Solar cooker - Solar Pond - Merits and Demerits of solar energy. | | |
| Unit - III | SOLAR CELL | Periods | 9 |
| | Introduction about semiconductor - Photo voltaic effect - Performance of solar cell - Solar cell Parameter - Solar cell characteristics and efficiency - Choice of materials for solar cell - Basic requirements for obtaining an effective solar cell - Power generation by using solar cell. | | |
| Unit - IV | BIOMASS ENERGY FUNDAMENTALS | Periods | 9 |
| | Biomass energy - Classification - Photosynthesis - Biogas Generation - Introduction basic process and energetic, Advantages - Biomass conversion technology - Wet and dry process - Gobar gas and its Applications - Advantages and Disadvantages of biomass energy. | | |
| Unit - V | ENERGY STORAGE | Periods | 9 |
| | Introduction - Liquid media storage - Solid media storage - Ground collector - Chemical storage-Capacitor, Electromagnets-Superconducting Magnet Energy Storage (SMES)systems. | | |
| Total Periods | | | 45 |

Course Assessment Methods

Direct

1. Continuous Assessment Test - I, II & Model
2. Assignment
3. End Semester Examinations

| |
|------------------------|
| Indirect |
| 1. Course End Delivery |

| CONTENT OF THE SYLLABUS | | | |
|--------------------------------|---|----------------|-----------|
| Unit - I | NUCLEAR PROPERTIES AND MODELS | Periods | 12 |
| | Basic nuclear properties: Size, shape and charge distribution-spin and parity-determination of nuclear mass-binding energy - nuclear stability- Mass Parabola - Liquid drop model - Semi empirical mass formula - Shell Model - Prediction of Magic numbers and energy levels by shell model - Prediction and failure of the shell model - Optical Model - Introduction to collective model - Collective model of Bohr and Mottelson. | | |
| Unit - II | NUCLEAR REACTIONS | Periods | 12 |
| | Nuclear reactions and reaction mechanism - Types of reactions and conservation laws – Reciprocity theorem - Energetic of nuclear reactions -Q-value equation - Scattering and reaction cross sections - Compound nucleus reactions - Direct reactions Stripping, Pick up reactions - Partial wave analysis of nuclear reaction cross – section – Breit-Wigner one level formula - continuum theory of nuclear reaction. | | |
| Unit - III | NUCLEAR INTERACTIONS | Periods | 12 |
| | Nature of Nuclear forces - Exchange forces - Two body problems - ground state of deuteron - Magnetic moment - Quadrupole moment – Nucleon -nucleon interaction: NP scattering, PP scattering at low energy, non- central - Meson theory of nuclear forces - Effective range theory - Spin dependence of nuclear forces-Charge independence and charge symmetry of nuclear forces. | | |
| Unit - IV | NUCLEAR DECAY | Periods | 12 |
| | Gamow’s theory of alpha decay - Fermi’s theory of beta decay - Total decay rate - Mass of the neutrino - Angular momentum and parity selection rules - Allowed and forbidden decays - Comparative half-lives – Gamma decay - Neutrino Hypothesis – Helicity - Non-conservation of parity - Multipole transitions in nuclei - Internal conversion - Nuclear isomerism. | | |
| Unit - V | PARTICLE PHYSICS | Periods | 12 |
| | Types of interaction between elementary particles -Hadrons-Leptons-Mesons-Baryons- Hyperons-Pions- Symmetries and conservation laws-Elementary ideas of CP and CPT invariance - Isospin multiples – SU(2), SU (3) Multiples Gell-Mann-Okubo mass formula for octet and decuplet-Quark model- color and flavor. | | |
| Total Periods | | | 60 |

| 22P4PH11 | COMMUNICATION ELECTRONICS | | 6 | 0 | 0 | 5 | 25 | 75 | 100 |
| COURSE OBJECTIVES | 1. The working principles of communication systems. 2. How to handle the communication elements. | | | | | | | | |
| POs | PROGRAMME OUTCOME | | | | | | | | |
| PO 1 | Capable of demonstrating the basic concepts and comprehensive knowledge from undergraduate programme of study. | | | | | | | | |
| PO 2 | Ability to express thoughts and ideas effectively Communicate with others using appropriate media. | | | | | | | | |
| PO 3 | To identify the relevant assumptions to formulate the arguments by following scientific approach to knowledge development. | | | | | | | | |
| PO 4 | Capacity to solve different kinds of non-familiar problems and apply to real life situations. | | | | | | | | |
| PO 5 | Ability to evaluate the reliability and relevance of evidence analyses and synthesize data from a variety of sources. | | | | | | | | |
| PO 6 | To define problems, formulate hypotheses, test hypotheses, analyses, interpret and draw conclusions from data. | | | | | | | | |
| PO 7 | Ability to work effectively and respectfully with diverse teams, facilitate cooperative or coordinated effort on the part of a group. | | | | | | | | |
| PO 8 | Ability to analyses, interpret and draw conclusions from quantitative / qualitative data and critically evaluate ideas, evidence and experiences from an open-minded and reasoned perspective. | | | | | | | | |
| PO 9 | Critical sensibility to lived experiences, with self-awareness and reflexivity of both self and society. | | | | | | | | |
| PO 10 | Capability to use ICT in a variety of learning situations, demonstrate ability to access, evaluate, and use a variety of relevant information sources. | | | | | | | | |
| PO 11 | Ability to work independently, identifies appropriate resources required for a project, and manage a project through to completion. | | | | | | | | |
| PO 12 | Capability to effectively engage in a multicultural society and interact respectfully with diverse groups | | | | | | | | |
| PO 13 | Capable of demonstrating the ability to identify ethical issues related to ones work, avoid unethical behavior such as fabrication. | | | | | | | | |
| PO 14 | Capability for mapping out the tasks of a team or an organization, and setting direction, formulating an inspiring vision, building a team who can help achieve the vision, motivating and inspiring team members to engage with that vision. | | | | | | | | |
| PO 15 | Ability to acquire knowledge and skills, including how to learn, that are necessary for participating in learning activities throughout life, through self-paced and self-directed learning. | | | | | | | | |

| COs | COURSE OUTCOME |
|----------------|--|
| CO 1 | Understand the frequency modulation and apply modulation system in BPSK and QPSK. |
| CO 2 | Acquire the knowledge of single mode and multi-mode communication. Understand splicing and connectors. |
| CO 3 | Analyze the reflex klystron and applying microwave system. |
| CO 4 | Apply satellite communication system in RADAR. |
| CO 5 | Apply mobile communication in digital cellular radios. |
| Pre-requisites | Laser in Medicine Communication Systems |

| Knowledge Levels | | | |

1. Continuous Assessment Test - I, II & Model Exam.
2. Assignment.
3. End Semester Examinations.

| | | | |
|--------------------------------|--|----------------|-----------|
| Indirect | | | |
| 1. Course End Delivery | | | |
| CONTENT OF THE SYLLABUS | | | |
| Unit - I | MODULATION SYSTEMS | Periods | 12 |
| | Theory of Amplitude modulation - frequency modulation - phase modulation - Pulse code modulation - Pulse width modulation - Sampling theorem - low pass and band pass signals, PAM, Differential PCM delta modulation - Delta modulation - Adaptive Delta modulation - BPSK, QPSK. | | |
| Unit - II | FIBER OPTICS COMMUNICATION | Periods | 12 |
| | Basics principle of Fiber Optics – Classification - Single mode and multimode, Step index and Graded index - Fiber Losses - Attenuation, Absorption, Leaky modes, Bending losses, Transmission losses, and Core and cladding losses. Propagation of Light in an Optical Fiber: Acceptance Angle – Numerical Aperture – Dispersion – Applications. | | |
| Unit - III | MICROWAVE COMMUNICATION SYSTEM | Periods | 12 |
| | Microwave Generation - Multicavity Klystron - Reflex Klystron - Magnetron - Travelling Wave Tubes (TWT) – MASER - Microwave communication system - Analog Microwave Communication - LOS microwave system - OTH microwave system - Digital Hierarchies, Digital Microwave Systems, Bandwidth efficiency. | | |
| Unit - IV | SATELLITE COMMUNICATIONS | Periods | 12 |
| | Orbital Satellites, Geostationary Satellites, Orbital Patterns, Look angles, Orbital Classifications, Spacing and frequency allocation, Radiation Pattern, foot prints, Satellite System link models, Satellite system link equation - Non-ideal system parameters - INSAT communications satellites - Channel Capacity – RADAR- Elements of a Radar System – Radar Equation - Cable TV, CCTV. | | |
| Unit - V | MOBILE COMMUNICATION | Periods | 12 |
| | Evaluation and fundamentals - Cellular structure and planning - Frequency allocations – Propagation-Problems - Base station antennas and mobile antennas - Type of mobile system - Access method -TDMA, FDMA and CDMA – Internet Protocol Television – Wi-fi – 5 G (Basics ideas only) | | |
| Total Periods | | | 60 |

| | |

| CONTENT OF THE SYLLABUS | | | |
|--------------------------------|--|----------------|-----------|
| Unit - I | THIN FILM FORMATION METHODS | Periods | 12 |
| | <p>Basics of thin film: Nucleation and growth of thin films Vacuum coating unit: Construction and uses of vapor sources – wire- crucible vacuum pumps and heated sources –measurement of Pressure – gauges.</p> <p>Thin film preparation methods: Physical vapor deposition (PVD) - Thermal evaporation; electron beam evaporation - Pulsed laser deposition; Ion beam assisted deposition - Chemical vapor deposition (CVD).</p> | | |
| Unit - II | DEPOSITION MONITORING AND THICKNESS MEASUREMENT | Periods | 8 |
| | <p>Electrical methods: Quartz crystal monitor; Crystal oscillator thickness monitor- Resistance Monitor.</p> <p>Optical methods: Multiple Beam Interferometer, Fizeau - Tolansky technique - Fringes of equal chromatic order (FECO) method – Ellipsometry.</p> | | |
| Unit - III | ELECTRICAL PROPERTIES OF THIN FILM | Periods | 8 |
| | <p>Influence of thickness on resistivity - Electrical conduction in thin metallic films - Resistivity of the metallic film - Sheet resistance - Hall effect - Calculation of mobility - DC conduction mechanism - Low field and high field conduction. - AC conduction mechanism.</p> <p>Temperature dependence of conductivity - Thermal treatment process: Breakdown mechanism in dielectric films.</p> | | |
| Unit - IV | CHARACTERIZATION TECHNIQUES | Periods | 11 |
| | <p>Structural analysis: X-ray diffraction – powder diffraction - determination of lattice parameters - structure - X-ray photoelectron spectroscopy (XPS) – ftr Instrumentations.</p> <p>Optical analysis: Optical constants of thin films - UV spectrophotometer - Transmittance, absorption, determination of band gap.</p> <p>Surface analysis: Field Emission scanning Electron microscope (FESEM) - Transmission electron microscopy (TEM) - Atomic force microscopy (AFM).</p> | | |
| Unit - V | APPLICATION OF THIN FILMS | Periods | 9 |
| | <p>Thin film resistors: Materials and Design of thin film resistors.</p> <p>Thin film capacitors: Materials - Capacitor structures-Capacitor yield and capacitor stability.</p> <p>Fabrication and characteristics: Thin film field effect transistors - Thin film solar cells - anti reflection coatings.</p> | | |
| Total Periods | | | 48 |

| CONTENT OF THE SYLLABUS | | | |
|--------------------------------|---|---------------------|-----------|
| Unit-I | X-RAYGENERATORS | Periods | 10 |
| | Discovery - Production - Properties of X-rays - Characteristics and continuous spectra - Design of hot cathode X-ray tube - Basic requirements of medical diagnostic, therapeutic and industrial radiographic tubes - Rotating anode tubes - Hooded anode tubes - Rating of tubes - standard exposure charts, Limitations on loading Safety devices in X-ray tubes - Insulation and cooling of X-ray tubes. | | |
| Unit-II | PARTICLE ACCELERATORS | Peri ods | 10 |
| | Particle accelerators for industrial ,medical and research applications - The Resonant transformer Cascade generator - Pelletron - Synchro - Cyclotron - Linear Accelerator - Klystron and magnetron - Travelling and Standing Wave Acceleration-Microtron - Working principle of Cyclotron and charged particle accelerators , Applications of cyclotrons in medicine, Types of Cyclotrons: Beam transport systems - Beam delivery systems -Energy slits. Computed Tomography, Positron emission tomography (PET). | | |
| Unit-III | RADIATION SOURCES AND THEIR MEDICAL APPLICATIONS | Peri ods | 10 |
| | Radiation sources - Natural and artificial radioactive sources- Cyclotron produced isotopes (20 F, 13 N, 15 O, 11 C) -Fission products (137 Cs, 99 Mo, 131 I, 90 Sr) - Requirement for brachytherapy sources - Beta ray applicators - ophthalmic applicators (90 Sr, 125 I, 106 Ru etc.). | | |
| Unit-IV | LASERSINMEDICINE | Periods | 9 |
| | Lasers in medicine - applications of Ultrafast pulsed Lasers - Lasers in dermatology, oncology and cellbiology - Lasers in blood flow measurement-Fiberoptics in medicine - microscopy in medicine - birefringence - Fluorescence microscope -confocal microscope - Hazards of lasers and their safety measures. | | |
| Unit-V | ULTRASOUND IN MEDICINE | Periods | 9 |
| | Production, properties and propagation of ultrasonic waves - Bioacoustics - Acoustical characteristics of human body - Ultrasonic Dosimetry - High power ultrasound in therapy - Ultrasound cardiography (UCG) - Doppler effect - Double Doppler shift - Doppler systems - ultrasonic tomography - applications of ultrasound in medicine. | | |
| | Total Periods | | 48 |
| TEXT BOOKS | | | |
| 1 | F. M. Khan, The Physics of Radiation therapy, 3rd Edition, Lippincott Williams & Wikins, Philadelphia, 2003. | | |
| 2 | H. E. John and J. R. Cunningham, Physics of Radiology, 4th Edition, Charles C Thomas Pub. Ltd., 1983. | | |
| 3 | J. P. Woodcock, Ultrasonic, Medical Physics Handbook series 1, Adam Hilger, Bristol, 2002. | | |

| | |
|-------------------|--|
| 4 | J. R. Greening, Medical Physics, North Holland Publishing Co., New York, 1999. |

SEMESTER – I

Credit: 4

Max. Hours: 48

PRACTICAL – I: ADVANCED ELECTRONICS EXPERIMENTS

PAPER CODE: 22P1PHP01

1. FET Characteristics and construct FET amplifier circuit.
2. Design Phase shift oscillator.
3. Construct Schmitt trigger using IC 555 & IC 741.
4. Design square wave generator using IC 555 & IC741.
5. Design monostable multivibrator using IC 741 & IC 555.
6. Binary addition and subtraction using IC 7483.
7. BCD counter- Seven segment display.
8. UJT Characteristics and construct saw tooth wave oscillator.
9. Multiplexer and De-Multiplexer.
10. Decoder and Encoder.
11. Analog computation – Solving simultaneous equation.
12. Shift registers using 7476/7473 IC.
13. Study of Flip Flops using IC 7400.
14. Design second order butter worth active filter circuit – Low pass, high pass and band pass filters using IC 741.
15. Design of R/2R ladder and Binary weighted method of DAC using IC 741.
16. Photo diode and Photo transistors.

SEMESTER - II

PRACTICAL – II: ADVANCED PHYSICS EXPERIMENTS - I

Paper Code: 22P2PHP02

Credit: 4

Max. Hours: 48

1. Determine the Young's Modulus of the material of the given plate by forming elliptical fringes. Repeat the experiment at least twice by changing the position of the suspended masses.
2. Determine the Young's Modulus of the material of the given plate by forming hyperbolic fringes. Take 2 sets of readings.
3. Using the given experimental setup determine the value of Stefan's constant. Assuming the solar constant 'S'. Calculate the temperature of the SUN.
4. Find the thickness of the air film in FP etalon.
5. Determine the compressibility of the given solution by using an ultrasonic interferometer. Repeat the experiment at least for four different concentrations and hence draw the concentration vs. compressibility graph.
6. Determine the compressibility of the given four liquids/solution by using an ultrasonic interferometer.
7. Determine
 - (a) Hall voltage and Hall coefficient
 - (b) Number density of the charge carriers and
 - (c) Hall angle and mobility.

Repeat the experiment for a different value of magnetic field.

8. Measure the diameter of a circular aperture, the diameter of a thin wire and diameter of sleeve using Fresnel's diffraction phenomenon.
9. Determine the wavelength of the laser light by using transmission grating and determine the number of lines in a transmission grating.

SEMESTER - III

Credit: 4

Max. Hours: 48

PRACTICAL – III: MICROPROCESSOR EXPERIMENTS

Paper Code: 22P3PHP03

1. 8 Bit Decimal Addition and Subtraction.
2. 8 Bit Multi-byte Addition and Subtraction.
3. Number Conversion: BCD to Binary, Binary to BCD, ASCII to Hexadecimal and Hexadecimal to ASCII.
4. 16 bit Addition and Subtraction.
5. 16 bit Multiplication and Division.
6. 16 bit Square of a number and 16 bit Square root of a number.
7. Sum of simple series and Factorial of a number.
8. ADC interfacing.
9. Stepper motor interfacing.
10. Interfacing of an 8 bit DAC Converter and Waveform generation- Triangular, Saw tooth, Sine, Square, Rectangular.
11. Traffic light controller.
12. Finding the Largest/Smallest number in a data array.
13. Ascending/Descending order in a given array.
14. Multibyte decimal addition.
15. Data transfer Program.

SEMESTER - IV

PRACTICAL – IV: ADVANCED GENERAL EXPERIMENTS - II

Paper Code: 22P4PHP04

Credit: 4

Max. Hours: 48

1. Rydberg constant-grating –Hydrogen spectrum.
2. Magnetic susceptibility – Quincke’s method.
3. Magnetic susceptibility – Guoy’s method.
4. Band gap of a semiconductor – Four probe method.
5. Rydberg constant - Solar Spectrum.
6. Thermal conductivity of a good conductor – Forbe’s method.
7. Coefficient of Viscosity - Searle’s Viscometer.
8. Charge of an electron using Spectrometer.
9. Determination of wavelength - Michelson’s Interferometer.
10. Charge of an electron - Milikan’s oil drop method.
11. Compressibility of the Liquid - Ultrasonic Diffractometer.
12. Temperature Coefficient & Energy Band Gap of a Thermistor.
